**Beginning JSON** Sep 21 2019 Beginning JSON is the definitive guide to JSON - JavaScript Object Notation - today's standard in data formatting for the web. The book starts with the basics, and walks you through all aspects of using the JSON format. Beginning JSON covers all areas of JSON from the basics of data formats to creating your own server to store and retrieve persistent data. Beginning JSON provides you with the skill set required for reading and writing properly validated JSON data. The first two brief chapters of the book contain the foundations of JavaScript as it relates to JSON, and provide the necessary understandings for later chapters. Chapters 3 through 12 reveal what data is, how to convert that data into a transmittable/storable format, how to use AJAX to send and receive JSON, and, lastly, how to reassemble that data

back into a proper JavaScript object to be used by your program. The final chapters put everything you learned into practice.

## **Proceedings 2005 Symposium on Document Image Understanding Technology**

Apr 21 2022

Joomla for Developers Jul 20 2019 Joomla is a free, open source CMS (Content Management System) written in PHP. There are about 90 million downloads worldwide. Joomla can help you developing great web applications in a very short time. Joomla is fast and reliable, fully compatible with PHP 7.1, and you can edit the pages directly from the frontend. More intuitive than other CMSs, Joomla is used by Harvard University, Linux, MTV, UNRIC (United Nations), and many others. This book will help you to install & customize Joomla, with your own code. You'll learn the basics of many programming languages essential to build your application. Many tools are discussed to facilitate your development & debug, and you can download sample applications discussed in the book.

*Automating Junos Administration* Jan 26 2020 How can you grow and maintain a reliable, flexible, and cost-efficient network in the face of ever-increasing demands? With this practical guide, network engineers will learn how to program Juniper network devices to perform day-to-day tasks, using the automation features of the Junos OS. Junos supports several automation tools that provide powerful solutions to common network automation tasks. Authors Jonathan Looney and Stacy Smith, senior testing engineers at Juniper, will help you determine which tools work best for your particular network requirements. If you have experience with Junos, this book will show you how automation can make a big difference in the operation of your existing network. Manage Junos software with remote procedure calls and a RESTful API Represent devices as Python objects and manage them with Python's PyEZ package Customize Junos software to detect and block commits that violate your network standards Develop custom CLI commands to present information the way you want Program Junos software to automatically respond to network events Rapidly deploy new Junos devices into your network with ZTP and Netconify tools Learn how to use Ansible or Puppet to manage Junos software

Learning Alfresco Web Scripts Mar 20 2022 If you are an Alfresco developer who has no experience with web scripts and you want to start developing Alfresco web scripts, then this book is definitely for you.

**Guide to OCR for Arabic Scripts** Jul 24 2022 This Guide to OCR for Arabic Scripts is the first book of its kind, specifically devoted to this emerging field. Topics and features: contains contributions from the leading researchers in the field; with a Foreword by Professor Bente Maegaard of the University of Copenhagen; presents a detailed overview of Arabic character recognition technology, covering a range of different aspects of pre-processing and feature extraction; reviews a broad selection of varying approaches, including HMM-based methods and a recognition system based on multidimensional recurrent neural networks; examines the evaluation of Arabic script recognition systems, discussing data collection and annotation, benchmarking

strategies, and handwriting recognition competitions; describes numerous applications of Arabic script recognition technology, from historical Arabic manuscripts to online Arabic recognition.

**JavaScript in easy steps, 6th edition** Feb 25 2020 JavaScript in easy steps, 6th edition instructs the user how to create exciting web pages that employ the power of JavaScript to provide functionality. You need have no previous knowledge of any scripting language so it's ideal for the newcomer to JavaScript. By the end of this book you will have gained a sound understanding of JavaScript and be able to add exciting dynamic scripts to your own web pages. JavaScript in easy steps, 6th edition begins by explaining how to easily incorporate JavaScript code in an HTML document. Examples demonstrate how to use built-in JavaScript functions to work with Math, date and time, random numbers, cookies, text strings, and elements of web pages via the Document Object Model (DOM). You will learn how JavaScript is used with HTML submission forms and how JavaScript Object Notation (JSON) is used for asynchronous browser-server communication. The book examples provide clear syntax-highlighted code showing how to create behaviors for an HTML document to endow components with interactive functionality, to illustrate each aspect of JavaScript. JavaScript in easy steps, 6th edition has an easy-to-follow style that will appeal to anyone who wants to add functionality to their web pages. It will appeal to programmers who want to quickly add JavaScript to their skills set, and to the student who is studying website design at school or college, and to those seeking a career in web development who need an understanding of client-side scripting. Fully updated since the previous edition, which was published in 2013. Table of Contents: 1. Get Started in JavaScript 2. Perform Useful Operations 3. Manage the Script Flow 4. Use Script Objects 5. Control Numbers and Strings 6. Address the Window Object 7. Interact with the Document 8. Create Web Applications 9. Produce Script Magic

