Mergers and Merger Policy in the Canadian Manufacturing Sector, 1971-79 Mar 05 2020 "In contrast to the United States, Canada does not possess merger legislation that attempts to stop the development of market power in its incipiency"-- Introduction.

Harry Johnson May 07 2020 Harry Johnson (1923-1977) was such a striking figure in economics that Nobel Laureate James Tobin designated the third quarter of the twentieth century as

"the age of Johnson." Johnson played a leading role in the development and extension of the Heckscher-Ohlin model of international trade, wrote fundamental articles on the balance of payments and later developed the monetary approach to the balance of payments. Within monetary economics he was also a seminal figure who, in a series of surveys, identified and explained the links between the ideas of the major post-war innovators. This book chronicles his intellectual development and his contributions to economics, economic education, and, particularly in Canada and Britain, the discussion of economic policy.

**Quantitative and Empirical Analysis of Energy Markets** Jul 21 2021 The revised edition of this book captures new developments in economics and finance. Turning its focus towards the application of Engle's (1982) autoregressive conditional heteroscedasticity (ARCH) in cutting-edge research and a discussion of whether energy prices reflect long memory, this book will keep readers up-to-date with current developments in the literature. It presents twenty-one empirical studies of econometric time series analysis of crude oil, natural gas and electricity markets in face of the rapidly changing dynamics of the energy markets. Amongst them, several studies employ nonlinear time series methods, unlike the standard linear approach commonly used, to reflect the nonlinear nature of the economic system. Two new chapters are included, extending beyond the leading-edge research and innovative energy markets econometrics detailed in the first edition: Chapter 17 examines the effects of oil price changes and speculations on economic activity and Chapter 20 re-evaluates empirical evidence for random walk type behavior in energy futures prices using a statistical physics approach.

The Leisure Economy Jan 15 2021 For the past three decades,

we have been steadily creating an extreme 'time-crunch economy' that has affected jobs, portfolios, businesses and lives. But the 'time-crunch economy' is turning into 'the leisure economy' and it will mean wrenching adjustments for our lives and institutions. Everyone from consumers, investors, businesses, and policy-makers will need to understand the changes afoot. The Leisure Economy posits profound economic changes in North America due to both the retirement of the baby boomers and the attitudes of ascendant generations X and Y. Looking at trends in demographics, economics and generational change, this book looks at how to stay ahead of the leisure economy and predicts who will be the winners and losers in the seismic shift ahead.

**The Economics Anti-Textbook** Feb 25 2022 Mainstream textbooks present economics as an objective science free from value judgements; that settles disputes by testing hypotheses; that applies a pre-determined body of principles; and contains policy prescriptions supported by a consensus of professional opinion. The Economics Anti-Textbook argues that this is a myth - one which is not only dangerously misleading but also bland and boring. It challenges the mainstream textbooks' assumptions, arguments, models and evidence. It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study - one which is more an 'art of persuasion' than it is a science. The Economics Anti-Textbook's chapters parallel the major topics in the typical text, beginning with a boiled-down account of them before presenting an analysis and critique. Drawing on the work of leading economists, the Anti-Textbook lays bare the blind spots in the texts and their sins of omission and commission. It shows where hidden value judgements are made and when contrary evidence

is ignored. It shows the claims made without any evidence and the alternative theories that aren't mentioned. It shows the importance of power, social context and legal framework. The Economics Anti-Textbook is the students' guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on.

**Microeconomics** Nov 05 2022 With current Canadian examples, *Microeconomics: Canadian Edition* takes a storytelling style to guide you through examples that help clarify how economic concepts work today.

*Study Guide for Use with Principles of Microeconomics, Third Canadian Edition* Nov 12 2020

Engineering Economics in Canada Apr 29 2022 *Engineering Economics in Canada* is designed for teaching a course on engineering economics to match engineering practice in Canada today. It recognizes the role of the engineer as a decision maker who has to make and defend sensible decisions. Such decisions must not only take into account a correct assessment of costs and benefits. They must also reflect an understanding of the environment in which the decisions are made.

**Environmental Economics** Oct 04 2022

The Demand for Money Jun 19 2021 This is the most comprehensive textbook available on the money demand function and its role in modern macroeconomics. The book takes a microeconomic- and aggregation-theoretic approach to the topic and presents empirical evidence using state-of-the-art econometric methodology, while recognizing the existence of unsolved problems and the need for further developments. The new edition is fully revised and includes new chapters.

