*XPages Extension Library* Jan 30 2020 The XPages Extension Library's next-generation XPages controls make application development far more efficient, effective, scalable, and rewarding. With IBM Lotus Notes/Domino 8.5.3 and Upgrade Pack 1, IBM has incorporated powerful new capabilities and support. These components and technologies are now fully ready for even the toughest production challenges. XPages Extension Library is the first and only complete guide to Domino development with this library; it's the best manifestation yet of the underlying XPages Extensibility Framework. Complementing the popular *Mastering XPages*, it gives XPages developers complete information for taking full advantage of the new components from IBM. Combining reference material and practical use cases, the authors offer step-by-step guidance for installing and configuring the XPages Extension Library and using its state-of-the-art applications infrastructure to quickly create rich web applications with outstanding user experiences. Next, the authors provide detailed step-by-step guidance for leveraging the library's powerful new support for REST services, mobile and social development, and relational data. The book concludes by showing how to include Java(tm) code in Domino XPages applications--a great way to make them even more powerful. Coverage includes Automating deployment of XPages Extension Library throughout your IBM Lotus Notes/Domino or IBM XWork environment Integrating modern design patterns and best practices into Lotus Domino applications with drag-and-drop ease Incorporating AJAX capabilities with Switch, In Place Form, and other dynamic content controls Extending applications with Dojo widgets, popups, Tooltips, Dialogs, and Pickers Implementing state-of-the-art navigation and outlines Using Layout and Dynamic Views controls to painlessly modernize most Domino applications to XPages Quickly building mobile interfaces for existing applications Using social enablers to connect with social platforms and incorporate social features Integrating SQL datasources into XPages data-driven applications

**The NEPA Reference Guide** Jun 24 2019 "The NEPA Reference Guide conveniently organizes and indexes the National Environmental Policy Act (NEPA) and the Council on Environmental Quality (CEQ) regulations and guidance, along with relevant federal case law, all in one place. *Flash Remoting: The Definitive Guide* Jul 18 2021 Flash Remoting MX lets developers easily integrate rich Macromedia Flash content with applications that are built using Macromedia ColdFusion MX, Microsoft .NET, Java, PHP, or SOAP-based web services. The result is complex client/server applications that more closely resemble desktop applications than traditional web pages. Gone is the click/wait/reload approach of HTML. Your web application uses Flash as the front end while Flash Remoting handles the communication behind the scenes with the application server. All the end user knows is that it's fast and flexible. The potential uses for Flash Remoting are endless. Flash Remoting: The Definitive Guide will help you understand this breakthrough technology and use it to build your own Rich Internet Applications (RIAs). Build applications that connect to a database, file system, or other server-side technologies. Or, use Flash Remoting to create: online stores that feature catalogs and shopping cart systems sound and video clip libraries banner ads with built-in shopping carts, click-through tracking, and site search capabilities new controls that can be used in place of HTML extensions to Flash, Dreamweaver, Fireworks, and more front-ends to databases for administrators The book begins with Flash Remoting basics: setup, installation and an introduction to its underlying concepts. Next, you'll explore the Flash's User Interface components as they relate to Flash Remoting. Then, you'll gain insights into Flash Remoting internals and the Remoting API. The book is rich with examples that you will be able to run on your own system. The next section focuses on the server-side environment that you'll use for your applications. Individual chapters cover Flash Remoting with ColdFusion, Server-Side ActionScript, Java, ASP.NET, and PHP. The last section covers more advanced Flash Remoting techniques, such as calling web services from Flash Remoting, extending objects and UI controls, best practices, and debugging. Plus there is a detailed chapter demonstrating a real-world application. The book concludes with a Flash Remoting API reference. Developers who are looking to create Rich Internet Applications with Flash will find Flash Remoting: The Definitive Guide indispensable.