Computer Networks and Information Technologies Aug 01 2020 This book constitutes the refereed proceedings of the Second International Conference on Advances in Communication, Network, and Computing, CNC 2011, held in Bangalore, India, in March 2011. The 41 revised full papers, presented together with 50 short papers and 39 poster papers, were carefully reviewed and selected for inclusion in the book. The papers feature current research in the field of Information Technology, Networks, Computational Engineering, Computer and Telecommunication Technology, ranging from theoretical and methodological issues to advanced applications.

*JavaScript* Oct 27 2022 A guide for experienced programmers demonstrates the core JavaScript language, offers examples of common tasks, and contains an extensive reference to JavaScript commands, objects, methods, and properties.

Accelerated DOM Scripting with Ajax, APIs, and Libraries May 10 2021 If you're a web developer with previous JavaScript and DOM scripting experience, Pro DOM Scripting with Ajax, APIs, and Libraries is perfect for you to take your knowledge up to the next level. It provides a thorough walkthrough of all the fundamentals needed to build effective dynamic web applications. The first part of the book focuses on

methodology and technologies for rapid development with JavaScript, including OOP and events, but also Ajax frameworks and JavaScript libraries. The second part includes three complete projects for you to learn from: form validation, mashups, and UI design.

**Guide to OCR for Indic Scripts** Apr 09 2021 This is the first comprehensive text on Optical Character Recognition for Indic scripts. It covers many topics and describes OCR systems for eight different scripts—Bangla, Devanagari, Gurmukhi, Gujarti, Kannada, Malayalam, Tamil and Urdu.

Professional JavaScript for Web Developers Jul 12 2021 Update your skill set for ES 6 and 7 with the ultimate JavaScript guide for pros Professional JavaScript for Web Developers is the essential guide to next-level JavaScript development. Written for intermediate-to-advanced programmers, this book jumps right into the technical details to help you clean up your code and become a more sophisticated JavaScript developer. From JavaScript-specific object-oriented programming and inheritance, to combining JavaScript with HTML and other markup languages, expert instruction walks you through the fundamentals and beyond. This new fourth edition has been updated to cover ECMAScript 6 and 7 (also known as ES2015 and ES2016) and the major re-imagination and departure from ES 5.1; new frameworks and libraries, new techniques, new testing tools, and more are explained in detail for the professional developer, with a practical focus that helps you put your new skills to work on real-world projects. The latest—and most dramatic—ES release is already being incorporated into JavaScript engines in major browsers; this, coupled with the rise in mobile web traffic increasing demand for responsive, dynamic web design, means that all web developers need to update their skills—and this book is your ideal resource for quick, relevant guidance. Get up to date with ECMAScript 6 and 7, new frameworks, and new libraries Delve into web animation, emerging APIs, and build systems Test more effectively with mocks, unit tests, functional tests, and other tools Plan your builds for future ES releases Even if you think you know JavaScript, new ES releases bring big changes that will affect the way you work. For a professional-level update that doesn't waste time on coding fundamentals, Professional JavaScript for Web Developers is the ultimate resource to bring you up to speed.

Step-by-step Guide to Google Apps Script 4 - Documents Aug 25 2022 Do you want to learn how to create documents automatically with Google Apps Script? This book shows you step-by-step how to use Apps Script to supercharge GOOGLE DOCS. Every chapter contains a practical example of using Apps Script to create a wide range of documents, such as, invoices, sales quotes, student reports, and conference talk information. It starts with relatively simple applications, like a master document copier which uses a Google Form to learning how to create web apps and making your own HTML forms to be able to email PDFs to potential customers. Each example builds on the previous ones so you get to understand how to use the Document Service well. As this is the fourth book in the series on Apps Script, it does assume a basic knowledge of Apps Script, JavaScript, and a little HTML. That said, every bit of code is explained

