Fullerton's Rangers Oct 14 2021 In 1890, the U.S. government declared the frontier settled, and the "Wild West" was history. In the territory of New Mexico, however, crime still knew no limit and the gun was the final answer to all problems. Aiming to help New Mexico achieve statehood, its leaders decided they needed a mounted police force like those that had tamed Texas and Arizona. This book describes the birth of the New Mexico Mounted Police in 1905 and tells the stories of the members of the original Mounties, starting with their first captain, John F. Fullerton. Information drawn from personal interviews with ranger family members (many of whom provided photographs), Fullerton's personal papers and official Mounted

Police records brings a wealth of detail to this story from New Mexico's rich history. Fred Lambert, the last surviving member of the territorial rangers, provides a foreword.

Police Violence in America, 1869-1920 Nov 15 2021 Police violence is not a new phenomenon. In the late 19th and early 20th centuries, police officers in America assaulted or killed many ordinary citizens, often during improper detainments or arrests where no threat existed or no crime had been committed. Based on hundreds of newspaper accounts from 1869 through 1920, this history provides a chronological listing of interactions between police and unarmed citizens in which the citizens—some of them minors—were assaulted or killed. Police who committed such acts often lied to protect themselves, assisted by fellow officers and encouraging the media to demonize the victims. The author provides information on the prosecution and punishment of officers where available.

Pulitzer's Gold May 29 2020 No journalism awards are awaited with as much anticipation as the Pulitzer Prizes. And among those Pulitzers, none is more revered than the Joseph Pulitzer Gold Medal. Pulitzer's Gold is the first book to trace the ninety-year history of the coveted Pulitzer Prize for Public Service, awarded annually to a newspaper rather than to individuals, in the form of that Gold Medal. Exploring this service-journalism legacy, Roy Harris recalls dozens of "stories behind the stories," often allowing the journalists involved to share their own accounts. Harris takes his Gold Medal saga through two world wars, the Great Depression, the civil rights struggle, and the Vietnam era before bringing public-service journalism into a twenty-first century that includes 9/11, a Catholic Church scandal, and corporate exposés. Pulitzer's Gold offers a new way of looking at journalism history and practice and a new lens through which to view America's own story.

News of Baltimore Jun 22 2022 This book examines how the media approached long-standing and long-simmering issues of race, class, violence, and social responsibility in Baltimore during the demonstrations,

violence, and public debate in the spring of 2015. Contributors take Baltimore to be an important place, symbol, and marker, though the issues are certainly not unique to Baltimore: they have crucial implications for contemporary journalism in the U.S. These events prompt several questions: How well did journalism do, in Baltimore, nearby and nationally, in explaining the endemic issues besetting Baltimore? What might have been done differently? What is the responsibility of journalists to anticipate and cover these problems? How should they cover social problems in urban areas? What do the answers to such questions suggest about how journalists should in future cover such problems?

[The Oxford Handbook of Police and Policing](#) Oct 02 2020 This title brings together research on the development and operation of policing in the United States and elsewhere. Accomplished policing researchers Michael D. Reisig and Robert J. Kane have assembled a cast of renowned scholars to provide an authoritative and comprehensive overview of the institution of policing.

[Born to Walk](#) Jun 10 2021 The case for getting back on our feet The humble act of putting one foot in front of the other transcends age, geography, culture, and class, and is one of the most economical and environmentally responsible modes of transit. Yet with our modern fixation on speed, this healthy pedestrian activity has been largely left behind. At a personal and professional crossroads, writer, editor, and obsessive walker Dan Rubinstein travelled throughout the U.S., U.K., and Canada to walk with people who saw the act not only as a form of transportation and recreation, but also as a path to a better world. There are no magic-bullet solutions to modern epidemics like obesity, anxiety, alienation, and climate change. But what if there is a simple way to take a step in the right direction? Combining fascinating reportage, eye-opening research, and Rubinstein's own discoveries, *Born to Walk* explores how far this ancient habit can take us, how much repair is within range, and guarantees that you'll never again take walking for granted.

Street Rebellion May 09 2021 The complex relationship between violence and nonviolence in social movements. We are living in a time of uprisings that routinely involve physical confrontation—burning vehicles, barricades, vandalism, and scuffles between protesters and authorities. Yet the Left has struggled to incorporate rioting into theories of change, remaining stuck in recurring debates over violence and nonviolence. Civil resistance studies have popularized the term “strategic nonviolence,” spreading the notion that violence is wholly counter-productive. *Street Rebellion* scrutinizes recent research and develops a broad and grounded portrait of the relationship between strategic nonviolence and rioting in the struggle for liberation.

