Once upon the Tracks of Mumbai Sep 04 2020 "Autistic. Schizophrenic. Psychotic..." They use these words to describe Babloo - the doctors, his family, his teachers... everyone... except Vandana. She treats him the way he wants the world to see him. Mumbai... the city that defines his ultimate desires. Will it allow him the love and 'normalcy' he so craves? Vandana... yearns for a soul mate to rescue her from the confines of the Railway Colony they all live in. Is she looking in the right place? Rail Man... a fearless, real-life hero who succeeds in doing all that Babloo secretly wishes to do... is Babloo his inspiration or... is it the other way around? A random twist of fate on Mumbai's endless, serpent-like, jangling local train tracks ties all these characters together in a complex weave of love, heartbreak, and courage. Babloo draws the reader into his fascinating, heart-rending journey through the twisted, choked lanes of Mumbai, into an open space where he can finally exhale, be born again.

Corporate Champions Sep 23 2019 The year 1991 was a turning point in the history of the Indian economy. Liberalization saw a tremendous increase in competition from multinationals in almost all industrial sectors. This book examines how a few 'Good' Indian companies became 'Excellent' by withstanding the onslaught of competitive pressures and flourishing despite a fast-changing and unpredictable economic environment. Distilling vast amounts of data on 23 Indian companies belonging to a range of industries, the book draws out the factors that made them achieve business excellence. The author uses a three-tier filtering process with increasingly strict criteria for narrowing down from the initial 144 companies to the 23 researched cases, and then to the final seven exceptional organizations. In the quest to find the answer to what made these companies perform exceptionally, the author proposes a business model based on strategy, execution excellence and leadership, which provides a compelling explanation for the superlative performance of these outstanding companies.

The Ones Who Remember Mar 30 2020 How do you talk about and make sense of your life when you grew up with parents who survived the most unimaginable horrors of family separation, systematic murder and unending encounters of inhumanity? Sixteen authors reveal the challenges and gifts of living with the aftermath of their parents' inconceivable experiences during the Holocaust. The Ones Who Remember: Second-Generation Voices of the Holocaust provides a window into the lived experience of sixteen different families grappling with the legacy of genocide. Each author reveals the many ways their parents' Holocaust traumas and survival seeped into their souls and then affected their subsequent family lives - whether they knew the bulk of their parents' stories or nothing at all. Several of the contributors' children share interpretations of the continuing effects of this legacy with their own poems and creative prose. Despite the diversity of each family's history and journey of discovery, the intimacy of the collective narratives reveals a common arc from suffering to resilience, across the three generations. This book offers a vision of a shared humanity against the background of inherited trauma that is relatable to anyone who grew up in the shadow of their parents' pain.

Arranged Love Jun 01 2020 Suhaani is enjoying her independent status in the US and her sexy Indian American boyfriend, when suddenly she loses her job to recession. And she's forced to move back to India where her father has selected a boy for her from his guitar class. Suhaani doesn't know how to tell her internet-savvy dad and Farmville-addict mother that she's not interested in an arranged match, especially to an IITian. She decides to dislike the guy. Except that has not too thrilled about her either. Even when they end up working together, Suhaani decides she will not fall for this guy. But before she can turn him down, he rejects her!

Automotive Engines Aug 27 2022 This book is designed to meet the requirements of the students of Mechanical Engineering and Automobile Engineering. It is based on the latest syllabi prescribed by different Technical Colleges and Universities in India. Each chapter describes in simple, non-technical language and explains by clear illustrations that how engine parts and systems are constructed, how the part works, and what is required to maximize performance in terms of power, speed, economy and safety. The important short and long review questions which are included at the end of each chapter are taken from previous semesters question papers of various Technical colleges and Universities. This book is intended to be used as a Text and for Reference by colleges and technical universities offering subjects like Automotive Engines and Internal Combustion Engines.

Recent Advances in Traffic Engineering Jul 14 2021 This book comprises select proceedings of the National Conference on Recent Advances in Traffic Engineering (RATE 2018) with technical papers on the themes of traffic operation control and management, traffic safety and vulnerable road users, and sustainable transportation. It covers a wide range of topics, including advanced traffic data collection methods, big data analysis, mix-traffic characterization and modelling, travel time reliability, scenario of pedestrian and non-motorised vehicles (NMTVs) traffic, regional traffic growth modelling, and applications of intelligent transportation systems (ITS) in traffic management. The contents of this book offer up-to-date and practical knowledge on different aspects of traffic engineering, which is useful for students, researchers as well as practitioners.

