The School Room Guide to Methods of Teaching and School Management Sep 28 2019

Evolutionary Economic Geography Sep 20 2021 Economic geographers increasingly consider the significance of history in shaping the contemporary socio-economic landscape, and increasingly believe that experiences and competencies, acquired over time by individuals and entities in particular localities, to a large degree determine present configurations as well as future regional trajectories. Attempts to trace, understand, and investigate the pathways from past to present have given rise to the thriving and exciting sub-field of Evolutionary Economic Geography (EEG). EEG highlights the important factors that initiate, inhibit, or consolidate the contextual settings and relationships in which regions and their respective agents, which comprise and shape economic activity and social reproduction, change over time. It has at its core the production and destruction of novelty in space, and the links between innovation and regional economic fortunes. The creation of knowledge, its movement and recombination within different regional ensembles of economic agents and institutions plays a critical role in the evolution of the space-economy. EEG provides a framework to disentangle the complexity of technological change and regional economic development based on a variety of theoretical and methodological approaches. In only a short time, EEG has established itself as a promising and rapidly evolving research framework with its focus on the driving forces of regional development across various scales and its attempt to translate findings into public policy. This book advances the theoretical foundations of EEG, and demonstrates how EEG utilises and operationalises conceptual frameworks, both established and new. Contributions also point to future research avenues and extensions of EEG, attempting to build stronger ties between theory, empirical evidence, and relevance to policy. This book was originally published as a special issue of Regional Studies.

Learning Primary Geography Nov 30 2019 Learning Primary Geography: Ideas and inspiration from classrooms celebrates children's learning in primary geography. It is a book for all student and practising teachers who would like children to learn about their world in an enjoyable and stimulating way. Every page presents inspiring examples of children's learning, and explains how and why creative approaches such as enquiry learning, learning outside the classroom, and using imaginative resources work so well in primary geography. Using illustrated case studies from a range of schools and classrooms, each chapter showcases the fantastic work all children can do in primary geography. The book explores a wide variety of geographical learning, with chapters focusing on key aspects of the subject, including: primary geography through the school grounds topical geography through issues and events learning about places in primary geography children's agency and action through primary geography Throughout the chapters, the role of primary geography in helping children develop all types of literacies, including spatial, critical and digital literacies, is explored. Written by a highly experienced teacher and lecturer in education, Learning Primary Geography is underpinned and illustrated by examples from a wide range of primary classrooms. It will be a source of support, guidance and inspiration for all those teaching geography in the primary school.