Civilian Oversight of Policing Jul 19 2019 As the issue of police conduct in both industrialized and non-industrialized countries has reached several international agendas, contributors from the social sciences, justice, and human rights examine recent experiences with and prospects for civilian oversight, and how the relatively new method of accountability has been interpreted and implemented in a wide range of jurisdictions around the world. Baltimore Revisited Mar 07 2021 Nicknamed both “Mobtown” and “Charm City” and located on the border of the North and South, Baltimore is a city of contradictions. From media depictions in *The Wire* to the real-life trial of police officers for the murder of Freddie Gray, Baltimore has become a quintessential example of a struggling American city. Yet the truth about Baltimore is far more complicated—and more fascinating. To help untangle these apparent paradoxes, the editors of *Baltimore Revisited* have assembled a collection of over thirty experts from inside and outside academia. Together, they reveal that Baltimore

has been ground zero for a slew of neoliberal policies, a place where inequality has increased as corporate interests have eagerly privatized public goods and services to maximize profits. But they also uncover how community members resist and reveal a long tradition of Baltimoreans who have fought for social justice. The essays in this collection take readers on a tour through the city's diverse neighborhoods, from the Lumbee Indian community in East Baltimore to the crusade for environmental justice in South Baltimore. *Baltimore Revisited* examines the city's past, reflects upon the city's present, and envisions the city's future.

The City of Mexico in the Age of Díaz Feb 06 2021 Mexico City assumed its current character around the turn of the twentieth century, during the dictatorship of Porfirio Díaz (1876-1911). In those years, wealthy Mexicans moved away from the Zócalo, the city's traditional center, to western suburbs where they sought to imitate European and American ways of life. At the same time, poorer Mexicans, many of whom were peasants, crowded into eastern suburbs that lacked such basic amenities as schools, potable water, and adequate sewerage. These slums looked and felt more like rural villages than city neighborhoods. A century—and some twenty million more inhabitants—later, Mexico City retains its divided, robust, and almost labyrinthine character. In this provocative and beautifully written book, Michael Johns proposes to fathom the character of Mexico City and, through it, the Mexican national character that shaped and was shaped by the capital city. Drawing on sources from government documents to newspapers to literary works, he looks at such things as work, taste, violence, architecture, and political power during the formative Díaz era. From this portrait of daily life in Mexico City, he shows us the qualities that “make a Mexican a Mexican” and have created a culture in which, as the Mexican saying goes, “everything changes so that everything remains the same.”

The Smart Enough City Jul 23 2022 Why technology is not an end in itself, and how cities can be “smart enough,” using technology to promote democracy and equity. Smart cities, where technology is used to solve every problem, are hailed as futuristic urban utopias. We are promised that apps, algorithms, and artificial intelligence will relieve congestion, restore democracy, prevent crime, and improve public services. In *The Smart Enough City*, Ben Green warns against seeing the city only through the lens of technology; taking an exclusively technical view of urban life will lead to cities that appear smart but under the surface are rife with injustice and inequality. He proposes instead that cities strive to be “smart enough”: to embrace technology as a powerful tool when used in conjunction with other forms of social change—but not to value technology as an end in itself. In a technology-centric smart city, self-driving cars have the run of downtown and force out pedestrians, civic engagement is limited to requesting services through an app, police use algorithms to justify and perpetuate racist practices, and governments and private companies surveil public space to control behavior. Green describes smart city efforts gone wrong but also smart enough alternatives, attainable with the help of technology but not reducible to technology: a livable city, a democratic city, a just city, a responsible city, and an innovative city. By recognizing the complexity of urban life rather than merely seeing the city as something to optimize, these Smart Enough Cities successfully incorporate technology into a holistic vision of justice and equity.

