[Emergency Responder](#) May 05 2020 Emergency Responder: Advanced First Aid for Non-EMS Personnel is

not just another first-aid book. Designed for working professionals, this flexible program blends textbook with online modules and instructor-led hands-on training events. Drawing from their years of experience training and developing emergency response teams, the authors cover the most important skills needed in order to effectively respond to life-threatening events. Carefully designed skill sheets included in the text assist readers in developing the competency necessary to perform each skill with accuracy and confidence. Establishing a foundation in the basic concepts of emergency medical care, the text presents in a logical, easy-to-follow format many of the most common illnesses and injuries responders are likely to encounter. The authors provide realistic depth and breadth of information in a way that will make you successful caring for people who have fallen victim to sudden illness or injury.

Emergency Medical Responder Nov 30 2019 The leader in the field, Emergency Medical Responder, Ninth Edition, provides clear first responder-level training for fire service, emergency, law enforcement, military, civil, and industrial personnel. The new ninth edition retains many successful features from previous editions and includes new topics and concepts that have recently become part of most Emergency Medical Responder programs. The foundation of this text is the new National Emergency Medical Services Education Standards for Emergency Medical Responder, and it also includes the 2010 American Heart Association guidelines for Cardiopulmonary Resuscitation and First Aid.

[Heartsaver First Aid Student Workbook](#) Feb 23 2022 The Heartsaver First Aid course trains participants first aid basics for the most common first aid emergencies, including how to recognize them, how to call for help, and how to perform lifesaving skills.

Evidence-Guided Practice Sep 28 2019 Athletic trainers must have a foundation in the concepts of evidence-based practice to deliver patient care in an effective way. It is critical that students and clinicians formulate clinical plans that will be effective for individual patients. With that goal in mind, Evidence-Guided Practice: A Framework for Clinical Decision Making in Athletic Training teaches the athletic trainer

that evidence-based practice concepts must be incorporated into daily clinical practice. Written in a conversational tone, Drs. Bonnie Van Lunen, Dorice Hankemeier, and Cailee Welch provide a practical and concise resource for athletic trainers to use when interpreting what the available evidence means for them and how it can be effectively applied in daily patient care. The competencies within athletic training and other health care professions were considered when each chapter was constructed. Special care was taken to include examples that are specific to athletic training and instructional applications for educators. What Is Inside: Types of research design Foundations of research and statistics Introduction to critical appraisal Concepts of validity Diagnostic accuracy Disablement models Patient-oriented outcome assessments Health care informatics The first of its kind, *Evidence-Guided Practice: A Framework for Clinical Decision Making in Athletic Training* is the only resource athletic training students, clinicians, or other health care professionals will need to properly put evidence-based concepts into practice.

[Introduction to Healthcare in a Flash!](#) Oct 29 2019 Take a unique, multimedia approach to understanding the world of health care—from the office to clinical settings. Learn what it means to work as a team and communicate effectively. Then examine the basics of the human body, how to assess patients, the legal and ethical aspects of health care, and how to successfully land your first job as a healthcare professional.

[2015 Handbook of Emergency Cardiovascular Care for Healthcare Providers](#) Jan 13 2021 Product 15-3105
[Basic Life Support Provider Manual - A Comprehensive Guide Covering the Latest Guidelines](#) Jan 01 2020
Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-choice questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that

can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings.
