Venturing to Do Justice Jul 09 2020 Since 1958 state courts of last resort in the United States have handed down a notably larger number of overruling decisions than ever before. This distinctive record raises many questions about how and by whom law reform should be effected. Mr. Keeton examines this issue in relation to private law the branch of law concerned with the rights and duties of private individuals toward each other, enforceable through civil proceedings. In the first part of this book, the author reviews methods of law reform. He focuses on the role of the courts and legislatures as agencies of abrupt change; the remarkable rate at which the role of the courts has grown; and the means by which courts may discharge their increased responsibility for changing private law to meet contemporary needs. He strongly urges a more active and imaginative participation in law reform by both courts and legislatures, and proposes concrete methods for achieving it. In the second part of this book, Mr. Keeton concentrates on reform in two important areas of private law: harms caused by defective products and by traffic accidents. He considers the developing rules for strict liability, and discusses the issues of principle underlying the basic protection plan for traffic victims—a proposal, of which he is co-author, which is under consideration in a number of state legislatures. The closing chapter treats problems stemming from the necessity of blending the old with the new when private law reform is undertaken. This discussion stresses one of the book's recurring themes: the need to balance stability and predictability of law with flexibility and reform. The author disposes of some misconceptions about the role of public policy in a workable legal system—misconceptions that sometimes affect the attitudes and thinking not only of professionals in the field of law, but also of those who see the system from the outside. This book contains controversial ideas that will be of interest to all who are concerned with law reform, whether professionally or as informed citizens.

You Can Teach Grammar Oct 31 2019 Teaching English to speakers of other languages (TESOL) requires knowledge of content (grammar, vocabulary, pronunciation) and methods (lesson planning, classroom management). Many TESOL teacher training programs assume that trainees have sufficient content knowledge, and therefore focus on methodology. Unfortunately, the assumption of content knowledge is often a bad one. Many TESOL graduates enter the work force without a sufficient grounding in English fundamentals. You Can Teach Grammar is a self-contained TESOL grammar course book. It covers all the parts of speech and major sentence structures and provides self-practice quizzes to check comprehension. In addition, the book directly addresses common classroom problems associated with each grammar topic. In the classroom, knowledge of the grammar alone is insufficient. Imparting English grammar skills in memorable and meaningful ways can be tricky, particularly for new teachers. For this reason, You Can Teach Grammar includes a variety of teaching ideas for each grammar topic. You Can Teach Grammar is designed as both a course book and a general reference. Its logical layout and detailed indexing make it a useful resource for teachers in the field as well as for teachers-in-training.

Free from School Dec 14 2020 It's not every day that a 16 year old writes a book. In fact, girls and boys of that age are supposed to spend their time studying what other people write. It is pre-sumed that at that age they do not themselves have anything significant or interesting to say. And the education system guarantees just that. The best rewards go to those who can parrot set answers to set questions in examination halls. Those who try to use their imagination or reply differently are often punished with low grades.

Exhibit A Jun 19 2021 Guy Bourdin, who died in 1991, was a legend in the world of fashion photography. He was the most radical and audacious photographer of his generation but his reputation has been surrounded in secrecy - he rarely allowed his photographs to appear outside the pages of French Vogue. No book of his work has previously been published. His estate was frozen by the courts until 1997, after which his son, Samuel, gained control of his work as a result of which this long-awaited book can be published. Bourdin was originally a painter and a friend of Man Ray. His fashion photographs began to incorporate his surrealist influences. Fashion photography became an arena for his personal obsessions. The results are as shocking and astonishing as any commercial photograph ever published. They were executed meticulously. Despite his intense eroticism,

subversion and, as Cecil Beaton described, 'his grotesque little gaminers', Beaton referred to him in 1975 as 'unquestionably the most interesting fashion photographer in Paris today'. His work was said to have represented 'the look of an era -glamorous, hard-edged, cleverly spiced with vulgarity... rich with implied narratives and strong erotic undercurrents'

Righteous Porkchop Sep 03 2022 Asked to head up Robert F. Kennedy Jr. 's environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman 's passionate fight to remedy it, Righteous Porkchop chronicles Niman 's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

The Judicial Role Jan 15 2021 This book deals with the central question in statutory interpretation — the role of the judge. It argues that it is both legitimate and desirable for the interpreter to take into account policy considerations when determining the meaning of a statute. The author calls this pragmatic judicial partnering. The pragmatic approach rejects two traditional views of the judicial role — textualism and intentionalism — which assume that the interpreter is nothing but a legislative agent. Part I of the book makes the case for pragmatic judicial partnering. My claim is that pragmatic interpretation is constitutional, that it provides the best description of statutory interpretation, and that it is the best normative conception of how judges should interpret legislation. It also argues that judicial opinions should reveal the indeterminacy that is inherent in determining the meaning of legislation and the creative role that judges play in shaping that meaning. Part II is a critique of the leading advocates of the view that judge should be legislative agents — Justice Scalia and Professor Manning (both textualists); Professor Elhauge (an intentionalist); and Professor Vermeule (an institutional literalist). An Epilogue identifies the fundamental issue as one of legal culture. It suggests that we may be entering a period where mistrust of judging leads to rejection of pragmatic judicial partnering in favor of the judge-as-legislative-agent.

Wittgenstein and Justice Jun 07 2020 This is an introduction for students of politics and society to the later philosophy of Ludwig Wittgenstein, and some topics in "ordinary-language" philosophy. It argues that Wittgenstein's later philosophy offers a revolutionary new conception of language, and hence a new and deeper understanding of ourselves and the world of human institutions and action. Language is seen as activity, and words as signals, rather than labels for classes of objects. The implications for the social sciences and for political action are wide-ranging and surprising. Questions of justice, for example, are seen to be neither just patterns of human behavior the social scientists can observe, nor the subjective expression of personal preference or passion, but the locus of rational judgement in accord with standards, different from the standards of science or mathematics but just as objective and resting on the same human foundations. The book ranges beyond topics usually treated in discussions of Wittgenstein to more difficult and important concerns such as "grammar" and "forms of life". After an initial explication relating Wittgenstein's ideas to those of several interpreters and critics, the author proceeds to applications of his thought to certain selected problems central to social science and political theory. These include the nature of explanation, the relationship between action and causation, validity in judgement, and the relationship between concepts and reality in the human world. The author also applies Wittgenstein's ideas to such specialized questions as what is "political" and the nature of power. The theme of human justice in relation to social problems, political action, and judgement pervades the book, appearing and reappearing at many points in the discussion.

We Made a Garden Dec 02 2019 First published in 1956, *We Made a Garden* is the story of how Margery Fish, the leading gardener of the 1960s, and her husband Walter transformed an acre of wilderness into a stunning cottage garden, still open to the public at East Lambrook Manor, Somerset, England. This is now one of the most important books on gardening ever written. A beautiful and timeless book on creating a garden. Margery Fish turned to gardening when she was in her mid-forties and went on to develop the whole concept of a cottage garden. She had a love of flowers coupled with a passion for nature and made an intensive research into the traditionally grown plants with which cottage gardens in Britain were once so densely planted. In this classic work, she recounts the trials and tribulations, successes and failures, of her venture with ease and humour. Topics covered are colourful and diverse, ranging from the most suitable hyssop for the terraced garden through composting, hedges, making paths to the best time to lift and replant tulip bulbs. Her good sense, practical knowledge and imaginative ideas will encourage and inspire gardeners everywhere.
