The Global Findex Database 2017 Nov 07 2020 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the

World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.

Practical Boat Owner's Sailing Around the UK and Ireland Feb 20 2022 This new book, based on a highly successful series of articles in Practical Boat Owner magazine, is a detailed practical guide to sailing around the UK - all by means of day sails. Roger Oliver, a passionate sailor, explains his in-depth passage planning, boat preparations, weather checks and log-keeping, as well as his choice of routes, detailed navigation, sail trim tips and on-passage maintenance, all for the benefit of sailors who have a yen to follow in his footsteps. Packed with a wealth of practical tips on seamanship, anchoring in high winds, coping with big seas, problem-solving, harnessing the tide, sailing short-handed and living aboard for extended cruising, this book will be a godsend to the many thousands of sailors who enjoy coastal cruising and who will discover (as did Roger) that it is perfectly possible to cruise around the whole of the UK in a series of day sails. With this book to hand, and inspired by Roger's detailed route maps and spectacular photographs, anyone can experience the thrill and enjoyment of sailing around the beautiful and varied UK coast from any starting point.

E. F. Codd and Relational Theory, Revised Edition Jul 24 2019 E. F. Codd's relational model of data has been described as one of the three greatest inventions of all time (the other two being agriculture and the scientific method), and his receipt of the 1981 ACM Turing Award, the top award in computer science, for inventing it was thoroughly deserved. The papers in which Codd first described his model were staggering in their originality; they had, and continue to have, a huge impact on just about every aspect of the way we do business in the world today. And yet few people, even in the professional database community, are truly familiar with those papers. This book—a thorough overhaul and rewrite of an earlier book by the same name—is an attempt to remedy this sorry state of affairs. In it, well known author C. J. Date provides a detailed examination of all of Codd's major database publications, explaining the nature of his contribution in depth, and in particular highlighting not only the many things he got right but also some of the things he got wrong. Database theory and practice have evolved considerably since Codd first defined his relational model, back in 1969. This book draws on decades of experience to present the most up to date treatment of the material possible. Anyone with a professional interest in databases can benefit from the insights it contains. The book is product independent.

Citizen Participation in Non-profit Governance Jan 22 2022 Nonprofit organizations, their governing structures, boards of directors, and their newest constituency, members who represent the public at large, are the subject of this book. In recent years, new mechanisms have been developed to

link citizens with government and with diverse policy-making entities. Earlier, it was assumed that citizens had little interest in policy deliberations, and responsibility for public needs was best left to the experts. Many citizens now believe that they have a legitimate right to influence how power is exercised in public organizations. Koff constructs a demographic profile of public members, their activities, and their opinions about board membership. She also catalogues the perspectives of executive directors about public members, identifies specific problems related to public participation, and suggests strategies to help resolve them. How effectively these bodies perform, and how well they respond to the public, are in part determined by the talents and activities of their members. All of these members, especially public members, need appropriate tools to be able to perform in a superior fashion. Despite the importance of governing bodies to an organization's performance, there has been little examination of board members in general and specifically of public members. This is the first book-length study on the subject.

Extreme Ownership Mar 31 2020 An updated edition of the blockbuster bestselling leadership book that took America and the world by storm, two U.S. Navy SEAL officers who led the most highly decorated special operations unit of the Iraq War demonstrate how to apply powerful leadership principles from the battlefield to business and life. Sent to the most violent battlefield in Iraq, Jocko Willink and Leif Babin's SEAL task unit faced a seemingly impossible mission: help U.S. forces secure Ramadi, a city deemed "all but lost." In gripping firsthand accounts of heroism, tragic loss, and hard-won victories in SEAL Team Three's Task Unit Bruiser, they learned that leadership—at every level—is the most important factor in whether a team succeeds or fails. Willink and Babin returned home from deployment and instituted SEAL leadership training that helped forge the next generation of

SEAL leaders. After departing the SEAL Teams, they launched Echelon Front, a company that teaches these same leadership principles to businesses and organizations. From promising startups to Fortune 500 companies, Babin and Willink have helped scores of clients across a broad range of industries build their own high-performance teams and dominate their battlefields. Now, detailing the mind-set and principles that enable SEAL units to accomplish the most difficult missions in combat, *Extreme Ownership* shows how to apply them to any team, family or organization. Each chapter focuses on a specific topic such as Cover and Move, Decentralized Command, and Leading Up the Chain, explaining what they are, why they are important, and how to implement them in any leadership environment. A compelling narrative with powerful instruction and direct application, *Extreme Ownership* revolutionizes business management and challenges leaders everywhere to fulfill their ultimate purpose: lead and win.

Royal Aircraft Factory S.E.5 Mar 12 2021 This rakish fighter became known as the 'mount of aces', being the type on which the most successful fighter pilots of Britain and her Empire went to war throughout the last 18 months of World War 1. It was the Spitfire of the Western Front: delivering greater speed, range, firepower and all-round performance than the vast majority of its opposition. Often working in partnership with the more pugnacious Sopwith Camel, the S.E.5 and S.E.5a ensured that no enemy aircraft was safe even a long way behind their own lines as the Royal Flying Corps gradually won air superiority over the trenches.

Digital Senegal for Inclusive Growth Mar 24 2022 Senegal, like all African countries, needs better and more jobs for its growing population. The main message of Digital Senegal for Inclusive Growth is that broader use of

productivity-enhancing technologies by households and enterprises can generate such jobs, including for lower-skilled people. Adoption of better technologies can support both Senegal's short-term objective of economic recovery and its vision of economic transformation with more inclusive growth. But this is not automatic. This book leverages a novel survey instrument that measures adoption of technologies at the firm level. Results from this survey show that there is a large average technological gap in Senegal relative to firms in Brazil, in the range of 36 and 30 percent for extensive (whether firms use it at all) and intensive (the most frequently applied) uses of better technologies such as for business administration. Except for a small number of firms, enterprises still mostly use manual, analog technologies to perform general and sector specific business functions. Micro-size informal enterprises lag even further. The benefits from technology adoption are significant. Digital technologies are an enabler of economy-wide productivity and jobs growth by catalyzing adoption of complementary technologies, including many not accessible without digital infrastructure. For households, mobile internet coverage is associated with 14 percent higher total consumption, as well as a 10 percent lower extreme poverty rate—and jobs with higher earnings. Firms with better technologies have higher levels of productivity, generate more jobs, and increase the share of lower-skilled workers on their payroll, on average: an increase in technological sophistication across general business functions that the firm uses most intensively, such as using standard software rather than writing by hand for business administration, is associated with a 14 percent higher jobs growth rate. For these and other inclusive growth benefits to be realized, Senegal should focus on ensuring availability of affordable digital infrastructure and implementing targeted incentives to promote use by firms of better technologies as well as policies to narrow deepening digital divides across enterprises and households.

Acquisition and Loss of Ownership of Goods Dec 21 2021 This volume contains the major result of the work undertaken by the international research group "Transfer of Movables" which belonged to the Study Group on a European Civil Code. It covers the most important aspects of the law of property in movables, such as the transfer of ownership based on the transferor's right and the good faith acquisition of ownership. The suggested black letter provisions are accompanied by extensive explanatory comments and comparative notes providing information on the existing rules of the EU Member States. As compared to Book VIII of the DCFR, this volume contains additional and partly revised national notes, extended comments, translations of the black letter rules and adapted registers. The "Principles of European Law" are published in co-operation with Oxford University Press and Staempfli (Switzerland).