Proceedings of the Third Canadian Symposium on Mining Surveying and Rock Deformation Measurements Sep 30 2019

*Personalist Economics* Aug 29 2019 *Personalist Economics*:

Moral Convictions, Economic Realities, and Social Action examines the nature of the worker and consumer from a personalist perspective, comparing that body of knowledge to what is received from conventional economics. A running theme throughout this book is that personalist economics is attentive to both aspects of human material need - physical need and the need for work as such - in a way that does not disregard human wants. Accordingly, this book is more concerned about the philosophical base and description of the economy's significant characteristics than social economic policy. Personalist Economics explores four dimensions of particularly acute human physical need: unemployment, poverty, homelessness, and death. In addressing these four aspects of need, the book delves into the second and third domains of social economics: description of the significant characteristics of the economy, and social economic policy. In the same way, Personalist Economics explores two types of economic cooperation - supra-firm alliances and inter-firm partnerships - as means for addressing certain aspects of human material need. This book concludes with a lengthy discussion of the challenges facing personalist economics in the years ahead.

**The Methodology of Economic Model Building (Routledge Revivals)** Oct 24 2021 The major methodological task for modern economists has been to establish the testability of models. Too often, however, methodological assumptions can make a model virtually impossible to test even under ideal conditions, yet few theorists have examined the requirements and problems of assuring testability in economics. In *The Methodology of Economic Model Building*, first published in 1989, Lawrence Boland presents the results of a research project that spanned more than twenty years. He examines how economists have applied the philosophy of Karl Popper, relating

methodological debates about falsifiability to wider discussions about the truth status of models in natural and social sciences. He concludes that model building in economics reflects more the methodological prescriptions of the economist Paul Samuelson than Popper's 'falsificationism'. This title will prove invaluable to both students and researchers, and represents a substantial contribution to debates about the scientific status of economics.

### **Multinationals in Canada: Theory, Performance and**

**Economic Impact** Jul 01 2022 Multinational enterprises have become one of the distinctive institutions of our times.

Controversy over their economic and political effects, and over appropriate public policy responses, has become common in home and host countries and in international agencies. Much of this debate is reminiscent of the role of large corporations generally, particularly in their interregional and intergroup effects. The multinational setting, however, would have raised distinctive issues even apart from the strong surges of nationalism and anti-imperialism which have marked recent history. Canada has a long and unusual experience with such enterprises. Foreign control of capital in the nonfinancial industries (manufacturing, petroleum and gas, other mining and smelting, utilities, merchandising) was already 20 percent in 1930 and 25 percent in 1948. It rose to 36 percent by the late 1960s, but has since receded to about 30 percent. In 1975, fully 55 percent of the capital in manufacturing was controlled outside Canada, as was 72 per cent of that in petroleum and gas, and 58 percent in other mining. These figures exceed those of other developed countries, although there have been striking increases in recent decades. About 80 percent of the direct investment capital in Canada is from the United States. Recently, Canadians have become aware of a surge of Canadian direct investment abroad, which on a flow basis has exceeded

inflows (exclusive of retained earnings) for most of the 1970s.

**Fundamentals of Business (black and White)** Aug 22 2021  
(Black & White version) Fundamentals of Business was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. This book is freely available at: <http://hdl.handle.net/10919/70961> It is licensed with a Creative Commons-NonCommercial ShareAlike 3.0 license.

**The Economics of Money, Banking and Financial Markets**  
Dec 14 2020 Current users agree: Mishkin is the most comprehensive money and banking text on the market. Offering authoritative, applications-rich coverage of key concepts, models, and issues, Mishkin organizes material around a simple unifying framework to promote easy understanding. The third Canadian edition retains the hallmark features that have made Mishkin a trusted market-leader while introducing fresh new features and content including a winning pedagogy and extensive real world applications.

