An Introduction to Cyberpsychology Jul 04 2020 An Introduction to Cyberpsychology is the first book to provide a student-oriented introduction to this rapidly growing and increasingly studied topic. It is designed to encourage students to critically evaluate the psychology of online interactions, and to develop appropriate research methodologies to complete their own work in this field. The book is comprised of four main sections: An overview of cyberpsychology and online research methodologies Social psychology in an online context The practical applications of cyberpsychology The psychological aspects of other technologies. Each chapter includes: Explanations of key terms and a glossary to facilitate understanding Content summaries to aid student learning Activity boxes, discussion questions and recommended reading to guide further study. Further resources for students and instructors are available on the book's companion website, including audio and video links, essay questions, a multiple-choice test bank, and PowerPoint lecture slides. Uniquely combining a survey of the field with a focus on the applied areas of psychology, the book is designed to be a core text for undergraduate modules in cyberpsychology and the psychology of the internet, and a primer for students of postgraduate programs in cyberpsychology.
New Pattern NTA JEE Main Quick Guide in Physics with Numeric Answer Questions 3rd Edition May 26 2022 As NTA introduces Numeric Answer Questions in JEE Main, Disha launches the Questions' the 3rd latest updated edition of 'New Pattern NTA JEE Main Quick Guide in Physics with Numeric Answer Questions'. This study material is developed for quick revision and practice of the complete syllabus of the JEE Main Exam in a short span of 40 days. The book can prove to the ideal material for class 12 students as they can utilise this book to revise their preparation immediately after the board exams. The book contains 27 chapters of class 11 & 12 and each Chapter contains: # JEE Main 6 Years at a Glance i.e., JEE Main (2019 - 2014) with TOPIC-WISE Analysis. # Detailed Concept Maps covers entire JEE Syllabus for speedy revision. # IMPORTANT/ CRITICAL Points of the Chapter for last minute revision. # TIPS to PROBLEM SOLVING – to help students to solve Problems in shortest possible time. # Exercise 1 CONCEPT BUILDER - A Collection of Important Topic-wise MCQs to Build Your Concepts. # Exercise 2 CONCEPT APPLICATOR – A Collection of Quality MCQs that helps sharpens your concept application ability. # Exercise 3 Numeric Answer Questions – A Collection of Quality Numeric Answer Questions as per the new pattern of JEE. # Answer Keys & Detailed Solutions of all the Exercises and Past years problems are provided at the end of the chapter.
Good Small Business Guide 2013, 7th Edition Oct 26 2019 Fully updated for this 7th annual edition, the Good Small Business Guide 2013 is packed with essential advice for small business owners or budding entrepreneurs. Offering help on all aspects of starting, running and growing a small business, including: planning, setting up or acquiring a business, getting to grips with figures, marketing, selling online, and managing yourself and others. Containing over 140 easy-to-read articles and an extensive information directory this fully updated guide offers help on all aspects of starting and growing a small business. Features a foreword from the National Chairman of the Federation of Small Businesses.
Instruction Modeling Sep 17 2021 "Blended learning" is an educational approach that combines online and face-to-face components in the classroom, and it is becoming popular in American schools. But the quality of these programs is inconsistent; some are based on scientific findings on how children learn, while others lack such support. In fact, very little reliable information is currently available on how to create, use, and measure the results of blended learning programs. Instruction Modeling is both a practical guide to developing and implementing blended learning programs and a first-hand account of the creation of one such program, Reasoning Mind. As Reasoning Mind cofounder and instructional designer George Khachatryan explains, instruction modeling is a leading method for designing blended learning programs: carefully study high-quality offline instruction and build online programs to recreate it on a larger scale. This book describes in practical terms how to create a blended learning program, exploring a wide range of scientifically-supported approaches. Some programs draw on cognitive psychology, for instance, others on research in gaming, and still others on modern statistical methods such as "big data." Instruction modeling is unique amongst these approaches in that it relies above all on a deep understanding of the techniques and qualities of the world's best teachers. Making a strong case for broader use of instruction modeling, this book will be of special interest to teachers and education researchers, and an indispensable resource for those interested in the technique for its application in new contexts.
CIM Coursebook Marketing Communications 07/08 Jun 14 2021 BH CIM Coursebooks are crammed with a range of learning objective questions, activities, definitions and summaries to support and test your understanding of the theory. The 07/08 editions contains new case studies which help keep the student up to date with changes in Marketing Communication strategies. Carefully structured to link directly to the CIM syllabus, this Coursebook is user-friendly, interactive and relevant. Each Coursebook is accompanied by access to MARKETINGONLINE (www.marketingonline.co.uk), a unique online learning resource designed specifically for CIM students which can be accessed at any time.
Educational Technology Aug 24 2019
<u>Economic Analysis of the Digital Economy</u> Feb 08 2021 There is a small and growing literature that explores the impact of digitization in a variety of contexts, but its economic consequences, surprisingly, remain poorly understood. This volume aims to set the agenda for research in the economics of digitization, with each chapter identifying a promising area of research. Economics of Digitizationidentifies urgent topics with research already underway that warrant further exploration from economists. In addition to the growing importance of digitization itself, digital technologies have some features that suggest that many well-studied economic models may not apply and, indeed, so many aspects of the digital economy throw normal economics in a loop.Economics of Digitization will be one of the first to focus on the economic implications of digitization and to bring together leading scholars in the economics of digitization to explore emerging research.
<u>ECEL2009- 8th European Conference on E-Learning,</u> Dec 21 2021
Undoing Ethics Feb 29 2020 Over the past decade, researchers from different academic disciplines have paid increasing attention to the productivity of online environments. The ethical underpinnings of research in such settings, however, remain contested and often controversial. As traditional debates have been reignited by the need to respond to the particular characteristics of technologically-mediated environments, researchers have entered anew key debates regarding the moral, legal and regulative aspects of research ethics. A growing

