**People of the Book** Oct 11 2020 The Christians that lived around the Arabian Peninsula during Muhammad's lifetime are shrouded in mystery. Some of the stories of the Prophet's interactions with them are based on legends and myths, while others are more authentic and plausible. But who exactly were these Christians? Why did Muhammad interact with them as he reportedly did? And what lessons can today's Christians and Muslims learn from these encounters? Scholar Craig Considine, one of the most powerful global voices speaking in admiration of the prophet of Islam, provides answers to these questions. Through a careful study of works by historians and theologians, he highlights an idea central to Muhammad's vision: an inclusive Ummah, or Muslim nation, rooted in citizenship rights, interfaith dialogue, and freedom of conscience, religion and speech. In this unprecedented sociological analysis of one of history's most influential human beings, Considine offers groundbreaking insight that could redefine Christian and Muslim relations.

[Enemies of the People?](#) Oct 23 2021 Do judges use the power of the state for the good of the nation? Or do they create new laws in line with their personal views? When newspapers reported a court ruling on Brexit, senior judges were shocked to see themselves condemned as enemies of the people. But that did not stop them ruling that an order made by the Queen on the advice of her prime minister was just 'a blank piece of paper'. Joshua Rozenberg, Britain's best-known commentator on the law, asks how judges can maintain public confidence while making hard choices.

**The People** Aug 01 2022 THE SUNDAY TIMES BESTSELLER 'There was nothing extraordinary about my childhood or background. And yet I

looked in vain for any aspect of my family's story when I went to university to read history, and continued to search fruitlessly for it throughout the next decade. Eventually I realised I would have to write this history myself.' What was it really like to live through the twentieth century? In 1910 three-quarters of the population were working class, but their story has been ignored until now. Based on the first-person accounts of servants, factory workers, miners and housewives, award-winning historian Selina Todd reveals an unexpected Britain where cinema audiences shook their fists at footage of Winston Churchill, communities supported strikers, and where pools winners (like Viv Nicholson) refused to become respectable. Charting the rise of the working class, through two world wars to their fall in Thatcher's Britain and today, Todd tells their story for the first time, in their own words. Uncovering a huge hidden swathe of Britain's past, *The People* is the vivid history of a revolutionary century and the people who really made Britain great.

**Women and the People** Apr 04 2020 Based on extensive new research investigating the range of women's involvement in early nineteenth-century popular politics, mid-Victorian reform and the women's movements of the late century, *Women and the People* makes an original intervention in the historiography of the radical tradition by exploring the interconnections of populism, liberalism and feminism. Attending to authorship, the study argues that the representational forms adopted by radicals were as important as the content of what they said in shaping their self-perception, their construction of others, and the reception of their ideas. In fiction, poetry and autobiography, as well as in political writing, speeches and journalism, women reworked radical conventions and imagined new models of political identity, participation and authority. Though, in general, radicals appealed to 'the people', women were often positioned as the suffering objects of reform rather than as the agents of change. By showing how they challenged or reinforced these conceptions of 'women' and 'the people', the book contends that radical women invoked alternative communities of sex, class and nation, and helped to remake and discipline the political sphere, as they strove to make it their own.

*Servants of the People* Jun 30 2022 'Downing Street is said to be 'furious' at this book - and it is easy to understand why. It is the first meticulous chronicle of all that has happened since that bright May Day three years ago which first brought the Blair government to office' Anthony Howard, *Sunday Times*

**The People in Question** Jul 20 2021 Questions of citizenship and the role of constitutions in determining its boundaries are under scrutiny in this judicious and accessible analysis from Jo Shaw. With populism on the rise and debates about immigration intensifying, it draws on examples from around the world to set out the shifting boundaries of state inclusion and exclusion.

*Putin v. the People* Jun 18 2021 A fascinating, bottom-up exploration of contemporary Russian politics that sheds new light on why Putin's grip on power is more fragile than we think What do ordinary Russians think of Putin? Who are his supporters? And why might their support now be faltering? Alive with the voices and experiences of ordinary Russians and elites alike, Sam Greene and Graeme Robertson craft a compellingly original account of contemporary Russian politics. Telling the story of Putin's rule through pivotal episodes such as the aftermath of the "For Fair Elections" protests, the annexation of Crimea, and the War in Eastern Ukraine, Greene and Robertson draw on interviews, surveys, social media data, and leaked documents to reveal how hard Putin has to work to maintain broad popular support, while exposing the changing tactics that the Kremlin has used to bolster his popularity. Unearthing the ambitions, emotions, and divisions that fuel Russian politics, this book illuminates the crossroads to which Putin has led his country and shows why his rule is more fragile than it appears.

