[Computer-Managed Maintenance Systems](#) May 29 2020 Effective resource management and reliable equipment are essential for optimum plant performance. Computer-Managed Maintenance Systems goes beyond the simple selection and implementation of a CMMS. It also defines the changes in infrastructure, management philosophy and employee skills that must be implemented to gain maximum benefits from the CMMS. The book is designed to address the information needs of all levels of plant management. In this new edition, the authors have added a chapter specifically on the latest technology, Application Solution Providers (ASP) that has revolutionized the way CMMS are used and the benefits they can offer to a business. This solution provides integrated software, hardware and networking technology along with Information Technology (IT) consulting services into an outsourced package. A new appendix on Key Performance Indicators has also been added. Comprehensive, practical guide that covers selection, justification, and implementation of an effective CMMS in any facility All levels of plant management will find useful information in this step-by-step guidelIncludes a new chapter on ASP technologies

The Art of F&I - Conversations from The Box Nov 22 2019 There are many books on how to succeed in F&I. Experts are everywhere trying to give you advice on how to be successful. You see magazines, blogs, podcasts, and even TV shows, telling you how to "maximize your profits" and "overcome any objection". Yet, something is still missing. Customer satisfaction is incredibly low. People dislike the buying process. Nearly 6 out of every 10 customers skip buying a vehicle service contract from their selling dealer, while third party competition is thriving on selling to those same customers. With the advent of DealerTrack and RouteOne, coupled with the evolution of the desk submitting deals before F&I involvement even begins, people should be delighted with the overall transaction times, but they're not. Another problem we face is that most F&I training offered today follows an old model of trying to simply overcome objections. The focus on objections made F&I development companies a solution for dealers wanting to create their own F&I departments in the 1970's. And it worked. They created an industry. But the world keeps moving. Today endlessly debating with customers by overcoming every objection is a problem. We must be as Bruce Lee said, "Like water", and adapt to each customer individually. For instance, today a menu presentation with every product bundled into the "Complete" or "Platinum" column may be the best way to present your payments... or it may not be. Do you know what sales process is most effective in YOUR store? Or...are you just doing what the trainer tells you works best? More importantly, can they bring data? Can they demonstrate effective results in YOUR store? If not, why are they giving you advice?