trend in this work has been towards the promotion of localized and contextualized research ethics - the suggestion that the decisions we make should be informed by the nature of the environments we study and the habits/expectations of participants within them. Despite such moves, the relationship between the empirical, theoretical and methodological aspects of Internet research ethics remains underexplored. Drawing from ongoing sociological research into the practices of media cultures online, this book provides a timely and distinctive response to this need. This book explores the relationship between the production of ethical stances in two different contexts: the ethical manoeuvring of participants within online media-fan communities and the ethical decision-making of the author as Internet researcher, manoeuvring, as it were, in the academic community. In doing so, the book outlines a reflexive framework for exploring research ethics at different levels of analysis; the empirical settings of research; the theoretical perspectives which inform the researcher's objectification of the research settings; and the methodological issues and practical decisions that constitute the activity as research. The analysis of these different levels develops a way of thinking about ethical practice in terms of stabilizing and destabilizing moves within and between research and researched communities. The analysis emphasizes the continuities and discontinuities between both research practice and online media-fan activity, and social activity in on and offline environments.

Mobile Technology for Children Apr 12 2021 Children are one of the largest new user groups of mobile technology -- from phones to micro-laptops to electronic toys. These products are both lauded and criticized, especially when it comes to their role in education and learning. The need has never been greater to understand how these technologies are being designed and to evaluate their impact worldwide. Mobile Technology for Children brings together contributions from leaders in industry, non-profit organizations, and academia to offer practical solutions for the design and the future of mobile technology for children. *First book to present a multitude of voices on the design, technology, and impact of mobile devices for children and learning *Features contributions from leading academics, designers, and policy makers from nine countries, whose affiliations include Sesame Workshop, LeapFrog Enterprises, Intel, the United Nations, and UNICEF *Each contribution and case study is followed by a best practice overview to help readers consider their own research and design and for a quick reference

Educational Technology Integration Foundations Jun 22 2019 Educational Technology is a field that can be complex with many facets that need to be taken into consideration to successfully integrate into classrooms. This book is a accumulation of many years work in the field, and covers every aspect of integration. The book is intended as a resource to skip through to help guide those looking for ideas, especially for those new to technology. For those who have a solid foundation can find information about often overlooked topics, or topics not often thought about that can improve a pre-existing program.

