Pedagogical Norms for Second and Foreign Language Learning and Teaching Jul 29 2019 The concept of Pedagogical Norm is grounded in both sociolinguistic and psycholinguistic principles. Pedagogical norms guide the selection and sequencing of target language features for language teaching and learning. This book both situates and expands on this concept highlighting the interaction of research and pedagogy. The papers collectively illustrate how the concept of pedagogical norm applies to all components of language, including phonology, morphology, syntax, and discourse. The book begins with a discussion of definitions including papers that trace the history of the concept and define what is meant by norms. Also included are papers that apply the concept of pedagogical norms in specific contexts (e.g., intonation, morphology) and to specific languages. Finally, pedagogical norms are extended beyond the more traditional areas of grammatical competence to such disparate areas as listening, discourse, and circumlocution.

Advanced Grammar in Use without answers Jul 09 2020 Advanced Grammar in Use contains 120 units of grammar explanation and practice exercises. It provides coverage of those language areas advanced-level students will find most rewarding to study. It retains the clarity of presentation of other books in the 'in Use' family. Two-page units present grammar explanation and examples, including typical student mistakes, on left-hand pages, and useful and varied practice on right-hand pages. Extra practice exercises at the back provide further challenging and contrastive practice of grammar points from different units. A study guide helps students find those areas most appropriate for their study. Grammar areas are cross-referenced throughout. There are useful appendices dealing with verb forms, and a glossary and all answers are given at the back.

Evaluating Second Language Education Jan 03 2020 "Counter Responsibility for planning language teaching programs now carries with it a strong element of accountability. Evaluation of the whole process of course design, development, and implementation is therefore a necessary area of activity for course designers, language planners, and researchers. This book brings together accounts of recent work in this increasingly important field and will be a valuable resource both for those already engaged in evaluation and for those in training. Part One presents a review of the literature, covering past developments in the wider field of educational evaluation, as well as specifically in second language education. Part Two contains a series of eight original case-studies, written by scholars involved in evaluations in widely divergent settings. The focus in each case is on how the evaluator addresses the difficulties central to each study, and the findings are also included. The final Part Three provides practical guidance for evaluators, offering suggestions about how to set up and carry out evaluations in any given setting."--Publisher's website.

Summary and Note-Taking Dec 14 2020 This popular book, endorsed by Cambridge, provides summary and note-taking practice for the revised syllabus of the Cambridge IGCSE examination in English as a Second Language. The exercises are also helpful for studies across the curriculum, and as preparation for the demands of academic writing. The Revised Edition includes linked summary exercises based on the preceding note-taking activities, and a Writing Tasks section containing topic-related writing tasks.

Accents of English: Volume 2 Jun 07 2020 Accents of English is about the way English is pronounced by different people in different places. Volume 1 provides a synthesizing introduction, which shows how accents vary not only geographically, but also with social class, formality, sex and age; and in volumes 2 and 3 the author examines in greater depth the various accents used by people who speak English as their mother tongue: the accents of the regions of England, Wales, Scotland and Ireland (volume 2), and of the USA, Canada, the West Indies, Australia, New Zealand, South Africa, India, Black Africa and the Far East (volume 3). Each volume can be read independently, and together they form a major scholarly survey, of considerable originality, which not only includes descriptions of hitherto neglected accents, but also examines the implications for phonological theory. Readers will find the answers to many questions: Who makes 'good' rhyme with 'mood'? Which accents have no voiced sibilants? How is a Canadian accent different from an American one, a New Zealand one from an Australian one, a Jamaican one from a Barbadian one? What are the historical reasons for British-American pronunciation differences? What sound changes are currently in progress in New York, in London, in Edinburgh? Dr Wells has written principally for students of linguistics, phonetics and English language, but the motivated general reader will also find the study both fascinating and rewarding.

How To Make Holsters Jul 21 2021 HOLSTERS have played, and are still playing, a very important part in the history of man. And, since the making and manufacture of the first hand guns, methods for concealing, easier handling and carrying of these weapons have been devised. Trial and error being the surest way of improvement, holster making has now advanced to fill almost every need and requirement of the pistol user. Today, with the hundreds of Makes, Models, and barrel lengths of hand guns, it would be virtually impossible to reproduce holster patterns for each and every one into book form. The Holster Patterns presented in this book are a cross-section of a few of the most popular Makes and Models of the guns in use today; with alternate designs and added barrel lengths as space permits. Most of the Carving Designs presented can be altered for shorter, longer, or odd barrel lengths by adding or omitting a leaf, scroll, etc. The designs can also be used on similar holster patterns for other guns by "stretching" or "squeezing" the flowers, leaves, etc., to fit the confines of the border lines. With a little Imagination and Ingenuity, the Carving Designs in this book can be used on hundreds of holster patterns. Remember... the patterns shown will also fit many other similar makes and models of guns ... too numerous to mention. The purpose of this book is to assist and instruct the craftsman in various methods of Holster Construction and Holster Pattern Making. Each phase is shown with clearly defined step-by-step photos and drawings. It is hoped that this book will aid the Self Taught Student, Instructor, and Professional Craftsman alike to further their knowledge of "How To Make Holsters" for Profit, Personal Satisfaction and Fun! A "special" thanks to my wife, Terry, who has devoted countless hours and painstaking effort to produce all of the photographs appearing in this book. Many thanks to Ralph Tiner ... Sporting Goods Center, Hemet, Calif. ... for his willing cooperation in supplying guns and information. Thanks to Lee Kelly, U. S. Forestry Service, and many other friends who have given unselfishly of their time and assistance. To the Leathercraftsman: Thanks for your patience in awaiting the first publication of "How To Make Holsters" ... Many Happy Hours! Sincerely, Al Stohlman