with links provided to example Form, Sheet, and Document files. Tested using the new V8 runtime and updated using the new Script editor. Contents Document Service Overview Chapter 1 - Creating a Google Doc from a form submission Chapter 2 - Master document copier Chapter 3 - Edit a document template using placeholders Chapter 4 - Making an invoice with multiple items Chapter 5 - Making a document from scratch Chapter 6 - Making student reports with progress bars Chapter 7 - Emailing reports as a PDF or as a link Chapter 8 - Create multiple reports in one document Chapter 9 - Email specific conference information Chapter 10 - Sending conference info via a web app Chapter 11 - Update document from data on the web Links to all the complete scripts and example files Updated 2021

**Mastering Front-End Web Development (HTML, Bootstrap, CSS, SEO, Cordova, SVG, ECMAScript, JavaScript, WebGL, Web Design and many more.)** Mar 28 2020 As opposed to back-end web development which deals with servers, front-end web development focuses on the end users' interactions with a website on a browser. A skillful front-end web developer knows more than just the basics of HTML, CSS and JavaScript. Going beyond the major web-based languages, this book represents an attempt to compile all the knowledge needed to become a professional front-end web developer. The reader will be introduced to more than 200 web extensions, frameworks, tools, and libraries, along with a complete illustration of all Web APIs known to the world today. Overview: Chapter 1: Development Environments Chapter 2: HTML 5.2 Chapter 3: Bootstrap 5 Chapter 4: CSS 3 Chapter 5: SEO Chapter 6: Cordova Chapter 7: SVG Chapter 8: ECMAScript 2020 / ES11 Chapter 9: HTML DOM Chapter 10: Advanced Web APIs Chapter 11: jQuery 3.5 Chapter 12: Extensions and Tools Chapter 13: Canvas Chapter 14: WebGL \*\* special note: this book partially overlaps with two books by the same author: 1) Web Coding Bible (18 Books in 1) 2) An Effective Guide to Modern JavaScript (ECMAScript 2017 / ES8)

*Intelligent Computing, Communication and Devices* Apr 28 2020 In the history of mankind, three revolutions which impact the human life are tool-making revolution, agricultural revolution and industrial revolution. They have transformed not only the economy and civilization but the overall development of the human society. Probably, intelligence revolution is the next revolution, which the society will perceive in the next 10 years. ICCD-2014 covers all dimensions of intelligent sciences, i.e. Intelligent Computing, Intelligent Communication and Intelligent Devices. This volume covers contributions from Intelligent Computing, areas such as Intelligent and Distributed Computing, Intelligent Grid & Cloud Computing, Internet of Things, Soft Computing and Engineering Applications, Data Mining and Knowledge discovery, Semantic and Web Technology, and Bio-Informatics. This volume also covers paper from Intelligent Device areas such as Embedded Systems, RFID, VLSI Design & Electronic Devices, Analog and Mixed-Signal IC Design and Testing, Solar Cells and Photonics, Nano Devices and Intelligent Robotics.

High Performance JavaScript Jun 11 2021 Presents information on building faster, interactive Web application interfaces with JavaScript.

*AdvancED DOM Scripting* Oct 15 2021 DOM Scripting is a vital technique for web developers and designers to learn and master in order to add such dynamic web applications as animations, maps, drag and drop, and more. This book offers comprehensive coverage of advanced DOM Scripting techniques and reads like a wish list of must have dynamic web application features, including visual effects using JavaScript libraries, Ajax, Mashups using APIs, and much more. It follows in the footsteps of Jeremy Keith's acclaimed book, *DOM Scripting* (friends of ED: 1590595335, 2005), helping you master the next level with countless real world tutorials.