Gaming and Technology Addiction: Breakthroughs in Research and Practice May 14 2021 Addiction is a powerful and destructive condition impacting large portions of the population around the world. While typically associated with substances such as drugs and alcohol, technology and gaming addiction have become a concern in recent years as technology use has become ubiquitous. Gaming and Technology Addiction: Breakthroughs in Research and Practice explores the social and psychological implications of technology and gaming addiction in addition to ways to manage and treat this unique form of addiction. Focusing on emerging research, case studies, and future outlooks, this comprehensive publication is an essential resource for psychologists, counselors, graduate-level students, and researchers studying psychology and technology use.

Advances in Autism Research Jun 02 2020 This book represents one of the most up-to-date collections of articles on clinical practice and research in the field of Autism Spectrum Disorders (ASD). The scholars who contributed to this book are experts in their field, carrying out cutting edge research in prestigious institutes worldwide (e.g., Harvard Medical School, University of California, MIND Institute, King's College, Karolinska Institute, and many others). The book addressed many topics, including (1) The COVID-19 pandemic; (2) Epidemiology and prevalence; (3) Screening and early behavioral markers; (4) Diagnostic and phenotypic profile; (5) Treatment and intervention; (6) Etiopathogenesis (biomarkers, biology, and genetic, epigenetic, and risk factors); (7) Comorbidity; (8) Adulthood; and (9) Broader Autism Phenotype (BAP). This book testifies to the complexity of performing research in the field of ASD. The published contributions underline areas of progress and ongoing challenges in which more certain data is expected in the coming years. It would be desirable that experts, clinicians, researchers, and trainees could have the opportunity to read this updated text describing the challenging heterogeneity of Autism Spectrum Disorder.

Research Anthology on Developing Effective Online Learning Courses Aug 29 2022 In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success.

Online Distance Learning Course Design and Multimedia in E-Learning Mar 12 2021 In recent years, the rampant development of worldwide communications and powerful modern technologies has reformulated the idea of distance learning and the transmission of higher education content. Combined with these new developments and the outcomes of the COVID-19 pandemic, there is an apparent need for a thorough discussion on all features of e-learning. Online Distance Learning Course Design and Multimedia in E-Learning disseminates research, experiences, and philosophies surrounding innovation within higher education online teaching and learning environments. It includes case studies of relevant and fruitful applications, practical challenges, and examinations of the most recent innovations. Covering topics such as online management education, student engagement, and gamification, this book is an essential resource for academicians, researchers, educators, pre-service educators, principals, administrators, consultants, instructional designers, technologists, computer scientists, and policymakers.

Multichannel Marketing Nov 19 2021 No longer can the offline remain separate from the online. Integrated, customer-centric, cross-channel marketing campaigns persuade customers to act, provide greater ROI, and ultimately improve your organization's bottom line. This must-have guide synthesizes the successful methods and metrics that online, direct, and brand marketers have employed for years so that you can develop, implement, and measure successful cross-channel campaigns. Multichannel marketing expert Akin Arikan takes you from customer acquisition to customer relationship management with strategic advice, effective case studies, and proven metrics.

Microsoft 365 Modern Desktop Administrator Guide to Exam MD-100: Windows 10 Jan 28 2020 Wright/Plesniarski's MICROSOFT SPECIALIST

GUIDE TO MICROSOFT EXAM MD-100: WINDOWS 10 ensures you are well prepared for the Microsoft exam as well as a successful career in system administration. Completely up to date, this user-friendly guide walks you step by step through all aspects of installing, configuring and maintaining Windows 10 as a client operating system. Engaging exercises throughout enable you to experience the processes involved in Windows 10 configuration and management -- with plenty of troubleshooting tips to offer solutions to common problems along the way. Review Questions help you prepare for the Microsoft certification exam, while Case Projects provide practice in situations that must be managed in a live networking environment. Giving you added flexibility, labs can be completed on physical or virtual machines. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Digital Transformation and Global Society Jun 26 2022 This volume constitutes refereed proceedings of the 6th International Conference on Digital Transformation and Global Society, DTGS 2021, held as a virtual event in June 2021. Due to the COVID-19 pandemic the conference was held online. The 34 revised full papers and 4 short papers presented in the volume were carefully reviewed and selected from 95 submissions. The papers are organized in topical sections on eSociety: social informatics and digital inclusion issues; ePolity: e-governance and regulation; eCity: smart cities and urban planning; eHumanities: digital education and research methods; eCommunication: online discources and attitudes; eEconomy: challenges of the COVID-19 pandemic; eEconomy: e-commerce research.