Basics of Mechanical Engineering Jan 20 2022

Novel Combustion Concepts for Sustainable Energy Development Feb 21 2022 This book comprises research studies of novel work on combustion for sustainable energy development. It offers an insight into a few viable novel technologies for improved, efficient and sustainable utilization of combustion-based energy production using both fossil and bio fuels. Special emphasis is placed on micro-scale combustion systems that offer new challenges and opportunities. The book is divided into five sections, with chapters from 3-4 leading experts forming the core of each section. The book should prove useful to a variety of readers, including students, researchers, and professionals.

Hello and Welcome Dec 27 2019 A wonderful companion to Gregg Dreise's highly acclaimed My Culture and Me, this joyful picture book celebrates Australia's Indigenous heritage and the diversity we enjoy today. Hello and welcome to our corroboree. Hello and welcome to our gathering. Father Sky, Mother Earth, together here with me. Different colours, different people, together in harmony.

Beach Holidays in India Jan 08 2021

PRODUCT MANAGEMENT Dec 07 2020 In today's competitive milieu, the product promotion function, along with continuous product innovation and speed of execution, is very important as a critical parameter for a company's success. Product Management involves designing customized products to fit the exact needs of individual customers. This comprehensive book focuses on the critical issues of product management that enable better product performance in the marketplace. It deals with many new products that straddle across Indian and global markets to give a broad and clear perspective of the current competitive marketing scenario. The text covers such topics as competitive product development and product life cycle strategies, innovation, branding, pricing, segmentation, targeting, positioning, CRM, modern product management tools, and various other issues. Key Features : Provides a clear understanding of managing the product category, and product life cycle. Focuses on the present Indian marketing scenario. Illustrations and websites are provided to acquaint the readers with the latest product information. Gives 20 Case Studies that cover all the critical aspects of product management. Provides Assignments at the end of each chapter to lend a practical touch to the subject. Intended primarily as a text for the postgraduate students of Management, the book will also prove to be a useful learning tool for the students of Marketing and Commerce. Besides, the strategies discussed in the book can be good takeaways for practising managers, and for those interested in learning about Product Management.

Economic Survey 2008-09 Aug 03 2020 A flagship annual document of the Ministry of Finance, Government of India, Economic Survey 2008-09 reviews the developments in the Indian economy over the past 12 to 18 months, summarizes the performance on major development programmes, and highlights the policy initiatives of the government and the prospects of the economy in the short to medium term. With detailed statistical data covering all aspects of the economy--macro as well as sectoral-- the report provides an overview of the following issues: state of the Indian economy; challenges, policy responses, and medium-term prospects; fiscal policy and monetary management; financial intermediation and the role of markets; external sector, balance of payments, and trade; agriculture and industrial development; energy, infrastructure, and communications; human development and public programs. The Survey highlights that the fallout of the global financial crisis on the Indian economy has been palpable in the industry and trade sectors and has also permeated the services sector. While some segments, especially the export-oriented industries have suffered, the Indian economy has resiliently withstood the adverse global economic situation and posted a growth rate of 6.7 per cent in 2008-09. The Survey also identifies the wide-ranging challenges faced by the Indian economy and suggests short- and long-term policy measures for sustaining growth and improving governance and the human development profile of the country through a process of inclusive development.

Internal Combustion Engines Oct 25 2019 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

International Yearbook of Industrial Statistics 2021 Jun 20 2019 A unique and comprehensive source of information, this book is the only international publication providing economists, planners, policymakers and business people with worldwide statistics on current performance and trends in the manufacturing sector.

Beautiful Machines Nov 06 2020 Start your engines for a grand tour of the most stylish grand motoring automobiles ever created. Evoking an era when elegance, romance, and outright performance defined the automobile--and the fascinating stories that made them icons of the road. From the shark-inspired Maserati Ghibli to the fiery Lamborghini Miura, from European elegance with American firepower such as the Iso Grifo and Facel Vega to the groundbreaking designs of the Alfa Romeo Tipo 33 Stradale and Renault Alpine and the advanced technology behind the Jensen FF or Porsche 918 Spyder--these cars are less transportation and more testaments to beauty, freedom, ambition, innovation, and speed. Beautiful Machines was conceived and edited by gestalten. The stories are written by automobile expert Blake Z. Rong with a preface by Classic Driver's Jan Baedeker and gestalten's Robert Klanten.