*Beginning JavaScript with DOM Scripting and Ajax* Sep 02 2020 Beginning JavaScript with DOM Scripting and Ajax is an essential resource for modern JavaScript programming. This completely updated second edition covers everything you need to know to get up-to-speed with JavaScript development and add dynamic enhancements to web pages, right from the basics. As well as focusing on client-side JavaScript, you will also learn how to work with the Browser Object Model, the Document Object Model (DOM), how to use XML and JSON as well as communicate with service side scripts such as PHP. Find out how to: Construct good JavaScript syntax following modern coding practices Use JavaScript to communicate with the server and retrieve data Dynamically manipulate markup, validate forms and deal with images Debug applications using features inside the browser JavaScript is one of the most important technologies on the web. It provides the means to add dynamic functionality to your web pages and serves as the backbone of Ajax-style web development. Beginning JavaScript with DOM Scripting and Ajax will take you from being a JavaScript novice to work freely with this important technology - begin your JavaScript journey today! What you'll learn What functions, variables, events and objects are and how to use them. How build a site that will still work in the case that JavaScript is turned off. How to access and update part of the page using code. How to use JavaScript to communicate with the server and retrieve data. How to use JavaScript to for form validation and user feedback. How to use Third-Party Libraries like jQuery. Who this book is for Beginning JavaScript with DOM Scripting and Ajax is for the person who has a good grasp of HTML and CSS but wants to add JavaScript to their skillset. If you want to learn some basic programming concepts, have experience but need help updating your skills, or you're coming from another language, Beginning JavaScript with DOM Scripting and Ajax can help. Table of Contents Getting Started with JavaScript Data and Decisions From DHTML to DOM Scripting HTML5 and JavaScript Presentation and Behavior (CSS and Event Handling) Common Uses of JavaScript: Image and Windows JavaScript and User Integration: Navigation and Forms Back-End Interaction with Ajax and Node.js Data Validation Techniques Modern JavaScript Case Study: A Dynamic Gallery Using Third-Party JavaScript Appendix A: Debugging JavaScript

XSS Attacks Aug 13 2021 A cross site scripting attack is a very specific type of attack on a web application. It is used by hackers to mimic real sites and fool people into

providing personal data. XSS Attacks starts by defining the terms and laying out the ground work. It assumes that the reader is familiar with basic web programming (HTML) and JavaScript. First it discusses the concepts, methodology, and technology that makes XSS a valid concern. It then moves into the various types of XSS attacks, how they are implemented, used, and abused. After XSS is thoroughly explored, the next part provides examples of XSS malware and demonstrates real cases where XSS is a dangerous risk that exposes internet users to remote access, sensitive data theft, and monetary losses. Finally, the book closes by examining the ways developers can avoid XSS vulnerabilities in their web applications, and how users can avoid becoming a victim. The audience is web developers, security practitioners, and managers. XSS Vulnerabilities exist in 8 out of 10 Web sites The authors of this book are the undisputed industry leading authorities Contains independent, bleeding edge research, code listings and exploits that can not be found anywhere else

*DOM Scripting* Nov 16 2021 With this second edition of the popular *DOM Scripting: Web Design with JavaScript and the Document Object Model* comes a modern revision to update best practices and guidelines. It includes full coverage of HTML5 in a new, dedicated chapter, and details on JavaScript libraries and how they can help your scripting. The book provides everything you'll need to start using JavaScript and the Document Object Model to enhance your web pages with client-side dynamic effects and user-controlled animation. It shows how JavaScript, HTML5, and Cascading Style Sheets (CSS) work together to create usable, standards-compliant web designs. We'll also cover cross-browser compatibility with DOM scripts and how to make sure they degrade gracefully when JavaScript isn't available. *DOM Scripting: Web Design with JavaScript and the Document Object Model* focuses on JavaScript for adding dynamic effects and manipulating page structure on the fly using the Document Object Model. You'll start with a crash course in JavaScript and the DOM, then move on to several real-world examples that you'll build from scratch, including dynamic image galleries and dynamic menus. You'll also learn how to manipulate web page styles using the CSS DOM, and create markup on the fly. If you want to create websites that are beautiful, dynamic, accessible, and standards-compliant, this is the book for you!

**JavaScript Tutorials - Herong's Tutorial Examples** May 22 2022 This book is a collection of tutorial examples and notes written by the author while he was learning JavaScript. Topics include ECMAScript specifications; data types, variables and expressions; flow control statements: 'if', 'for', 'switch', and 'while'; using arrays and objects; defining and calling functions; embedding JavaScript code in HTML documents; DOM (Document Object Model) API levels; using the JavaScript console in Web browsers; creating new object types with prototypes; building prototype inheritance hierarchy; managing functions as objects; jrunscript JavaScript shell. Updated in 2022 (Version 2.32) with minor changes. For latest updates and free sample chapters, visit <https://www.herongyang.com/JavaScript>.