**The People of Sparks** Feb 24 2022 When the people of the underground city of Ember follow Lina and Doon to the surface, little prepares them for what they will encounter. Leaving behind the darkness that has been their home for generations, they discover a world of colour, warmth and light. The people of the small village of Sparks seem willing to help them . . . at first . . . but life on the surface has its dark side too. Before long

the villagers of Sparks become more reluctant to share their precious resources with the strange, new underground people. Lina and Doon watch in horror as the differences between the two groups grow into resentment, anger and hate. Somehow they must help overcome the distrust and bring the people of Ember and Sparks together.

**News for All the People: The Epic Story of Race and the American Media** Aug 09 2020 Offers a sweeping account of the class and racial conflicts in the American news media, from the first colonial newspaper to the Internet age. By the co-author of *Harvest of Empire*.

**'To Save the People from Themselves'** Feb 12 2021 A far-reaching re-interpretation of the origins of American judicial review.

**The People's Journal** Mar 16 2021

**Internet for the People** Nov 04 2022 Why is the internet so broken, and what could ever possibly fix it? In *Internet for the People*, leading tech writer Ben Tarnoff offers an answer. The internet is broken, he argues, because it is owned by private firms and run for profit. Google annihilates your privacy and Facebook amplifies right-wing propaganda because it is profitable to do so. But the internet wasn't always like this—it had to be remade for the purposes of profit maximization, through a years-long process of privatization that turned a small research network into a powerhouse of global capitalism. Tarnoff tells the story of the privatization that made the modern internet, and which set in motion the crises that consume it today. The solution to those crises is straightforward: deprivatize the internet. Deprivatization aims at creating an internet where people, and not profit, rule. It calls for shrinking the space of the market and diminishing the power of the profit motive. It calls for abolishing the walled gardens of Google, Facebook, and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives that encode real democratic control. To build a better internet, we need to change how it is owned and organized. Not with an eye towards making markets work better, but towards making them less dominant. Not in order to create a more competitive or more rule-bound version of privatization, but to overturn it. Otherwise, a small number of executives and investors will continue to make choices on everyone's behalf, and these choices will remain tightly bound by the demands of the market. It's time to demand an internet by, and for, the people now.

[Oxford AQA GCSE History \(9-1\): Britain: Health and the People C1000-Present Day Student Book Second Edition](#) Dec 13 2020 Britain: Health and the People c1000-Present Day Student Book Second Edition is part of the Oxford AQA GCSE History series. Updated as part of our commitment to the inclusive presentation of diverse histories and to reflect the world around us, this textbook covers the development of medicine and public health in Britain.

*The People Vs Tech* May 18 2021 **\*\*Winner of the 2019 Transmission Prize\*\*** **\*\*Longlisted for the 2019 Orwell Prize for Political Writing\*\*** 'A superb book by one of the world's leading experts on the digital revolution' David Patrikarakos, *Literary Review* 'This book could not have come at a better moment... The People Vs Tech makes clear that there is still time – just – for us to take back control' - Camilla Cavendish, *Sunday Times* The internet was meant to set us free. Tech has radically changed the way we live our lives. But have we unwittingly handed too much away to shadowy powers behind a wall of code, all manipulated by a handful of Silicon Valley utopians, ad men, and venture capitalists? And, in light of recent data breach scandals around companies like Facebook and Cambridge Analytica, what does that mean for democracy, our delicately balanced system of government that was created long before big data, total information and artificial intelligence? In this urgent polemic, Jamie Bartlett argues that through our unquestioning embrace of big tech, the building blocks of democracy are slowly being removed. The middle class is being eroded, sovereign authority and civil society is weakened, and we citizens are losing our critical faculties, maybe even our free will. *The People Vs Tech* is an enthralling account of how our fragile political system is being threatened by the digital revolution. Bartlett explains that by upholding six key pillars of democracy, we can save it before it is too late. We need to become active citizens; uphold a shared democratic

culture; protect free elections; promote equality; safeguard competitive and civic freedoms; and trust in a sovereign authority. This essential book shows that the stakes couldn't be higher and that, unless we radically alter our course, democracy will join feudalism, supreme monarchies and communism as just another political experiment that quietly disappeared.

