Children's needs - parenting capacity Sep 09 2020 This second edition of "Children's needs - parenting capacity" updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.