**JavaScript: The Web Warrior Series** Mar 08 2021 Now in its sixth edition, JAVASCRIPT guides beginning programmers through web application development

using the JavaScript programming language. As with previous editions of the book, the authors introduce key web authoring techniques with a strong focus on industry application. New coverage includes developing for touchscreen and mobile devices, and using the jQuery library. A real-world project, similar to what students would encounter in a professional setting, is developed chapter by chapter. Because professional web development jobs often require programmers to add features to existing sites, each chapter project uses a professionally designed web site. After completing a course using this textbook, students will be able to use JavaScript to build professional quality, dynamic web sites. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

*Computer Security and the Internet* Oct 23 2019 This book provides a concise yet comprehensive overview of computer and Internet security, suitable for a one-term introductory course for junior/senior undergrad or first-year graduate students. It is also suitable for self-study by anyone seeking a solid footing in security – including software developers and computing professionals, technical managers and government staff. An overriding focus is on brevity, without sacrificing breadth of core topics or technical detail within them. The aim is to enable a broad understanding in roughly 350 pages. Further prioritization is supported by designating as optional selected content within this. Fundamental academic concepts are reinforced by specifics and examples, and related to applied problems and real-world incidents. The first chapter provides a gentle overview and 20 design principles for security. The ten chapters that follow provide a framework for understanding computer and Internet security. They regularly refer back to the principles, with supporting examples. These principles are the conceptual counterparts of security-related error patterns that have been recurring in software and system designs for over 50 years. The book is “elementary” in that it assumes no background in security, but unlike “soft” high-level texts it does not avoid low-level details, instead it selectively dives into fine points for exemplary topics to concretely illustrate concepts and principles. The book is rigorous in the sense of being technically sound, but avoids both mathematical proofs and lengthy source-code examples that typically make books inaccessible to general audiences. Knowledge of elementary operating system and networking concepts is helpful, but review sections summarize the essential background. For graduate students, inline exercises and supplemental references provided in per-chapter endnotes provide a bridge to further topics and a springboard to the research literature; for those in industry and government, pointers are provided to helpful surveys and relevant standards, e.g., documents from the Internet Engineering Task Force (IETF), and the U.S. National Institute of Standards and Technology.

**Proceedings 2003 Symposium on Document Image Understanding Technology** Sep 14 2021

**HTML, CSS & JavaScript in easy steps** Oct 03 2020 Everything you need to get to grips with HTML, CSS and JavaScript – the three coding languages that are used to

create modern web pages – all in easy steps! HTML, CSS & JavaScript in easy steps instructs the reader on each of the three coding languages that are used to create modern web pages; HyperText Markup Language (HTML) tags are used to control the structure of web page content, Cascading Style Sheets (CSS) rules are used to determine how web page content appears, and JavaScript functions are used to provide web page interactivity. HTML, CSS & JavaScript in easy steps contains examples and screenshots that illustrate each feature of all three coding languages. You'll learn how to create web pages to display text, images, lists, tables, hyperlinks, forms, audio, and video. Each chapter builds your knowledge so by the end of the book you'll have gained a sound understanding of HTML markup, CSS rules and JavaScript functions. HTML, CSS & JavaScript in easy steps has an easy-to-follow style that will appeal to anyone who wants to create great functional web pages. It will appeal to programmers who want to quickly add web page coding to their skills set, and to the student who is studying website design at school or college, and to those seeking a career in web development. Table of Contents: 1. Get Started in HTML 2. Manage Page Content 3. Insert Hyperlinks 4. Arrange Page Sections 5. Write Lists and Tables 6. Embed Media Content 7. Create Input Forms 8. Get Started in CSS 9. Manage the Box Model 10. Manipulate Text Styles 11. Organize Tables and Lists 12. Generate Effects 13. Control the Web Page 14. Design with Grids 15. Get Started in JavaScript 16. Perform Useful Operations 17. Manage the Script Flow 18. Use Script Objects 19. Control Numbers and Strings 20. Address the Window Object 21. Interact with the Document

**JavaScript: The Definitive Guide** Nov 04 2020 A revised and updated edition offers comprehensive coverage of ECMAScript 5 (the new JavaScript language standard) and also the new APIs introduced in HTML5, with chapters on functions and classes completely rewritten and updated to match current best practices and a new chapter on language extensions and subsets