An Elusive Unity Aug 12 2021 Although many observers have assumed that pluralism prevailed in American political life from the start, inherited ideals of civic virtue and moral unity proved stubbornly persistent and influential. The tension between these conceptions of public life was especially evident in the young nation's burgeoning cities. Exploiting a wide range of sources, including novels, cartoons, memoirs, and journalistic accounts, James J. Connolly traces efforts to reconcile democracy and diversity in the industrializing cities of the United States from the antebellum period through the Progressive Era. The necessity of redesigning civic institutions and practices to suit city life triggered enduring disagreements centered on what came to be called machine politics. Featuring plebian leadership, a sharp masculinity, party discipline, and frank acknowledgment of social differences, this new political formula first arose in eastern cities during the mid-nineteenth century and became a subject of national discussion after the Civil War. During the Gilded Age and Progressive Era, business leaders, workers, and women proposed alternative understandings of how urban democracy might work. Some tried to create venues for

deliberation that built common ground among citizens of all classes, faiths, ethnicities, and political persuasions. But accommodating such differences proved difficult, and a vision of politics as the businesslike management of a contentious modern society took precedence. As Connolly makes clear, machine politics offered at best a quasi-democratic way to organize urban public life. Where unity proved elusive, machine politics provided a viable, if imperfect, alternative.

A Lorton Prison Project Aug 20 2019 This story captures the insight of a bright, intuitively smart young man who grew up in the low-income housing projects of Southeast, Washington, D.C. our nation's capital city. His name was Jimmy Black Blango, or better known as JB. He lived in the Barry Farms Housing projects at the height of a glorified drug market, in the midst of a culture of the celebrated thug life, gang violence, and mob-style crime. Aside from all that, it was a known fact that gang bangers pledged allegiance to serving time in jail. Even JB got caught up in an operation clean sweep on the streets of Washington, D.C., and was sent down to Lorton to serve his time. From there, his status on the streets of Washington, D.C., were upgraded to include street credits (i.e., the status of lieutenant) for serving a stretch at what was once called the most notorious prison on the East Coast, the Lorton Correctional Complex. Now, that the prison was mandated by federal law to shut down, the criminal element on the outside decided to bring their drug enterprise on the inside. This in an effort to establish networks that reached beyond the District, and extended to all points targeted south. Yet due to the pending closure of the Lorton Complex and the greed amongst thieves, backstabbing gangbangers, cold-blooded killers, malicious cutthroat staffers, etc., caused the whole scam to blow up. At the end of the day, a nefarious culmination of unsavory conduct caused many elements of the Lorton Complex to suffer its unfortunate demise.

Burglary Sep 20 2019 Burglary has all the credentials as the 'folk crime of the new millennium', and is regularly identified as one of the crimes most feared by the public. Victims are particularly affected by burglary, and burglary is generally at the centre of crime prevention and community safety strategies. This book provides an accessible, systematic account of burglary, focusing on the problem of crime in the first main part of the book, and on policy responses in the second. This book identifies the particular characteristics of burglary as a crime, drawing upon an extensive range of research in both the UK and elsewhere. It will be of interest to both students of criminology and criminal justice and practitioners in policing and crime prevention, and it looks at burglary in both national and international contexts. Professor Mawby is particularly well qualified to write on this subject, being involved in policy initiatives at local, national and international levels, as well as being editor of a leading crime prevention journal. accessible and authoritative account of one of the most important crimes and policy responses to it author ideally qualified in view of experience of local, national and international crime prevention initiatives.

A City Divided: Race, Fear and the Law in Police Confrontations Oct 26 2022 A City Divided tells the story of the case involving 18-year-old Jordan Miles and three Pittsburgh police officers. David Harris, a resident of Pittsburgh and the Sally Ann Semenko Chair at the University of Pittsburgh School of Law, describes what happened, explaining how a case that began with a young black man walking around the block in his own neighborhood turned Pittsburgh inside out, resulted in two investigations of the police officers and two federal trials. Harris, who has written, published and conducted research at the intersection of race, criminal justice and the law for almost thirty years, explains not just what happened but why, what the stakes are and, most importantly, what we must do differently to avoid these public safety catastrophes.

An examination of the department by experts who have been studying it for years, *The New York City Police Department: The Impact of Its Policies and Practices* provides a frank and open discussion about the NYPD from an elite group of scholars with varying viewpoints and concerns. The authors in this book are uniquely qualified to discuss and analyze the intricacies of policies and their impact. Researchers working the streets of Brooklyn expose stop-and-frisk policies. An expert academic covers marijuana arrest policies and their implications on citizens. The impact of the NYPD's development of innovative technology is demonstrated by a recently retired captain who worked on developing the department's real-time crime center. Presenting the insight of these and other experts, the book explores critical questions such as: How are victims of crime faring in the NYPD's performance management system? Does the NYPD manipulate crime reports to make them appear better? How does the NYPD handle mass demonstrations? How does the community view the NYPD? How can an individual start a grassroots movement to influence policy and practices? The book explores hiring, firing, and retention; analyzes crime-fighting strategies; discusses the drop in homicide rate in recent years; and reviews legal concerns and the response to public demonstrations such as the Occupy Wall Street movement. The final chapter evaluates implications of the policies the NYPD follows and analyzes how it affects policing worldwide. A scintillating exposé on police culture and resistance to change, the book is destined to encourage enhanced social discourse on the topic for years to come.