Microsoft Specialist Guide to Microsoft Windows 10 (Exam 70-697, Configuring Windows Devices) Dec 29 2019 Prepare for a career in network administration using Microsoft Windows 10 with the real-world examples and hands-on activities that reinforce key concepts in MICROSOFT SPECIALIST GUIDE TO MICROSOFT WINDOWS 10. This book also features troubleshooting tips for solutions to common problems that readers will encounter in Windows 10 administration. This book's in-depth study focuses on all of the functions and features of installing, configuring, and maintaining Windows 10 as a client operating system. Activities let learners experience first-hand the processes involved in Windows 10 configuration and management. Review Questions reinforce concepts and help readers prepare for the Microsoft certification exam. Case Projects offer a real-world perspective on the concepts introduced in each chapter, helping readers prepare for even the most challenging situations that must be managed in a live networking environment. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Business Intelligence and Modelling Oct 19 2021 This book highlights interdisciplinary insights, latest research results, and technological trends in Business Intelligence and Modelling in fields such as: Business Intelligence, Business Transformation, Knowledge Dissemination & Implementation, Modeling for Logistics, Business Informatics, Business Model Innovation, Simulation Modelling, E-Business, Enterprise & Conceptual Modelling, etc. The book is divided into eight sections, grouping emerging marketing technologies together in a close examination of practices, problems and trends. The chapters have been written by researchers and practitioners that demonstrate a special orientation in Strategic Marketing and Business Intelligence. This volume shares their recent contributions to the field and showcases their exchange of insights.

Handbook of Research on Emerging Practices and Methods for K-12 Online and Blended Learning Jul 28 2022 National efforts have been made to encourage technology integration in teacher preparation with expectations for frequent and successful applications with K-12 learners. While online learning has become pervasive in many fields in education, it has been somewhat slow to catch on in K-12 settings. The Handbook of Research on Emerging Practices and Methods for K-12 Online and Blended Learning is a collection of innovative research on the applications of technology in online and blended learning environments in order to develop quality courses, explore how content is delivered across disciplines and settings, and support the formation of relationships and enrichment opportunities. While highlighting topics including learning initiatives, institutional policies, and program structures, this book is ideally designed for teachers, principals, early childhood development centers, university faculty, administrators, policymakers, researchers, and practitioners.

Children's Games in the New Media Age Jan 22 2022 The result of a unique research project exploring the relationship between children's vernacular play cultures and their media-based play, this collection challenges two popular misconceptions about children's play: that it is depleted or even dying out and that it is threatened by contemporary media such as television and computer games. A key element in the research was the digitization and analysis of Iona and Peter Opie's sound recordings of children's playground and street games from the 1970s and 1980s. This framed and enabled the research team's studies both of the Opies' documents of mid-twentieth-century play culture and, through a two-year ethnographic study of play and games in two primary school playgrounds, contemporary children's play cultures. In addition the research included the use of a prototype computer game to capture playground games and the making of a documentary film. Drawing on this extraordinary data set, the volume poses three questions: What do these hitherto unseen sources reveal about the games, songs and rhymes the Opies and others collected in the mid-twentieth century? What has happened to these vernacular forms? How are the forms of vernacular play that are transmitted in playgrounds, homes and streets transfigured in the new media age? In addressing these questions, the contributors reflect on the changing face of childhood in the twenty-first century - in relation to questions of gender and power and with attention to the children's own participation in producing the ethnographic record of their lives.

