*My Mini Cooper, Its Part in My Breakdown* Jan 12 2021 Here for the first time is a short history of the small car from 1885 to 2000 and an examination of what came before, during, but not after the Mini, including the fairly complete story of the Mini and Mini Cooper from 1959 to 2000. James Ruppert is not used to spending very much money on cars, so when he decided to finish the restoration of his 1964 Cooper, started in 1979, the bills started to mount up and mentally he began to fall apart. Bought for 200 and a bottle of wine, it would eventually cost almost one hundred times that to finish. Serial Mini owner James Ruppert explains how not to buy, run or restore a classic car, and why owning one might be some form of unwellness. He's a man who can't be trusted with an old car, but can be relied upon to explain how the Mini came about and what it was up against throughout the decades. From the author of the critically acclaimed, The British Car Industry Our Part in its Downfall, and the Mercedes Montagu of Beaulieu winning The German Car Industry, My Part in its Victory, here is the full story of his seriously mistreated Mini and how the small car came to rule the world. James Ruppert has been a motoring journalist since the 1980s. He wrote for Car for almost twenty years, is a special correspondent for Autocar and has written for national newspapers including The Daily Telegraph, Sunday Times and The Independent. He coined the term Bangernomics, all about running vehicles on a budget and wrote the Bangernomics Bible. Ruppert is also the creator of the '70s superhero Spencer Haze comic strip.

Slavery and the British Country House Aug 26 2019 In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.

*The Surgeon General's Call to Action to Prevent and Reduce Underage Drinking* Mar 02 2020 Alcohol is the most widely used substance of abuse among America's youth. A higher percentage of young people between the ages of 12 and 20 use alcohol than use tobacco or illicit drugs. The physical consequences of underage alcohol use range from medical problems to death by alcohol poisoning, and alcohol plays a significant role in risky sexual behavior, physical and sexual assaults, various types of injuries, and suicide. Underage drinking also creates secondhand effects for others, drinkers and nondrinkers alike, including car crashes from drunk driving, that put every child at risk. Underage alcohol consumption is a major societal problem with enormous health and safety consequences and will demand the Nation's attention and committed efforts to solve. For the most part, parents and other adults underestimate the number of adolescents who use alcohol. They underestimate how early drinking begins, the amount of alcohol adolescents consume, the many risks that alcohol consumption creates for adolescents, and the nature and extent of the consequences to both drinkers and nondrinkers. Too often, parents are inclined to believe, "Not my child." Yet, by age 15, approximately one half of America's boys and girls have had a whole drink of alcohol, not just a few sips, and the highest prevalence of alcohol dependence in any age group is among people ages 18 to 20. This Surgeon General's Call to Action To Prevent and Reduce Underage Drinking was issued to focus national attention on this enduring problem and on new, disturbing research which indicates that the developing adolescent brain may be particularly susceptible to long term negative consequences from alcohol use. Recent studies show that alcohol consumption has the potential to trigger long term biological changes that may have detrimental effects on the developing adolescent brain, including neurocognitive impairment. Fortunately, the latest research also offers hopeful new possibilities for prevention and intervention by furthering our understanding of underage alcohol use as a developmental phenomenon—as a behavior directly related to maturational processes in adolescence. New research explains why adolescents use alcohol differently from adults, why they react uniquely to it, and why alcohol can pose such a powerful attraction to adolescents, with unpredictable and potentially devastating outcomes. Emerging research also makes it clear that an adolescent's decision to use alcohol is influenced by multiple factors. These factors include normal maturational changes that all adolescents experience; genetic, psychological, and social factors specific to each adolescent; and the various social and cultural environments that surround adolescents, including their families, schools, and communities. These factors—some of which protect adolescents from alcohol use and some of which put them at risk—change during the course of adolescence. Because environmental factors play such a significant role, responsibility for the prevention and reduction of underage drinking extends beyond the parents of adolescents, their schools, and communities. The process of solving the public health problem of underage alcohol use begins with an examination of our own attitudes toward underage drinking—and our recognition of the seriousness of its consequences for adolescents, their families, and society as a whole. Adolescent alcohol use is not an acceptable rite of passage but a serious threat to adolescent development and health, as the statistics related to adolescent impairment, injury, and death attest. A significant point of the Call to Action is this: Underage alcohol use is not inevitable, and schools, parents, and other adults are not powerless to stop it. The latest research demonstrates a compelling need to address alcohol use early, continuously, and in the context of human development using a systematic approach that spans childhood through adolescence into adulthood.

**Thirteen Moons** Oct 09 2020 This magnificent novel by one of America's finest writers is the epic of one man's remarkable journey, set in nineteenth-century America against the background of a vanishing people and a rich way of life. At the age of twelve, under the Wind moon, Will is given a horse, a key, and a map, and sent alone into the Indian Nation to run a trading post as a bound boy. It is during this time that he grows into a man, learning, as he does, of the raw power it takes to create a life, to find a home. In a card game with a white Indian named Featherstone, Will wins – for a brief moment – a mysterious girl named Claire, and his passion and desire for her spans this novel. As Will's destiny intertwines with the fate of the Cherokee Indians – including a Cherokee Chief named Bear – he learns how to fight and survive in the face of both nature and men, and eventually, under the Corn Tassel Moon, Will begins the fight against Washington City to preserve the Cherokee's homeland and culture. And he will come to know the truth behind his belief that "only desire trumps time."

Brilliantly imagined, written with great power and beauty by a master of American fiction, *Thirteen Moons* is a stunning novel about a man's passion for a woman, and how loss, longing and love can shape a man's destiny over the many moons of a life.

**Mini** Dec 11 2020 Mini celebrates 60 amazing years of this iconic car, from its revolutionary introduction to the popularity of its new-generation models. The first two-door Mini, introduced in 1959 and built until 2000, revolutionized automotive design with its innovative front-wheel-drive layout that made the car appear bigger on the inside than the outside. In 1999, the Mini was voted the second most influential car of the 20th century, behind the Ford Model T. Designed for British Motor Corporation (BMC) by Sir Alec Issigonis and manufactured in England, Australia, Spain, Belgium, Chile, Italy, Portugal, South Africa, Uruguay, Venezuela, and Yugoslavia, the Mini was as successful in competition as it was on the street, winning the Monte Carlo Rally four times from 1964 through 1967. Originally built by BMC, the Mini's later parent company, Rover, was acquired by BMW in 1994. In 2000, BMW sold most of the Rover Group but retained the Mini brand. The last and 5,387,862nd original Mini rolled off the production line in October, 2000. In July 2001, BMW launched production of the new-generation of Mini which was soon joined by Countryman, Clubman, convertible, Cooper Works, and numerous special editions. Nearly 20 years later, the new Minis remain as popular as the original from 1959.
