For the Love of Cinema Feb 12 2021 What role does love—of cinema, of cinema studies, of teaching and learning—play in teaching film? For the Love of Cinema brings together a wide range of film scholars to explore the relationship between cinephilia and pedagogy. All of them ask whether cine-love can inform the serious study of cinema. Chapter by chapter, writers approach this question from various perspectives: some draw on aspects of students' love of cinema as a starting point for rethinking familiar films or generating new kinds of analyses about the medium itself; others reflect on how their own cinephilia informs the way they teach cinema; and still others offer new ways of writing (both verbally and audiovisually) with a love of cinema in the age of new media. Together, they form a collection that is as much a guide for teaching cinephilia as it is an energetic dialogue about the ways that cinephilia and pedagogy enliven and rejuvenate one another.

A History of Three-Dimensional Cinema Oct 03 2022 A History of Three-Dimensional Cinema chronicles 3-D cinema as a single, continuous and coherent medium, proceeding from 19th-century experiments in stereoscopic photography and lantern projection (1839–1892) to stereoscopic cinema's "long novelty period" (1893–1952). It proceeds to examine the first Hollywood boom in anaglyphic stereo (1953–1955), when the mainstream industry produced 69 features in 3-D, mostly action films that could exploit the depth illusion, but also a handful of big-budget films—for example, *Kiss Me Kate* (George Sidney, 1953) and *Dial M for Murder* (Alfred Hitchcock, 1954)—until audiences tired of the process; the anaglyphic revival of 1970–1985, when 3-D was sustained as a novelty feature in sensational genres like soft-core pornography and horror; the age of IMAX 3-D (1986–2008); the current era of digital 3-D cinema, which began in 2009 when James Cameron's *Avatar* became the highest-grossing feature of all time and the studios once again stamped into 3-D production; and finally the future promise of Virtual Reality.