Why Great Leaders Don't Take Yes for an Answer Sep 29 2022 Make better decisions! Michael A. Roberto will help you achieve deeper consensus, get past groupthink and "yes men," and achieve superior results in every decision you make -- especially your most complex and highest-stakes decisions! Roberto's Why Great Leaders Don't Take Yes for an Answer, Second Edition gives you a powerful framework for promoting honest, constructive dissent and skepticism; test your assumptions; more thoroughly and fairly considering "best alternatives"; crisply coming to closure; and aligning your entire organization behind the decision you make. In this new edition, Roberto presents new cases from Google, Ford, and Intuit, and expands coverage to more deeply illuminate his decision-making approach. Offering both positive and negative examples, he presents a well rounded view of how to determine when 'yes' means 'yes', when it doesn't, and what to do when it doesn't. Throughout, Roberto demonstrates why "good process entails the astute management of the social, political and emotional aspects of decision making" -- in other words, why effective leaders are well served by carefully "deciding how to decide." You'll learn how to: Test and probe what your team really believes, and get the truth and candor you really need Encourage constructive objections -- and keep them constructive Improve team management, mitigate risk, identify opportunities, and promote integrity Build stronger commitment amongst the people who'll implement your decisions

Conference proceedings. ICT for language learning Aug 05 2020

Literacy Research for Political Action and Social Change Mar 31 2020 This book and its contributors - all of whom view literacy research as explicitly political and potentially transformative - provide images and approaches that show how work with/in the local can and must be connected to global issues in order to effect political action. Researchers and educators are urged to take activist stances that directly affect and address the needs of all people across lines of race, class, ethnicity, sexuality, and gender. The book is organized into three parts, each focusing on different aspects of literacy research for political action. These include theoretical considerations and methodological approaches that support this work; a reconsideration of the roles of participants as collaborators in this kind of literacy research; and finally, examples of projects specifically aimed at addressing global issues through local research for political action.

Implementing and Managing Exchange Server 2003 Oct 07 2020 The 70-284 Exam Cram 2 covers what readers need to know to pass the exam - a popular elective for the MCSA (2000 and 2003) and MCSE (2000 and 2003) programs as well as 1 of 2 Core Messaging exams for the new MCSE 2003 Messaging Specialist program. The exam measures readers' ability to implement, manage, and troubleshoot an Exchange Server 2003 organization. This book is the ideal refresher for readers who are familiar with the exam material or for readers who are in need of more in-depth study material it is the ultimate complement guide for larger training guides, instructor-led classes, and/or CBT training.

MCTS Guide to Microsoft Windows 7 (Exam # 70-680) Jan 10 2021 Introducing a complete guide to deploying and managing Windows 7 that is suitable for IT professionals and students alike! This instructional text provides the information users need to successfully migrate to Windows 7 and immediately derive benefits from it. Readers will learn about the new features in Windows 7, such as advanced security, and how those features compare to Windows Vista and Windows XP. Valuable for professionals, but written in a way that is understandable to the novice networking student, this informative guide examines Windows 7 in a thorough and logical manner making the information easy to understand

and preparing readers for Microsoft's MCTS Exam #70-680. The hands-on activities and case projects help learners practice new skills, and review questions and key terms reinforce important information. The accompanying CD provides valuable certification preparation material, including test preparation software. With a section devoted to troubleshooting, this text also doubles as a manual that professionals can take on the job with them. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Technology in Education: Pedagogical Innovations Feb 20 2022 This book constitutes extended papers from the 4th International Conference on Technology in Education, ICTE 2019, held in Guangzhou, China, in March 2019. The 27 full papers presented in this volume were carefully reviewed and selected from 109 submissions. They are organized in topical sections on blended bearning and computer-supported learning; virtual reality, augmented reality and game-based learning; open online courses and open educational resources; teaching and learning analysis and assessment; pedagogical, psychological and cultural issues.

