Designing and Building Security Operations Center Dec 27 2019 Do you know what weapons are used to protect against cyber warfare and what tools to use to minimize their impact? How can you gather intelligence that will allow you to configure your system to ward off attacks? Online security and privacy issues are becoming more and more significant every day, with many instances of companies and governments mishandling (or deliberately misusing) personal and financial data. Organizations need to be committed to defending their own assets and their customers' information. Designing and Building a Security Operations Center will show you how to develop the organization, infrastructure, and capabilities to protect your company and your customers effectively, efficiently, and discreetly. Written by a subject expert who has consulted on SOC implementation in both the public and private sector, Designing and Building a Security Operations Center is the go-to blueprint for cyber-defense. Explains how to develop and build a Security Operations Center Shows how to gather invaluable intelligence to protect your organization Helps you evaluate the pros and cons behind each decision during the SOC-building process

Designing the Doll Apr 30 2020 The author of Anatomy of a Doll "gives us a gift by distilling the spirits found in doll/figure art . . . then explains the fundamentals to pave the way" (Barbara Campbell, editor of Soft Dolls & Animals!). Advance your dollmaking skills with this in-depth guide by master-dollmaker Susanna Oroyan! Susanna introduces you to her concept of "imaginative engineering" with a collection of design directions and technical processes that will help your ideas translate into reality. Expands on concepts presented in Anatomy of a Doll and Fantastic Figures. Covers a wide variety of construction methods, such as applications of wire armature in body construction, general concepts of mold making, sculpture mechanics, in-depth discussion of jointed figures, and methods of assembling your doll. More than 250 full-color photos of dolls from 130 of the world's top doll artists. Over 200 detailed illustrations. Explains elements of design, such as focal point, scale, harmony, style, and the use of color, texture, and pattern. Learn techniques of proportion for working with the human figure. An excellent technical resource and reference book that will teach you how to develop ideas, then construct advanced art figures or dolls. "The doll world has only just recovered from the excitement of having Anatomy of a Doll which showed us what was possible. Now we can learn to get it with this new effort, the fabulous Designing the Doll. Thank you, Susanna, where would we be without you?" —Elinor Peace Bailey, author of Storytelling with Dolls "Demystifies the creation of dolls by offering techniques, basic construction and some very good thoughts on design . . . Filled with diagrams and color photos of dolls from some of the top contemporary doll-makers, inspiration is on every page." —Polymer Clay

Demystifying the Microchip PIC Microcontroller for Engineering Students Sep 04 2020 If you're an engineering student or electronics hobbyist who wants to know the secrets of building microcontroller-based electronics projects, and programming the Microchip PIC16F877A in assembly, then you're about to discover how to design easily your next embedded systems project right now following the KISS principle! This new Ebook by Dr Charly Bechara will teach you through simple real-world experiments how to interface the largest number of HW peripherals found in many mechatronics projects such as the LCD, keypad, temperature/optical/infrared sensors, DC motor, EEPROM, etc... Furthermore, you will learn how to let the PIC16F877A communicate through several protocols such as USART, SPI, I2C and Infrared. These experiments will demystify ALL the internal resources of the PIC16F877A such as the Timers, A/D converter, CCP, MSSP, USART, and much more. ALL the assembly software routines in this ebook are ready to be used in your next microcontroller-based electronics project and are given to you for FREE.

Missing 411- a Sobering Coincidence Mar 10 2021 Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. The books have been vetted by some of the top journalists in the world with statements such as; "David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time." Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed." The author continues with his profile points involving the disappearances and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these cases believe their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for. This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities. Designing and Evaluating Usable Technology in Industrial Research Mar 22 2022 This book is about HCI research in an industrial research setting. It is based on the experiences of two researchers at the IBM T. J. Watson Research Center. Over the last two decades, Drs. John and Clare-Marie Karat have conducted HCI research to create innovative usable technology for users across a variety of domains. We begin the book by introducing the reader to the context of industrial research as well as a set of common themes or guidelines to consider in conducting HCI research in practice. Then case study examples of HCI approaches to the design and evaluation of usable solutions for people are presented and discussed in three domain areas: - item Conversational speech technologies, - item Personalization in eCommerce, and - item Security and privacy policy management technologies In each of the case studies, the authors illustrate and discuss examples of HCI approaches to design and evaluation that worked well and those that did not. They discuss what was learned over time about different HCI methods in practice, and changes that were made to the HCI tools used over time. The Karats discuss trade-offs and issues related to time, resources, and money and the value derived from different HCI methods in practice. These decisions are ones that need to be made regularly in the industrial sector. Similarities and differences with the types of decisions made in this regard in academia will be discussed. The authors then use the context of the three case studies in the three research domains to draw insights and conclusions about the themes that were introduced in the beginning of the book. The Karats conclude with their perspective about the future of HCI industrial research. Table of Contents: Introduction: Themes and Structure of the Book / Case Study 1: Conversational Speech Technologies: Automatic Speech Recognition (ASR) / Case Study 2: Personalization in eCommerce / Case Study 3: Security and Privacy Policy Management Technologies / Insights and Conclusions / The Future of Industrial HCI Research

