Ontology Engineering Nov 15 2021 This book constitutes the thoroughly refereed post-workshop proceedings of the 12th OWL: Experiences and Directions Workshop, OWLED 2015, held in Bethlehem, PA, USA, in October 2015, co-located with ISWC 2015, the International Semantic Web Conference. The 18 revised papers presented were carefully reviewed and selected from 35 initial submissions. Bridging the gap between ontology engineering practices and software engineering, the papers describe reuse methods employed throughout the ontology development cycle; modeling / terminological decisions, alignment and comparison between ontologies, how ontologies are stored, versioned, distributed, and consumed over the Web.

Practical Applications of Low Power Lasers Feb 24 2020

Readings from Programming with Java Sep 01 2020 Ideal for anyone who has never programmed, McMullen/Matthews/Parsons' READINGS FROM PROGRAMMING WITH JAVA uses a beginner's approach that combines conceptual content with rich examples and hands-on learning activities. Straightforward and student friendly, it emphasizes fundamental computer concepts from a Java programming approach in a clear presentation with little technical jargon. Modules introduce key computer science concepts, procedural programming and object-oriented programming in short segments. Relevant real-world examples, streamlined code and descriptive figures ensure you have a thorough understanding of today's computing concepts. As you build on your computer science knowledge, you will also strengthen your critical-thinking and problem-solving

skills -- and confidence. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Introduction to Psychology Mar 27 2020 Featuring a look and style that's more like a magazine than a textbook, Plotnik's INTRODUCTION TO PSYCHOLOGY, Tenth Edition will draw you in and show you how exciting the study of psychology can be. This modular, visual approach to the fundamentals of psychology--the pioneer of the visual or magazine style approach--makes even the toughest concepts engaging and entertaining. Each and every page is individually planned, written, and formatted to effectively incorporate the use of Visual Cues, which help you to better remember information. Extensively updated, the text also utilizes chunking, a method of breaking concepts down into small, easily digested sections that help you learn at your own pace. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Psychology: Modules for Active Learning Jul 19 2019 PSYCHOLOGY: MODULES FOR ACTIVE LEARNING is a best-selling text by renowned author and educator Dennis Coon and coauthor John O. Mitterer. This thirteenth edition continues to combine the highly effective SQ4R (Survey, Question, Read, Recite, Reflect, Review) active learning system, an engaging style, appealing visuals, and detailed coverage of core topics and cutting-edge research in one remarkable, comprehensive text. Fully updated and reorganized, the new edition builds on the proven modular format, extensive special features, and teaching and learning tools integrated throughout the text. While the text provides a broad overview of essential psychology topics ideal for introductory courses, its modular design also readily supports more specialized curricula, allowing instructors to use the self-contained instructional units in any combination and order. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Logic Programming and Nonmonotonic Reasoning Jul 31 2020 This volume contains the refereed proceedings of the 11th International Conference

on Logic Programming and Nonmonotonic Reasoning, LPNMR 2011, held in May 2011 in Vancouver, Canada. The 16 revised full papers (13 technical papers, 1 application description, and 2 system descriptions) and 26 short papers (16 technical papers, 3 application description, and 7 system descriptions) which were carefully reviewed and selected from numerous submissions, are presented together with 3 invited talks. Being a forum for exchanging ideas on declarative logic programming, nonmonotonic reasoning, and knowledge representation, the conference aims to facilitate interactions between those researchers and practitioners interested in the design and implementation of logic-based programming languages and database systems, and those who work in the area of knowledge representation and nonmonotonic reasoning.

DNA Computing Jul 11 2021 This book constitutes the thoroughly refereed postproceedings of the 13th International Meeting on DNA Computing, DNA 13, held in Memphis, TN, USA, June 4-8, 2007. The 15 revised full papers and 5 short demos together with 10 poster abstracts presented were carefully selected during two rounds of reviewing and improvement from an initial total of 62 submissions. The papers are organized in topical sections on Self Assembly, Biomolecular Machines and Automata, Codes for DNA Memories and Computing, Novel Techniques for DNA Computing in Vitro, Novel Techniques for DNA Computing in Silico as well as Models and Languages.

Ancient Greek I Jul 23 2022 In this elementary textbook, Philip S. Peek draws on his twenty-five years of teaching experience to present the ancient Greek language in an imaginative and accessible way that promotes creativity, deep learning, and diversity. The course is built on three pillars: memory, analysis, and logic. Readers memorize the top 250 most frequently occurring ancient Greek words, the essential word endings, the eight parts of speech, and the grammatical concepts they will most frequently encounter when reading authentic ancient texts. Analysis and logic exercises enable the translation and parsing of genuine ancient Greek sentences, with compelling reading selections in English and in Greek offering starting points for contemplation, debate, and reflection. A series of embedded Learning Tips help teachers and students to think in practical and imaginative ways about how they learn. This combination of memory-based learning and concept- and skill-based learning gradually builds the confidence of the reader, teaching them how to learn by guiding them from a familiarity with the basics to proficiency in reading this beautiful language. *Ancient Greek I: A 21st-Century Approach* is written for high-school and university students, but is an instructive and rewarding text for anyone who wishes to learn

ancient Greek.

Sustainability Practice and Education on University Campuses and Beyond Feb 18 2022 Campus activities for sustainable development are an effective way of learning and implementing sustainability in surrounding communities and industry. A college campus is an ideal place to practice and test new ideas and to learn valuable lessons from the results and mistakes. Sustainability Practice and Education on University Campuses and Beyond showcases many ideas and endeavors pursued on college campuses in the form of case studies. These case studies include past, current and projected activities to green college campuses. Specific topics covered in this book include student-driven and college-driven environmental sustainability programs in undergraduate and graduate classes, issues in teaching environmental sustainability, the LEED certification of universities, issues of shrinking cities, and a comparison of sustainable military bases with college campuses. Readers will be able to clearly understand the concept of sustainable development through a textbook approach to 'crazy' ideas presented in the book. In addition, the pedagogical challenges in sustainability education mentioned in the book address key issues arising due to the multidisciplinary nature of sustainability curricula. Sustainability Practice and Education on University Campuses and Beyond is a good resource on sustainability in environmental science courses for college students, faculty and sustainability-related researchers. Decision makers in government and industry positions looking for ideas for promoting sustainable development can also benefit from the contents of this book.

EdPsych Modules Dec 04 2020 EdPsych Modules uses an innovative modular approach and case studies based on real-life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct, stand-alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood, elementary, middle, and secondary classrooms, providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity, emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status, and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules, and expanded coverage of diversity in new diversity-related research. Part 2 MRCOG: Single Best Answer Questions Apr 20 2022 Part 2 MRCOG: SBA Questions contains invaluable preparation and practice for candidates undertaking the Royal College of Obstetricians and Gynaecologists Part 2 MRCOG examination. It contains 400 practice questions written by a highly experienced team of MRCOG question writers, alongside detailed answers referencing each question to either an RCOG, NICE or WHO guideline, or an article in the professional journal 'The Obstetrician & Gynaecologist'. This will enable candidates to understand the reasoning and knowledge base behind the question, as well as giving them a clear reference should they wish to read further around the subject. The first part of the book introduces and explains the new format of the Part 2 MRCOG exam, giving insightful advice on the skills required to write a good SBA question. The second part of the book contains chapters matched to the 15 of the 19 modules of the core curriculum, giving a comprehensive range of questions and answers with detailed explanations and references. For anyone preparing for the Part 2 MRCOG exam, this book will provide extensive and comprehensive practice and guidance from an expert author team.