[Conducting the Reference Interview, Third Edition](#) May 28 2022 Based on the latest research in communication theory but tailored specifically for real-world application, this updated manual speaks equally to the needs of students preparing to enter the profession and those who are already fielding reference inquiries. The authors, working in consultation with a stellar advisory board of scholars and practitioners, present a convenient and comprehensive resource that will teach you how to understand the needs of public, academic, and special library users across any virtual setting—including email, text messaging, and social media—as well as in traditional and face-to-face models of communication. Packed with exercises and examples to help you practice effective reference transactions and avoid common pitfalls, this book tackles the fundamentals of the reference interview, from why it's important in the first place to methods for setting the stage for a successful interview and techniques for finding out what the library user really wants to know; covers the ins and outs of the readers' advisory interview; examines a wide range of contexts, such as children, young adults, parents, seniors, adults from diverse communities, and those with disabilities; presents case studies of innovative reference and user encounters at a variety of libraries; offers updated coverage of virtual reference, including new research, virtual reality transcripts, and a look at crowd-sourcing reference via social media; features new content on common microaggressions, with guidance on how to use awareness of emotion as a factor in reference interactions to ensure better outcomes; discusses topics such as respecting/protecting privacy, overcoming assumptions, implicit judgment, the importance of context, determining the real information need, and many other lessons learned from challenging reference encounters; and thoroughly addresses policy and training procedures, as well as the unique challenges faced by paraprofessionals and non-degreed staff. Find your bearings in the continually evolving hybrid reference environment through proven strategies, advice, exercises, and research from three experts in the field.

[IBM Intelligent Operations Center 1.6 Programming Guide](#) Jan 24 2022 IBM® Intelligent Operations Center is an integrated solution. It provides a rich set of capabilities and line of business tools that business users with domain expertise and no technical background can use without customization. IBM Intelligent Operations Center also provides services and extension points that developers can use to extend the IBM Intelligent Operations Center standard functions and develop capabilities specific to the domain and client requirements. IBM Intelligent Operations Center includes an application-based programming model that supports all the interactions with the solution components. The programming model is based on industry standard Representational State Transfer (REST) and Java technologies. IBM Intelligent Operations Center includes a full set of REST and Java application programming interfaces (APIs) that provide a simplified development environment and make the platform easy to extend and customize for a large community of developers. This IBM Redbooks® publication gives a broad understanding of the IBM Intelligent Operations Center 1.6.0.1 programming model and available extension points. Many of the chapters describe working examples and usage scenarios that demonstrate how to extend the IBM Intelligent Operations Center base platform. This book includes sample code that can be downloaded from the IBM Redbooks website. The target audience for this book consists of solution architects, developers, technical consultants, and solution administrators who will learn the following information: The options available to extend the IBM Intelligent Operations Center solution programmatically How to configure customizations tailored to specific customer requirements How to use the available configuration tools to configure the solution without requiring programming Readers of this book will benefit from the IBM Redbooks publication IBM® Intelligent Operations Center 1.5 to 1.6 Migration Guide , SG24-8202.

Knitting the Semantic Web Jan 12 2021 The Semantic Web, extends the popular, day-to-day Web, enabling computers and people to effectively work together by giving information well-defined meaning. Knitting the Semantic Web explains the interdisciplinary efforts underway to build a more library-like Web through "semantic knitting." The book examines foundation activities and initiatives leading to standardized semantic metadata. These efforts lead to the Semantic Web—a network able to support computational activities and provide people with services efficiently. Leaders in library and information science, computer science, and information intensive domains provide insight and inspiration to give readers a greater understanding of the evolution of the Semantic Web. Librarians and information professionals are uniquely qualified to play a major role in the development and maintenance of the Semantic Web. Knitting the Semantic Web closely examines this crucial relationship in detail. This single source reviews the foundations, standards, and tools underlying the Semantic Web and presents thoughtful perspectives in the context of 2.0 developments. Many chapters include figures to illustrate concepts and ideas, and the entire text is extensively referenced. Topics in Knitting the Semantic Web include: RDF, its expressive power, and its ability to underlie the new Library catalog card for the coming century the value and application for controlled vocabularies SKOS (Simple Knowledge Organization System), the newest Semantic Web language managing scheme versioning in the Semantic Web Physnet portal service for physics Semantic Web technologies in biomedicine developing the United Nations Food and Agriculture ontology Friend Of A Friend (FOAF) vocabulary specification—with a real world case study at a university Web/Library 2.0 and more Knitting the Semantic Web is a stimulating resource for professionals, researchers, educators, and students in library and information science, computer science, information architecture, Web design, and Web services.