Dentist on the Ward Jun 20 2019 Dentist on the Ward is a 'must have' for any dentist starting as a core trainee in Oral and Maxillofacial Surgery. It is practically an induction programme in itself. The book gives clear practical advice on everything that should be expected from the training experience and practical guidance in key areas a new core dental trainee might be expected be acquainted with. As well as instruction in simple measures, such as when and how to take blood samples, there are chapters devoted to the understanding of more complex procedures and conditions that will be encountered by a junior Oral and Maxillofacial trainee. The book is written by two Consultant Oral and Maxillofacial Surgeons with decades of experience in supervising and teaching young dentists working in their departments. It is unique in providing simple guidance specifically for dentally qualified trainees and concentrates on practice, procedures and theory, which is important, while omitting less relevant detailed knowledge which can be found in medical textbooks. Chapters are: Why work in Oral and Maxillofacial Surgery?: Applying for a job in Oral and Maxillofacial Surgery; Getting the best from your student attachment or elective; Before starting; Your Personal Development Plan, Appraisal, Mandatory Training and Education; Information, Data Protection and Confidentiality; Pre-employment Health Assessment and the Blood Borne Viruses; Basic Hospital Cross Infection Control; MRSA, Cl. Difficile and Hand Hygiene; Inoculation (needlestick) Injuries; Working in Out-Patients Day Surgery; The Ward; its Staff and Routines; Preparation for Theatre; Consent for Hospital Treatment; Working in the Operating Theatre; Scrubbing and Gowning; Routine Post-Operative Care; Post-Operative Complications; Being On Call, Accidents and Emergencies; Wound Closure - Skin Suturing; Dealing with Bleeding from the Mouth; Examination of the Injured Face; Imaging for Facial Fractures; Admitting a Patient with a Facial Fracture; Admitting a Patient with a Dental Abscess; You Should Know About Retrobulbar Haemorrhage; Medical Emergencies; Resuscitation; Examination of Cardiovascular and Respiratory Systems; The Sterile Supply Service; Surgical Instruments; Minor Oral Surgery; Histopathology; Venepuncture - Taking a Blood Sample; Venepuncture - Inserting a Venflon IV Cannula; Blood Tests; Ordering and Interpretation; Blood Tests - Haematology; Blood Transfusion; Blood Tests - Biochemistry; Blood Tests - Immunology; Understanding and Prescribing Fluid Replacement; Prescribing Medication in the Hospital; Understanding the Anaesthetist; Understanding Tracheostomy; Understanding the Organisation of the Head and Neck Team; Understanding a Major Cancer Case; Understanding Diabetes in Hospital; Understanding Bisphosphonate Jaw Necrosis; Understanding Anti-coagulation; Keeping out of Trouble; Useful Web Sites; Epilogue.

Designing for XOOPS Oct 05 2020 Learn how to customize websites with XOOPS, the open source CMS that helps non-developers build dynamic community websites, intranets, and other applications. This concise book shows you how to use XOOPS themes and modules to design everything from simple blogs to large database-driven CMS portals. Web designers and current XOOPS users will learn how to create a site theme with CSS and jQuery libraries, including techniques for making additional modules conform to the site's look and feel. Although XOOPS uses the PHP-based Smarty templating system, all you need is a bit of XHTML and CSS experience to get started. Learn the workflow for turning an idea into a full-featured website Become familiar with XOOPS' theme-building tools, and set up PHP and MySQL environments Port an existing XHTML template to XOOPS Create themes with the 960 Grid System to save time and reduce code Use jQuery-based UI libraries to achieve complex effects Blend new modules into your theme with the template override function Go beyond traditional block layouts to customize your homepage

Arduino for Biologists Nov 25 2019 Technology has become crucial to biological science, from sensor networks to drones. These technologies are often expensive and difficult to modify, even if they do suit your specific needs. Arduino is a hugely popular, low-cost platform that allows you to create your own technological solutions to problems quickly and easily with little prior electronics or programming knowledge. The Arduino system comprises a development board containing a small micro-controller that can be reprogrammed via the Arduino desktop software and a USB cable. The system is easily expanded to add Internet connectivity, data recording tools and your own custom electronics. This book explains everything you need to know about Arduino and how to use it. It starts with an introduction to practical electronics and the Arduino platform, and moves on through a series of projects solving specific biological problems. Each of these projects can be used as described, or modified for your specific needs. In addition, information is provided on how to share and publish your own designs and integrate them with the global infrastructures that support biodiversity informatics. This book is for anybody who wants to design and build their own technology-based research equipment, whether it is for use in the laboratory or the field. It is of particular relevance to those who wish to develop their own sensor networks, whether they are professional ecologists or citizen scientists.