Doing Business in the People's Republic of China Dec 01 2019

*Here the People Rule* Feb 01 2020 Most of the essays in this volume have appeared in scholarly journals or in books edited by others. A few are published here for the first time. None has been taken from one of my books. A would-be reader would have to go to much trouble to find them; that is the reason for bringing them together. Collections of essays are frequently miscellanies. This one is not. Except for the final two chapters, all deal with some aspect of the American political system. Some have to do with the structure and functioning of the federal system, others with the nature of public- and incidentally other-organization, and still others with the causes and supposed cures of the social problems that government is nowadays expected to solve or cope with. The two final chapters are about the relationship between economics and political science; for lack of a better term they may be methodological.

Palaces for the People Mar 28 2022 How can we bring people together? Sociologist and best-selling author Eric Klinenberg introduces a transformative and powerfully uplifting new idea for health, happiness, safety and healing our divided, unequal society. 'This wonderful book shows us how democracies thrive' Steven Levitsky & Daniel Ziblatt, authors of *How Democracies Die* Too often we take for granted and neglect our libraries, parks, markets, schools, playgrounds, gardens and communal spaces, but decades of research now shows that these places can have an extraordinary effect on our personal and collective wellbeing. Why? Because wherever people cross paths and linger, wherever we gather informally, strike up a conversation and get to know one another, relationships blossom and communities emerge – and where communities are strong, people are safer and healthier, crime drops and commerce thrives, and peace, tolerance and stability take root. Through uplifting human stories and an illuminating tour through the science of social connection, *Palaces for the People* shows that properly designing and maintaining this 'social infrastructure' might be our single best strategy for a more equal and united society.

**The People of the Parish** Apr 28 2022 "Katherine French puts a human face on the history of the English medieval parish between the end of the fourteenth century and the Reformation."—Carol Davidson-Cragoe, TMR

**Prisms of the People** Sep 02 2022 Grassroots organizing and collective action have always been fundamental to American democracy but have been burgeoning since the 2016 election, as people struggle to make their voices heard in this moment of societal upheaval. Unfortunately much of that action has not had the kind of impact participants might want, especially among movements representing the poor and marginalized who often have the most at stake when it comes to rights and equality. Yet, some instances of collective action have succeeded. What's the difference between a movement that wins victories for its constituents, and one that fails? What are the factors that make collective action powerful? *Prisms of the People* addresses those questions and more. Using data from six movement organizations—including a coalition that organized a 104-day protest in Phoenix in 2010 and another that helped restore voting rights to the formerly incarcerated in Virginia—Hahrie Han, Elizabeth McKenna, and Michelle Oyakawa show that the power of successful movements most often is rooted in their ability to act as "prisms of the people," turning participation into political power just as prisms transform white light into rainbows. Understanding the organizational design choices that shape the people, their leaders, and their strategies can help us understand how grassroots groups achieve their goals. Linking strong scholarship to a deep understanding of the needs and outlook of activists, *Prisms of the People* is the perfect book for our moment—for understanding what's happening and propelling it forward.

**Palaces for the People** Aug 28 2019 "A comprehensive, entertaining, and compelling argument for how rebuilding social infrastructure can help

heal divisions in our society and move us forward.”—Jon Stewart NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR • “Engaging.”—Mayor Pete Buttigieg, The New York Times Book Review (Editors’ Choice) We are living in a time of deep divisions. Americans are sorting themselves along racial, religious, and cultural lines, leading to a level of polarization that the country hasn’t seen since the Civil War. Pundits and politicians are calling for us to come together and find common purpose. But how, exactly, can this be done? In *Palaces for the People*, Eric Klinenberg suggests a way forward. He believes that the future of democratic societies rests not simply on shared values but on shared spaces: the libraries, childcare centers, churches, and parks where crucial connections are formed. Interweaving his own research with examples from around the globe, Klinenberg shows how “social infrastructure” is helping to solve some of our most pressing societal challenges. Richly reported and ultimately uplifting, *Palaces for the People* offers a blueprint for bridging our seemingly unbridgeable divides. **LONGLISTED FOR THE ANDREW CARNEGIE MEDAL FOR EXCELLENCE IN NONFICTION** “Just brilliant!”—Roman Mars, 99% Invisible “The aim of this sweeping work is to popularize the notion of ‘social infrastructure’—the ‘physical places and organizations that shape the way people interact’. . . . Here, drawing on research in urban planning, behavioral economics, and environmental psychology, as well as on his own fieldwork from around the world, [Eric Klinenberg] posits that a community’s resilience correlates strongly with the robustness of its social infrastructure. The numerous case studies add up to a plea for more investment in the spaces and institutions (parks, libraries, childcare centers) that foster mutual support in civic life.”—The New Yorker “*Palaces for the People*—the title is taken from the Scottish-American industrialist and philanthropist Andrew Carnegie’s description of the hundreds of libraries he funded—is essentially a calm, lucid exposition of a centuries-old idea, which is really a furious call to action.”—New Statesman “Clear-eyed . . . fascinating.”—Psychology Today

