The Dollarization Discipline Jan 18 2022 How companies turn value-added into real profits The Dollarization Discipline shows organizations and marketers how to effectively communicate the economic value created by their products and services. Too often, when companies compete using conventional sales and marketing approaches, they force customers to make financial decisions (how much to spend), based on non-financial arguments (product features and benefits). On this playing field, the company that can show true financial advantage in real dollars and cents wins every time. This book offers a step-by-step strategy for doing just that. Every day, good companies suffer because they create value for customers but aren't able to keep their fair share. This is because most marketers can't fully explain the value customers get from their products, and the argument falls to the lowest common denominator-price. The solution is an approach to sales and marketing that goes beyond articulating features and benefits, but calculates the monetary value a customer receives from a product or service. This enables the seller to price the product as a true reflection of its value-and also let's the seller prove it to the customer! With real case studies and detailed, step-by-step guidance on effective dollarization, The Dollarization Discipline finally offers a practical, straightforward way for marketers and business leaders to prove the value of their "value-added." Leading Culture Change Jul 20 2019 Leading Culture Change: What Every CEO Needs To Know is a practical guide for top leaders who are faced with the challenge of shaping their culture to create long term, sustainable value. Culture is changeable—but only with CEO sponsorship and a methodical, best practices approach. Author Christopher S. Dawson draws on 25 years of experience as an organizational consultant in a variety of industries to delineate five critical success factors, without which culture change is unlikely to occur. He offers practical tools and approaches to facilitate culture change, in addition to an overall framework that acts as a yardstick for seasoned and new top leaders. The book provides a "red-yellow-green" level of urgency tool for determining the degree of organizational effort required to address the gap between strategy and culture; a roadmap for culture change; and more. After describing how to effect change, the text describes frequent scenarios, providing guidelines, an in-depth case example, and lessons for top leaders. Finally, the book outlines four essential leadership competencies—dual-horizon vision; self-awareness; team leadership; and source of inspiration—based on the requirements for leaders of any transformation. This book is an ideal guide for today and tomorrow's top leaders—as well as a valuable supplement to management consultants' and human resource executives' professional training.

Peer-to-peer Training Facilitator's Guide Feb 25 2020 The peer-to-peer (P2P) training approach involves small groups of people from similar social groupings, who are not professional teachers, helping each other to learn. The P2P approach has great potential for rapidly identifying emerging lessons learned and integrating them into wide-reaching Army training. The present research identified the instructional principles and best practices for P2P from academia, industry, and the military supporting effective P2P training and incorporated them into a Soldier-friendly facilitator?s guide. A formative evaluation was conducted with Soldiers using the guide to prepare and conduct group discussions for a face-to-face group setting and a distributed group setting where Soldiers were linked via video teleconference. One group of Soldiers served as ?facilitators? and used the facilitator?s guide to prepare and lead discussions with other Soldiers who served as ?learners.? Feedback on the guide was mostly positive with Soldiers indicating that the guide provided an appropriate amount of information and a usable format and tools for structuring and fostering group discussions. Ongoing efforts to transition P2P methods into Army training are discussed.
