My Dad is Dead Apr 30 2020 Death. It's a part of life and something we all must accept. Whether it be our own demise or losing a loved one, the experience of death is both sobering and surreal. My Dad is Dead is a group of related short stories that explore that dichotomy through the eyes of a kid. In George Verongos's second book, he turns childhood memories into "fictionally enhanced" tales (he made us say that, he's trying to make it a thing). With one foot in memoir and the other in fiction, My Dad is Dead recounts the experiences of the author as a young boy (I always wanted to say that) growing up as the last of four children, and the only boy, to Greek-American parents. Set in the Midwest, the breadbasket of America, during the 70s and 80s, My Dad Is Dead takes you on a journey of preadolescence and all its trials and tribulations culminating in the sudden death of the author's father. If you like your accents thick, your humor dark, and your tears jerked(?), My Dad is Dead and Other Funny Stories is for you.

Hurricane Lizards and Plastic Squid is the first major book by a biologist to focus on the fascinating story of how the natural world is adjusting, adapting, and sometimes measurably evolving in response to climate change. Lyrical and thought-provoking, this book broadens the climate focus from humans to the wider lattice of life. Bestselling nature writer Thor Hanson - author of Buzz (a Radio 4 'Book of the Week') - shows us how Caribbean lizards have grown larger toe pads to grip trees more tightly during frequent hurricanes; and how the 'plasticity' of squid has allowed them to change their body size and breeding habits to cope with altered sea temperatures. Plants and animals have a great deal to teach us about the nature of what comes next, because for many of them, and also for many of us, that world is already here.