**The People's Network** Jul 28 2019 The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century, but its monopoly was not inevitable. In the decades around 1900, ordinary citizens—farmers, doctors, small-town entrepreneurs—established tens of thousands of independent telephone systems, stringing their own wires to bring this new technology to the people. Managed by opportunists and idealists alike, these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy. As the Bell empire grew, independents fought fiercely to retain control of their local networks and companies—a struggle with an emerging corporate giant that has been almost entirely forgotten. *The People's Network* reconstructs the story of the telephone's contentious beginnings, exploring the interplay of political economy, business strategy, and social practice in the creation of modern North American telecommunications. Drawing from government documents in the United States and Canada, independent telephone journals and publications, and the archives of regional Bell operating companies and their rivals, Robert MacDougall locates the national debates over the meaning, use, and organization of the telephone industry as a turning point in the history of information networks. The competing businesses represented dueling political philosophies: regional versus national identity and local versus centralized power. Although independent telephone companies did not win their fight with big business, they fundamentally changed the way telecommunications were conceived.

**It Happened in Italy** Nov 23 2021 One woman's discovery-and the incredible, unexpected journey it takes her on-of how her grandparent's small village of Campagna, Italy, helped save Jews during the Holocaust. Take a journey with Elizabeth Bettina as she discovers-much to her surprise-that her grandparent's small village, nestled in the heart of southern Italy, housed an internment camp for Jews during the Holocaust, and that it was far from the only one. Follow her discovery of survivors and their stories of gratitude to Italy and its people. Explore the little known details of how members of the Catholic church assisted and helped shelter Jews in Italy during World War II.

*The People in the Darkness* Jul 08 2020

**Me the People** May 30 2022 Populism suddenly is everywhere, and everywhere misunderstood. Nadia Urbinati argues that populism should be regarded as government based on an unmediated relationship between the leader and those defined as the “good” or “right” people. Mingling history, theory, and current affairs, Urbinati illuminates populism’s tense relation to democracy.

Feeding the People Apr 16 2021 Almost no one knew what a potato was in 1500. Today they are the world's fourth most important food. How did this happen?

The People's Tribune Jun 26 2019

**Russia, 1762-1825** May 06 2020 Details the state of Russian military power from 1762-1825 in light of the military at large, the government, and the peoples of Russia. Several chapters discuss impacts of the military and their funding on agriculture and industry, other peoples, and countries as well as cost against the Russians themselves.

**Discover Your Subpersonalities** Sep 21 2021 Have you ever felt there is more than one you? That sometimes you are one type of person, sometimes another? Do you ever find yourself saying `yes' when you meant to say `no'? Or deciding to do one thing, then actually doing another? Most of us have had this experience of another personality taking us over, causing us to behave in an unintended way. Why do we do it? What's going on? Well known psychologist and writer John Rowan shows how each of us is made up of a number of `subpersonalities'. Some may help us, some may hinder us. If we want to be in charge of our inner world we had better find out who they are and what they do. John Rowan has written this book specifically to enable you to do this. Lively and entertaining, with questionnaires and simple exercises, Discover Your Subpersonalities will enable you to get to know the people inside you!

**Jamaica** Aug 21 2021 Explores how the history, climate, and geography of Jamaica have shaped the customs and practices of its people, looking at daily life in both the city and the country.