**National Library of Medicine Current Catalog** May 19 2021  
Population Issues in Social Choice Theory, Welfare Economics, and Ethics Mar 17 2021 This book explores how different ideas of the common good may be compared, contrasted and ranked.  
*Exploring Economics, 4th* Feb 13 2021 The fourth Canadian edition of Exploring Economics delivers a strong foundation in economic principles through an applied approach and spirited writing style which builds confidence and comprehension while students learn challenging concepts. Complete with a modular format where each chapter is broken into bite-sized sections, Exploring Economics promotes retention and mastery of economic principles by communicating concepts in a modern and engaging manner.

**Optimization in Economics and Finance** Aug 10 2020

Extends the optimization techniques, in a form that may be adopted for modeling social choice problems. The models in this book provide possible models for a society's social choice for an allocation that maximizes welfare and utilization of resources. A computer program SCOM is presented here for computing social choice models by optimal control.

**The Urban Economy and Regional Trade Liberalization** Dec

26 2021 This book explores the role of cities in the trade liberalization process in the global economy and their efforts to enhance the competitiveness of cities. Cities have become the primary actors in the trade liberalization process, both in North America and Europe. It is their efforts to design strategic responses, to create city networks, to influence priorities for public expenditures, and to enhance their own competitiveness that are vital to the realization of the potential for increased efficiency and higher incomes which free-trade promises. This work examines the impact of trade liberalization on the urban economy through case studies of urban areas along the U.S.-Canadian border, in the European Community, and in Scandinavia. The findings will be of interest to scholars in development economics and international trade and to practitioners and policy-makers involved in urban economic development.

Canadian Oceans Policy Apr 05 2020 This book deals with Canada's oceans management policies since the conclusion of the 1982 Convention of the Law of the Sea. That Convention set out a jurisdictional framework for the management of the world's oceans, but it did not provide states with precise guidance on all the issues that can arise. As a state with one of the world's longest coastlines, Canada was one of the principal beneficiaries under the 1982 Convention regime. A study of Canadian policy is particularly significant, as Canadian oceans

management places in relief many of the difficult questions yet to be resolved.

**No Ordinary Academics** Mar 29 2022 Describes the circumstances and people that turned a department in an isolated prairie university into a thriving intellectual community that would nurture some of Canada's best minds.

Essays on the Intellectual History of Economics Jan 27 2022

Ranking among the most distinguished economists and scholars of his generation, Jacob Viner is best remembered for his work in international economics and in the history of economic thought. Mark Blaug, in his *Great Economists Since Keynes* (Cambridge, 1985) remarked that Viner was "quite simply the greatest historian of economic thought that ever lived." Never before, however, have Viner's important contributions to the intellectual history of economics been collected into one convenient volume. This book performs this valuable service to scholarship by reprinting Viner's classic essays on such topics as Adam Smith and laissez-faire, the intellectual history of laissez-faire, and power versus plenty as an objective of foreign policy in the seventeenth and eighteenth centuries. Also included are Viner's penetrating and previously unpublished Wabash College lectures. "Jacob Viner was one of the truly great economists of this century as both teacher and scholar. This collection ... covers a wide range with special emphasis on the history of thought. Today's economists will find [the essays] just as thought-provoking and as illuminating as did his contemporaries. They have aged very well indeed."--Milton Friedman, Hoover Institution "Jacob Viner was a great and original economic theorist. What is rarer, Viner was a learned scholar. What is still rarer, Viner was a wise scientist. This new anthology of his writings on intellectual history is worth having in every economist's library--to sample at intervals over the

years in the reasoned hope that Viner's wisdom will rub off on the reader and for the pleasure of his writing."--Paul A. Samuelson, MIT "I am frankly jealous of those who will be reading Viner's essays for the first time, marvelling at his learning, amused by his dry wit, instructed by his wisdom. But although I cannot share their joy of discovery, I shall be able to savor the subtleties that emerge from rereading these splendid essays."--George J. Stigler, University of Chicago "This volume will be a treat for the reader who appreciates scholarship, felicitous use of language, and the workings of a great mind. The Wabash lectures are gems, and the introduction by Douglas Irwin contributes significantly to our understanding of Viner's accomplishments."--William J. Baumol, Princeton University/New York University Originally published in 1991. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**Collective Bargaining and the Public Interest** Sep 10 2020  
Canadian opinions about labour unions have changed in recent years. The more frequent use of strikes to resolve disputes has contributed to a growing intolerance of unions, particularly in the public service. Canadians now seem to be more concerned about the increasing power of unions than about the power of big business or big government.

