Moto Guzzi Sep 27 2019 There are many ways of designing a motorcycle, but it takes a great deal of artistic sensitivity to create a legend from only two cylinders. That is exactly what Moto Guzzi, the prestige manufacturer in Mandello del Lario, has done. Active in motorcycle construction since 1920, particularly in the years after 1945 it created motorcycles that made history, especially those with the powerful V-twin engine installed lengthwise in the chassis. For forty years the V-twin four-stroke engine has been the Italian company's flagship. The fine Italians, Le Mans, and California types, and the small 125s, 250s and 350s are described here with accuracy and detail. This comprehensive volume describes all models and technical details. As is the style of the authors, they also provide background information about the company and the industry. It is not all about machines and horsepower, but also the people who put their stamp on the operations: not only a treat for fans of serious technical information, but a gripping story as well.

The Harley-Davidson Story Jan 12 2021 The Harley-Davidson Story: Tales from the Archives is a fascinating, visually driven overview of the motor company's rich story, created in cooperation with the Harley-Davidson Museum. The story of Harley-Davidson is a classic American tale of spirit, invention, and the right idea at the right time. From its beginning in a small Milwaukee shed in 1903, William Harley and his cousins, the Davidson brothers, set in motion what would eventually become the world's most iconic motorcycle company. While other motorcycle companies rose and fell through the teens and 1920s, Harley went from strength to strength, whether introducing its first V-twin motor or dominating race tracks across America. The Milwaukee Miracle even prospered during WWII, building war bikes for the armed forces. By the 1950s, they'd buried their last American-built competitor, Indian, and gained a hold over the US market that they maintain to this day. A remarkable story deserves a remarkable space to recount it. Such is the Harley-Davidson Museum in Milwaukee, which opened in 2009. Harley-Davidson partnered with Motorbooks to create this book relaying Harley-Davidson's story, as told through the museum's displays and archive assets.

Le Vack's Legacy Aug 26 2019 The largest supplier of proprietary motorcycle engines in the world, J. A. Prestwich & Co (aka JAP), decided to go racing with something unique in 1922. In a matter of weeks, a small team headed by Val Page, aided by Herbert Le Vack, had produced a radical new design - the first British double-overhead-camshaft motorcycle racing engine. With this amazingly advanced engine fitted to a New Imperial frame, Le Vack stunned his competitors at the 1922 Isle of Man TT. From then on the engine and its successors proved invincible - breaking numerous National and World Records over a four-year period. Yet the subsequent world recession, and a world war, consigned these achievements to memory and eventually bestowed upon them an almost mythological status. JAP's engineering archives were discarded, and the handful of engines made might well have been lost too had it not been for a series of enthusiasts. In *Le Vack's Legacy*, Brian Thorby traces the fortunes of the small number of JAP racing engines and parts that have wandered Europe for nearly a century. Much has been written and illustrated about JAP ohv Speedway and V-twin engines, but almost nothing about their unconventional double-overhead-camshaft brothers - until now. This authoritative new account finally puts aside the myths and sets the record straight.