*The People and the Nation* Dec 25 2021 The edited book brings together country experts on populism, ethno-territorial politics, and party competition. It consists of twelve empirical chapters, covering seven Western European states (Austria, Belgium, France, Italy, Spain, Switzerland, and the UK) as well as four Central European states (Croatia, Hungary, Serbia, and Poland). It is a collaboration by scholars from across Europe which contributes to the growing literature on populism by focusing on a relatively unexplored research agenda: the intersection of territoriality, ethno-politics, and populism. Presenting an original perspective contributing experts use case studies to highlight the territorial dimension of populism in different ways and identify that a deeper understanding of the interactions between populist actors and ethno-territorial ideologies is required. This book will be of interest to academics, researchers, and students of European politics, populism, and ethno-territorial politics.

**I Am the People** Sep 09 2020 The forms of liberal government that emerged after World War II are in the midst of a profound crisis. In *I Am the People*, Partha Chatterjee reconsiders the concept of popular sovereignty in order to explain today’s dramatic outburst of movements claiming to speak for “the people.” To uncover the roots of populism, Chatterjee traces the twentieth-century trajectory of the welfare state and neoliberal reforms. Mobilizing ideals of popular sovereignty and the emotional appeal of nationalism, anticolonial movements ushered in a world of nation-states while liberal democracies in Europe guaranteed social rights to their citizens. But as neoliberal techniques shrank the scope of government, politics gave way to technical administration by experts. Once the state could no longer claim an emotional bond with the people, the ruling bloc lost the consent of the governed. To fill the void, a proliferation of populist leaders have mobilized disaffected groups into a battle that they define as the authentic people against entrenched oligarchy. Once politics enters a spiral of competitive populism, Chatterjee cautions, there is no easy return to pristine liberalism. Only a counter-hegemonic social force that challenges global capital and facilitates the equal participation of all

peoples in democratic governance can achieve significant transformation. Drawing on thinkers such as Antonio Gramsci, Michel Foucault, and Ernesto Laclau and with a particular focus on the history of populism in India, *I Am the People* is a sweeping, theoretically rich account of the origins of today's tempests.

*The people approve, 1936* Jan 02 2020

*Saving the People* Jan 26 2022 Critical look at the new wave of right-wing populist movements that are using religion to mobilise people. Western democracies are experiencing a new wave of right-wing populism that seeks to mobilise religion for its own ends. With chapters on the United States, Britain, France, Italy, Austria, the Netherlands, Poland and Israel, *Saving the People* asks how populist movements have used religion for their own ends and how church leaders react to them. The authors contend that religion is more about belonging than belief for populists, with religious identities and traditions being deployed to define who can and cannot be part of 'the people'. This in turn helps many populists to claim that native Christian communities are being threatened by a creeping and highly aggressive process of Islamisation, with Muslims becoming a key 'enemy of the people'. While Church elites generally condemn this instrumental use of religions, populists take little heed, presenting themselves as the true saviours of the people. The policy implications of this phenomenon are significant, which makes this book all the more timely and relevant to current debate.

**Enemies of the People** Oct 03 2022 Something has gone wrong. We're living in an age of celebratory racism, extreme inequality, uncertainty and fear. We're governed by people who claim to be populist but who seem to hate everyone. There are idiots at the wheel and we're heading for a cliff in a big red bus and no one knows how to save us.

*The People of Roman Britain* Nov 11 2020

**Power to the People** Mar 04 2020 *Power to the People* examines the varied but interconnected relationships between energy consumption and economic development in Europe over the last five centuries. It describes how the traditional energy economy of medieval and early modern Europe was marked by stable or falling per capita energy consumption, and how the First Industrial Revolution in the eighteenth century--fueled by coal and steam engines--redrew the economic, social, and geopolitical map of Europe and the world. The Second Industrial Revolution continued this energy expansion and social transformation through the use of oil and electricity, but after 1970 Europe entered a new stage in which energy consumption has stabilized. This book challenges the view that the outsourcing of heavy industry overseas is the cause, arguing that a Third Industrial Revolution driven by new information and communication technologies has played a major stabilizing role. *Power to the People* offers new perspectives on the challenges posed today by climate change and peak oil, demonstrating that although the path of modern economic development has vastly increased our energy use, it has not been a story of ever-rising and continuous consumption. The book sheds light on the often lengthy and complex changes needed for new energy systems to emerge, the role of energy resources in economic growth, and the importance of energy efficiency in promoting growth and reducing future energy demand.