**Steady-State Economics** Sep 22 2021 When Herman Daley's Steady-State Economics was first published in 1977, he caused a

sensation with this then-radical view that "enough is best." Today, his ideas are recognised as the key to sustainable development, and *Steady-State Economics* is universally acknowledged as the leading book on the economics of sustainability. The book is a controversial treatise on the economics of global sustainability, which explains how to integrate ecological and economic concerns. The text has been revised and updated since the first edition was published in 1977, in order to include new essays and to take account of recent developments.

### **Multinationals in Canada: Theory, Performance and**

**Economic Impact** Dec 02 2019 Multinational enterprises have become one of the distinctive institutions of our times.

Controversy over their economic and political effects, and over appropriate public policy responses, has become common in home and host countries and in international agencies. Much of this debate is reminiscent of the role of large corporations generally, particularly in their interregional and intergroup effects. **Study Guide to Accompany Economics : Principles, Problems and Policies, Third Canadian Edition** Aug 02 2022  
**The Allocation of Taxing Power Under the Canadian Constitution** Jul 09 2020

**Development Economics** Feb 02 2020 Focuses upon economic policy in the context of developing countries. The aim is to show how economic theory can be applied to the real and urgent challenges facing the developing world. The text includes 17 country case studies as well as comprehensive theoretical coverage.

**Westernizing the Third World** Jul 29 2019 The second edition of this successful and popular text has been updated and revised to include recent issues in development economics. Significant new additions include: \* Asian values and development \* democracy, human rights and good governance \* globalization and development \* boxed summaries of key arguments and glossary. *Westernizing the Third World* identifies the mainstream economic theories which have been employed in developing countries. The author examines these and explains why Eurocentric concepts are not suitable for the developing world.

**Issues in Canadian Economics** Jan 03 2020

**Climate Change Economics** Jun 07 2020 Although the full extent of the potential damages from global warming remain unknown, scientists have long argued that action should be taken now to mitigate any possible adverse consequences. However, in making such policy recommendations, economic arguments need to be considered as much as scientific ones. This volume

examines the appropriate economic incentives for implementing policy to mitigate climate change and then exposes the flaws in current international agreements. The book begins by providing the economic foundations for understanding climate change. It examines how Kyoto's flexibility mechanism departs from more efficient and less-costly approaches for reducing atmospheric carbon dioxide, and highlights the problems that terrestrial carbon credits pose for emissions trading. countries will be unable to meet their own Kyoto obligations. The author then uses an economic analysis of the potential damages to show that even though some countries will experience a detrimental effect from climate change, the majority will actually benefit. In this way, he clearly demonstrates that not only will current policies do little to avert global warming, most countries will also have less incentive to sign up to any future international agreements. Academics, economists and policymakers involved in the climate change debate will find this succinct yet comprehensive analysis of the economic instruments available for mitigating climate change to be essential reading.

Study Guide to Accompany Economics, Third Canadian Edition  
Sep 03 2022

**Stochastic Methods in Economics and Finance** Jun 27 2019

Theory and application of a variety of mathematical techniques in economics are presented in this volume. Topics discussed include: martingale methods, stochastic processes, optimal stopping, the modeling of uncertainty using a Wiener process, Itô's Lemma as a tool of stochastic calculus, and basic facts about stochastic differential equations. The notion of stochastic ability and the methods of stochastic control are discussed, and their use in economic theory and finance is illustrated with numerous applications. The applications covered include: futures, pricing, job search, stochastic capital theory, stochastic

economic growth, the rational expectations hypothesis, a stochastic macroeconomic model, competitive firm under price uncertainty, the Black-Scholes option pricing theory, optimum consumption and portfolio rules, demand for index bonds, term structure of interest rates, the market risk adjustment in project valuation, demand for cash balances and an asset pricing model. Remaking Liberalism Apr 17 2021 Ferguson considers the thinking of four major Canadian political economists who developed their ideas while building the discipline of political economy at Queen's University. He demonstrates that the four clearly argued on behalf of the new liberalism, emphasizing individual rights and positive government, and suggests that their ideas reveal an intellectual position which differed from the imperialist and continentalist alternatives that dominated Canadian thinking at the time.