How Countries Count Crime Mar 27 2020 This edited collection illuminates the weaknesses and strengths of crime reporting across a wide range of countries, with a focus on democratic countries in which the police bear some accountability to citizens. In one compendium, for the first time, this book documents how different countries record (or fail to record) crimes. With chapters written by native authors who are experts on the practices of their respective countries, the book explores practices in 15 different countries across the globe. Organized with a parallel, country-by-country approach, the book describes and analyzes methods police use to record crimes, with the awareness that the counting of crimes is not only an issue of empirical measurement, but also one of social construction. Crime reporting practices vary widely by country. In some cases, reports are not taken, and in others, reports are carefully based on preliminary investigations. Willful manipulation of crime reports can and does occur, and the book explores related factors such as political pressure, personal ambition, community safety, and more. Discussion questions at the end of each chapter help the reader evaluate the significant issues influencing each country. The editors conclude by suggesting best practices for crime reporting and the collection of crime data. A unique addition to this book is a foreword by Tofiq Murshudlu, the Head of Drugs and Crime for the United Nations in Vienna. The book is intended for a wide range of audiences, including policing scholars, law enforcement and community leaders, and students of criminal justice.

Civic Crisis -- Civic Challenge Jan 17 2022

Crashing the Party Sep 01 2020 Over the past fifteen years, people in the United States—and dissidents in particular—have witnessed a steady escalation of the National Security State, including invasive

surveillance and infiltration, indiscriminate police violence, and unlawful arrests. These concerted efforts to spy on Americans and undermine meaningful social change are greatly enhanced by the coordination of numerous local, state, and federal agencies often operating at the behest of private corporations. Normally associated with the realities of a post-9/11 world, *Crashing the Party* shows how these developments were already being set in motion during the Republican National Convention (RNC) protests in 2000. It also documents how, in response, dissidents confronted new forms of political repression by pushing legal boundaries and establishing new models of collective resistance. *Crashing the Party* explains how the events of 2000 acted as a testing ground in which Philadelphia Police Commissioner John Timoney was able to develop repressive methods of policing that have been used extensively across the U.S. ever since. At the same time, these events also provided a laboratory for the radical, innovative, and confrontational forms of legal support carried out by R2K Legal, a defendant-led collective that raised unprecedented amounts of money for legal defense, used a unique form of court solidarity to overcome hundreds of serious charges, and implemented a PR campaign that turned the tide of public opinion in favor of dissidents. While much has been written about the global-justice era of struggle, little attention has been paid to the legal struggles of the period or the renewed use of solidarity tactics in jail and the courtroom that made them possible. By analyzing the successes and failures of these tactics, *Crashing the Party* offers rare insight into the mechanics and concrete effects of such resistance. In this way, it is an invaluable resource for those seeking to confront today's renewed counterintelligence tactics.

[Policing Cities](#) Dec 24 2019 *Policing Cities* brings together international scholars from numerous disciplines to examine urban policing, securitization, and regulation in nine countries and the conceptual issues these practices raise. Chapters cover many of the world's major cities, including New York, Beijing, Paris, London, Berlin, Mexico City, Johannesburg, Rio de Janeiro, Boston, Melbourne, and Toronto, as well as other urban areas in Britain, United States, South Africa, Germany, Australia and Georgia. The collection examines the activities and reforms of the traditional public police, but also those of emerging public and private policing agents and spaces that fall outside the public police's purview and which previously have received little attention. It explores dramatic changes in public policing arrangements and strategies, exclusion of urban homeless people, new forms of urban surveillance and legal regulation, and securitization and militarization of urban spaces. The core argument in the volume is that cities are more than mere background for policing, securitization and regulation. Policing and the city are intimately intertwined. This collection also reveals commonalities in the empirical interests, methodological preferences, and theoretical concerns of scholars working in these various disciplines and breaks down barriers among them. This is the first collection on urban policing, regulation, and securitization with such a multi-disciplinary and international character. This collection will have a wide readership among upper level undergraduate and graduate level students in several disciplines and countries and can be used in geography/urban studies, legal and socio-legal studies, sociology, anthropology, political science, and criminology courses.