**Soft Computing Techniques in Vision Science** Jan 18 2022 This Special Edited Volume is a unique approach towards Computational solution for the upcoming field of study called Vision Science. From a scientific firmament Optics, Ophthalmology, and Optical Science has surpassed an Odyssey of optimizing configurations of Optical systems, Surveillance Cameras and other Nano optical devices with the metaphor of Nano Science and Technology. Still these systems are falling short of its computational aspect to achieve the pinnacle of human vision system. In this edited volume much attention has been given to address the coupling issues Computational Science and Vision Studies. It is a comprehensive collection of research works addressing various related areas of Vision Science like Visual Perception and Visual system, Cognitive Psychology, Neuroscience, Psychophysics and Ophthalmology, linguistic relativity, color vision etc. This issue carries some latest developments in the form of research articles and presentations. The volume is rich of contents with technical tools for convenient experimentation in Vision Science. There are 18 research papers having significance in an array of application areas. The volume claims to be an effective compendium of computing developments like Frequent Pattern Mining, Genetic

Algorithm, Gabor Filter, Support Vector Machine, Region Based Mask Filter, 4D stereo camera systems, Principal Component Analysis etc. The detailed analysis of the papers can immensely benefit to the researchers of this domain. It can be an Endeavour in the pursuit of adding value in the existing stock of knowledge in Vision Science.

**Document Analysis Systems VII** Sep 26 2022 This book constitutes the refereed proceedings of the 7th International Conference on Document Analysis Systems, DAS 2006, held in Nelson, New Zealand, in February 2006. The 33 revised full papers and 22 poster papers presented were carefully reviewed and selected from 78 submissions. The papers are organized in topical sections on digital libraries, image processing, handwriting, document structure and format, tables, language and script identification, systems and performance evaluation, and retrieval and segmentation.

**Professional JavaScript for Web Developers** Dec 17 2021 Three years after the first edition of this book was released, there have been several advances in the techniques and technology of JavaScript in the browser. This Second Edition has been thoroughly updated to include the latest versions of all web browsers. The book also introduces newer techniques and related technologies such as canvas, E4X, and JavaScript 2.0. Setting the stage by covering JavaScript in HTML, the book then explores the core of JavaScript, ECMAScript, to give you an understanding of the language's basic syntax, data types, statements, and memory management.

**JAVASCRIPT Programming** Dec 05 2020 This book brings for you all of knowledge you need to start multi-thread, FILE IO programming from basic to advance by JAVA language. Just by 19 LESSONS, you can analysis easily a game include: - Creating a new Thread - Thread Scheduling and Priority - Multithreading issues in Swing Applications - Thread Pool, Executor, Callable/Future - Avoid deadLock and how to make data synchronization - File and Directory - File I/O Basic to Advance There are many examples & case studies for the practice of programming. Let's enjoy it!

*JavaScript Developer's Dictionary* Feb 19 2022 JavaScript, and each different version of JavaScript, interacts differently with each variety of Web browser, leaving Web developers scrambling to write code that will work in all the major browsers.

"JavaScript Developer's Dictionary" brings all these variants into one volume, breaking down every object in the JavaScript language and how it applies to each browser.

**JavaScript in 10 Simple Steps or Less** Jun 18 2019 If you are looking to add exciting interactivity to Web pages and need a quick and easy understanding of the technology in order to do so, then this book is for you-whether you're new to JavaScript or you need a refresher on every-thing from validating user input forms to creating menu trees. Open the book and you'll discover clear, easy-to-follow instructions for more than 250 key JavaScript tasks, each presented in ten quick steps-or less. Easy-to-navigate pages, lots of screen shots, and to-the-point directions guide you through every common (and not so common) JavaScript challenge-and help you get more done in less time. \* Each solution is ten steps-or less-to help you get the job done fast \* Self-contained two-page spreads deliver the answers you need-without flipping pages \* A no-fluff approach focuses on helping you achieve results \* A resource packed with useful and fun ways

to get the most out of JavaScript \* Make it simple and get productive fast!- download ready-to-use source code for each task from the book's companion Web site

*Recent Trends in Image Processing and Pattern Recognition* Aug 21 2019 This three-book set constitutes the refereed proceedings of the Second International Conference on Recent Trends in Image Processing and Pattern Recognition (RTIP2R) 2018, held in Solapur, India, in December 2018. The 173 revised full papers presented were carefully reviewed and selected from 374 submissions. The papers are organized in topical sections in the three volumes. Part I: computer vision and pattern recognition; machine learning and applications; and image processing. Part II: healthcare and medical imaging; biometrics and applications. Part III: document image analysis; image analysis in agriculture; and data mining, information retrieval and applications.