Finding Out Dec 09 2020 Finding Out introduces readers to lesbian-gay-bisexual-transgender (LGBT) studies. Unlike most books on LGBT, this textbook combines original material with esteemed journal articles. Chapter introductions, written by the authors, place current research findings in a clear context. Finding Out reviews the history of same-sex relationships and gender variance from ancient Greece to the present yet goes beyond a historical account to provide an in-depth examination of LGBT culture and society. Key Features · Includes chapter introductions that gives students a useful context for each research article Connects chapter topics to one another with Lambda Links, which help facilitate analysis and discussion Directs readers to relevant studies and information with "Find Out More" boxes in each chapter "I am most impressed by this book's blend of comprehensive scope with approachable, intelligent presentation. It provides material valuable for both students new to the field and those taking more advanced courses without excluding either group on the basis of approach or diction. ... I just love this book!" –Sarah-Hope Parmeter University of California, Santa Cruz " This text will give me a way to teach LGBT issues as central – that is, NOT as tangents, as add-ons, as side issues, but as a central area of inquiry. ... This text is by far the best thing I have seen, and it is heads and shoulders above any other possibilities..." – Mary Armstrong, California Polytechnic State University, San Luis Obispo Intended Audience This core text is designed for Introduction to Sexuality Studies as well as other undergraduate courses that include LGBT topics. Anyone interested in the history, culture, and society of LGBT will find this book an informative resource.

Educating Engineers for Future Industrial Revolutions Apr 24 2022 This book contains papers in the fields of collaborative learning, new learning models and applications, project-based learning, game-based education, educational virtual environments, computer-aided language learning (CALL) and teaching best practices. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. There is also pressure by the new situation in regard to the Covid pandemic. These were the aims connected with the 23rd International Conference on Interactive Collaborative Learning (ICL2020), which was held online by University of Technology Tallinn, Estonia from 23 to 25 September 2020. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning. Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, learning industry, further and continuing education lecturers, etc.
Marketing Communications 2007-2008 Jul 16 2021 BH CIM Coursebooks are crammed with a range of learning objective questions, activities, definitions and summaries to support and test your understanding of the theory. The 07/08 editions contains new case studies which help keep the student up to date with changes in Marketing Communication strategies. Carefully structured to link directly to the CIM syllabus, this Coursebook is user-friendly, interactive and relevant. Each Coursebook is accompanied by access to MARKETINGONLINE (www.marketingonline.co.uk), a unique online learning resource designed specifically for CIM students which can be accessed at any time. *Written specially for the Marketing Communications module by the Senior Examiners * The only coursebook fully endorsed by CIM * Contains past examination papers and examiners' reports to enable you to practise what has been learned and help prepare for the exam

CPA Review Sep 05 2020

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Nov 27 2019 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

Social Information Seeking Aug 17 2021 This volume summarizes the author's work on social information seeking (SIS), and at the same time serves as an introduction to the topic. Sometimes also referred to as social search or social information retrieval, this is a relatively new area of study concerned with the seeking and acquiring of information from social spaces on the Internet. It involves studying situations, motivations, and methods involved in seeking and sharing of information in participatory online social sites, such as Yahoo! Answers, WikiAnswers, and Twitter, as well as building systems for supporting such activities. The first part of the book introduces various foundational concepts, including information seeking, social media, and social networking. As such it provides the necessary basis to then discuss how those aspects could intertwine in different ways to create methods, tools, and opportunities for supporting and leveraging SIS. Next, Part II discusses the social dimension and primarily examines the online question-answering activity. Part III then emphasizes the collaborative aspect of information seeking, and examines what happens when social and collaborative dimensions are considered together. Lastly, Part IV provides a synthesis by consolidating methods, systems, and evaluation techniques related to social and collaborative information seeking. The book is completed by a list of challenges and opportunities for both theoretical and practical SIS work. The book is intended mainly for researchers and graduate students looking for an introduction to this new field, as well as developers and system designers interested in building interactive information retrieval systems or social/community-driven interfaces.

Using Blended Learning Oct 31 2022 This book discusses evidence-based practices related to the use of blended learning in both K-12 and higher education settings. Specifically, this book features evidence-based practices in relation to the following five learning goals: (a) Fostering students' attitude change toward country, (b) Helping students' solve ill-structured design task problems, (c) Improving students' critical thinking in assessing sources of information, (d) Improving students' narrative and argumentative writing abilities and (e) Enhancing students' knowledge retention and understanding. To achieve this aim, the authors draw upon their own research studies as well as some other relevant studies to reveal the pedagogical approaches, the specific instructional/learning activities, the technologies utilized and the overall framework for developing blended learning experiences.

Educational Technology Jul 24 2019