Design for a Vulnerable Planet Jan 08 2021 We inhabit a vulnerable planet. The devastation caused by natural disasters such as the southern Asian tsunami, Hurricanes Katrina and Ike, and the earthquakes in China's Sichuan province, Haiti, and Chile—as well as the ongoing depletion and degradation of the world's natural resources caused by a burgeoning human population—have made it clear that "business as usual" is no longer sustainable. We need to find ways to improve how we live on this planet while minimizing our impact on it. Design for a Vulnerable Planet sounds a call

for designers and planners to go beyond traditional concepts of sustainability toward innovative new design that fosters regeneration and resilience. Drawing on his own and others' experiences across three continents, Frederick Steiner advocates design practice grounded in ecology and democracy and informed by critical regionalism and reflection. He begins by establishing the foundation for a more ecological approach to planning and design, adopting a broad view of ecology as encompassing human and natural, urban and wild environments. Steiner explores precedents for human ecological design provided by architect Paul Cret, landscape architect Ian McHarg, and developer George Mitchell while discussing their planning for the University of Texas campus, the Lake Austin watershed, and The Woodlands. Steiner then focuses on emerging Texas urbanism and extends his discussion to broader considerations beyond the Lone Star State, including regionalism, urbanism, and landscape in China and Italy. He also examines the lessons to be learned from human and natural disasters such as 9/11, Hurricane Katrina, and the BP oil spill. Finally, Steiner offers a blueprint for designing with nature to help heal the planet's vulnerabilities.

Applications For Enrollment of Choctaw Newborn Act of 1905 Volume XIV Apr 11 2021 The Applications for Enrollment of Choctaw Newborn, Act of 1905, National Archive film M-1301, Rolls 50-57, are found under the heading of Applications for Enrollment of the Commission to the Five Civilized Tribes. These applications contain considerably more information than stated on the census cards found in series M-1186. Series M-1301 possesses its own numerical sequence, separate from M-1186. To find each party's roll number researchers must reference M-1186. The governing 1905 statute (H.R. 17474) defined Choctaw Newborn as "infant children born prior to September twenty-fifth, nineteen hundred and two, and who were living on said date, to citizens by blood of the Choctaw . . ." It also authorized the Department of the Interior to enroll and make allotments to such children based on applications received on their behalf no later than May 2, 1905. The Choctaw--as well as the Chickasaw allotments--were likely some of the most sought after properties in Indian Territory. There was supposed to be a 25-year restriction on the sale or lease of any Indian lands so as to ensure that the owners wouldn't be swindled; however, the presence of huge asphalt and coal deposits in both the Choctaw and Chickasaw Districts elicited pressure from private interests to purchase the lands. On April 26, 1906, President Roosevelt signed the Five Tribes Bill removing some of the restrictions from the sale of all inherited land but continuing to prohibit full-bloods from selling their land for 25 years. Mr. Bowen's faithful transcriptions of the Choctaw applications provide the names of the applicants and their relatives, as well as the identities of doctors, lawyers, midwives, and others.

Played by the Billionaire Jun 25 2022 Billionaire Liam Manning has been too busy building his internet security empire to care about romance. So when a death-bed promise to his brother forces him to prove he can properly seduce a woman, Liam relies on his strengths. Hacking into an online dating site to find a suitable "love tutor" is as easy as it is logical. All Lorelei Torres wants is a family and an honest man to love. After falling for one-too-many Mr. Wrongs, Lorelei's mother signs her up for an online dating site. Maybe it's time to let an impartial computer chose a man for her—especially if that computer plans to match her with sexy men like Liam. But Liam's made a critical error. Lorelei has breached the firewall around his heart, and if he falls for her, he'll have to reveal his real identity—and his deception—to the only woman who's ever made him question why love isn't on his to-do list. Each book in the Guide to Love series is a standalone, full-length story that can be enjoyed out of order. Series Order: Book #1 Played by the Billionaire Book #2 His Billion Dollar Dilemma Book #3 Masquerading with the Billionaire