**DOM Scripting** Jun 23 2022 \* Most JavaScript books are very long-winded, boring, and developer-oriented – this one provides a quick and easy reference for those who are not code experts, but want to quickly learn and take advantage of JavaScript/DOM to add cool functionality to their web sites. \* Shows readers how to build several real world projects. \* All examples are fiercely standards compliant and up-to-date.

**Proceedings Second International Conference on Information Processing** Dec 25 2019 The proceedings features several key-note addresses in the areas of advanced information processing tools. This area has been recognized to be one of the key five technologies poised to shape the modern society in the next decade. It aptly focuses on the tools and techniques for the development of Information Systems. Emphasis is on pattern recognition and image processing, software engineering, mobile ad hoc networks, security aspects in computer networks, signal processing and hardware synthesis, optimization techniques, data mining and information processing.

**DOM Enlightenment** Nov 23 2019 "With DOM enlightenment, you'll learn to manipulate HTML more efficiently by scripting the Document Object Model (DOM) without a DOM library. Using code examples in cookbook style, author Cody Lindley (jQuery Cookbook) walks you through modern DOM concepts to demonstrate how various node objects work. Over the past decade, developers have buried the DOM under frameworks that simplify its use. This book brings these tools back into focus, using concepts and code native to modern browsers. You'll understand the role jQuery plays in DOM scripting, and learn how to use the DOM directly in applications for mobile devices and specific browsers that require low overhead." --Page 4 de la couverture.

**Computer Vision and Information Technology** Feb 07 2021 Spread in 133 articles divided in 20 sections the present treatises broadly discusses: Part 1: Image Processing Part 2: Radar and Satellite Image Processing Part 3: Image Filtering Part 4: Content Based Image Retrieval Part 5: Color Image Processing and Video Processing Part 6: Medical Image Processing Part 7: Biometric Part 8: Network Part 9: Mobile Computing Part 10: Pattern Recognition Part 11: Pattern Classification Part 12: Genetic Algorithm Part 13: Data Warehousing and Mining Part 14: Embedded System Part 15: Wavelet Part 16: Signal Processing Part 17: Neural Network Part 18: Nanotechnology

and Quantum Computing Part 19: Image Analysis Part 20: Human Computer Interaction

**Advanced Computing and Systems for Security: Volume 13** May 30 2020 This book features extended versions of selected papers that were presented and discussed at the 8th International Doctoral Symposium on Applied Computation and Security Systems (ACSS 2021), held in Kolkata, India, on April 9-10, 2021. Organized by the Departments of Computer Science & Engineering and A.K. Choudhury School of Information Technology at the University of Calcutta, the symposiums international partners were Ca' Foscari University of Venice, Italy, and Bialystok University of Technology, Poland. The topics covered include biometrics, image processing, pattern recognition, algorithms, cloud computing, wireless sensor networks, and security systems, reflecting the various symposium sessions.

*JavaScript for Indesign, 2nd Edition* Jan 06 2021 Learn how to automate tasks in Adobe InDesign using JavaScript (and ExtendScript) with this guide that covers the fundamentals and beyond. Explore the InDesign Object Model and how to build page objects, style text, manipulate tables and frames. This is the essential guide for anyone who wants to get started with scripting InDesign.

**Mastering HTML and XHTML** Jun 30 2020 Master the Core of All Web Development—And Prepare for the Future Mastering HTML and XHTML is the most complete, up-to-date book on the core language of the Web. You'll learn everything you need to know about coding web pages in both HTML and XHTML, the latest, more powerful version of HTML. But it doesn't stop there. You also get practical instruction in complementary web technologies such as JavaScript, CSS, and Dynamic HTML, along with a Masters Reference that makes it easy to find the information you need. Tying it all together is the authors' expert guidance on planning, developing, and maintaining effective, accessible websites. Coverage includes: Choosing between HTML and XHTML Creating web pages Planning and developing public, personal, and intranet sites Including images in web pages Using HTML/XHTML frames effectively Converting HTML to XHTML Creating CSS style sheets Using JavaScript Including multimedia Creating Dynamic HTML or Dynamic XHTML documents Validating XHTML or HTML documents Creating coherent, easily maintainable websites Making your website searchable Accommodating users with disabilities Creating an XML DTD Extending XHTML with Namespaces