International Management: Managing Cultural Diversity Apr 23 2022 International Management: Managing Cultural Diversity International Management explores the dynamic global environment of business management by examining the political, legal, technological, competitive, and cultural factors that shape corporations worldwide. With its hallmark clear and concise approach, International Management places fundamental management theories in an international context. Students will gain a comprehensive understanding of the practices, cultural skills and sensitivities needed to operate successfully in a wide range of cross-national situations. The second Australian edition of International Management focuses on the expanding economics of Australasia, China, India and their increasing trade amongst themselves, the European Union and the Americas. International Management 2nd edition incorporates up-to-date research, increased coverage of ethics, a wide range of case studies and examines recent trends affecting international business managers in today's hypercompetitive global environment. International Management is suitable for undergraduate and post graduate students majoring in international business, general management or cross cultural studies.

Performance Exhaust Systems Aug 23 2019 To extract maximum performance, an engine needs an efficient, well-designed, and properly tuned exhaust system. In fact, the exhaust system's design, components, and materials have a large impact on the overall performance of the engine. Engine builders and car owners need to carefully consider the exhaust layout, select the parts, and fabricate the exhaust system that delivers the best performance for car and particular application. Master engine builder and award-winning writer Mike Mavrigian explains exhaust system principles, function, and components in clear and concise language. He then details how to design, fabricate, and fit exhaust systems to classic street cars as well as for special and racing applications. Air/exhaust-gas flow dynamics and exhaust system design are explained. Cam duration and overlap are also analyzed to determine how an engine breathes in air/fuel, as the exhaust must efficiently manage this burned mixture. Pipe bending is a science as well as art and you're shown how to effectively crush and mandrel bend exhaust pipe to fit your header/manifold and chassis combination. Header tube diameter and length is taken into account, as well as the most efficient catalytic converters and resonators for achieving your performance goals. In addition, Mavrigian covers the special exhaust system requirements for supercharged and turbocharged systems. When building a

high-performance engine, you need a high-performance exhaust system that's tuned and fitted to that engine so you can realize maximum performance. This comprehensive book is your guide to achieving ultimate exhaust system performance. It shows you how to fabricate a system for custom applications and to fit the correct prefabricated system to your car. No other book on the market is solely dedicated to fabricating and fitting an exhaust system in high-performance applications.

Innovation and IPRs in China and India Sep 16 2021 This book examines the two most populous nations on earth - India and China - in an effort to demystify the interaction between intellectual property rights (IPR) regimes, innovation and economic growth by critically looking at the economic and legal realities. In addition, it analyzes the question of how innovation can best be transformed into IPR, and how IPR can best be exploited to encourage innovation. Comparing and contrasting these two giant nations can be highly beneficial as China and India were the two fastest-growing economies in the last three decades, and together their populations make up one third of the world's total population; as such, exploring how to sustain their growth via innovation and commercialization of IPR could have a tremendous positive impact on global well-being. While a study of these two mega countries with such diverse dimensions and magnitudes can never be truly comprehensive, this joint effort by scholars from law, business management and economics disciplines that pursues an empirical approach makes a valuable contribution. Divided into three parts, the first offers an in-depth doctrinal and empirical analysis. The second part exclusively focuses on India, while the last is dedicated to China.

Corporate Saving Behaviour Jul 02 2020 Corporate saving is one of the most significant source of funds for financing corporate growth. It has both micro as well as macro significance. In spite of such dual importance of this decision problem, the theoretical determinants of corporate savings are less well established and this is an area in which very little research has been done so far. The present work is an effort in this direction. The main highlights of the present work in context to General Engineering Industry are : • In general engineering industry, saving decision is considered as a primary decision variable in the firm's policy framework. • Saving decision of firms is primarily governed by profit after tax, a measure of firm's capacity to save. • Previous year's dividend is very often taken into account by firms as an important determinant while framing their saving policy. • Investment demand has a significant influence on the saving decision of firms. • External finance is negatively related to the saving decision of firms. • Increase in interest payment would induce firms to rely more on corporate saving.
