Politics and Ideology in Canada Jan 31 2020 Winner of the Harold Adams Innis Prize, *Politics and Ideology in Canada* examines a period of crucial historical change in Canada, beginning in the mid-1970s when the crisis of the Keynesian welfare state precipitated a transition to a new political order based on the progressive "downsizing" of state involvement in the economy and society. Using class and ideology as key concepts, Michael Ornstein and Michael Stevenson examine this transition in terms of the nature of hegemony and hegemonic crisis and the conditions of political order and instability. These concepts guide the interpretation of three large surveys of representative samples of the Canadian public and two unique elite surveys, conducted between 1975 and 1981. The surveys cover an exceptionally broad spectrum of political issues, including social programs, civil and economic rights, economic policy, foreign ownership, labour relations, and language issues and sovereignty. A wide-ranging analysis of public and elite attitudes reveals a hegemonic order through the early 1980s, built around public support for the institutions of the Canadian welfare state. But there was also widespread public alienation from politics. Public opinion was quite strongly linked to class but not to party politics. Regional variation in political ideology on a broad range of issues was less pronounced than differences between Quebec and English Canada. Much deeper ideological divisions separated the elites, with a dramatic polarization between corporate and labour respondents. State elites fell between these two, though generally more favourable to capital. The responses of the business elites reveal the ideological roots of the Mulroney years in support for cuts in social programs, free trade, privatization, and deregulation.

First Latin Book Sep 08 2020 Excerpt from First Latin Book: Designed as a Manual of Progressive

Exercises and Systematic Drill in the Elements of Latin, and Introductory to Caesar's Commentaries on the Gallic War The design of this book is to afford a thorough preparation for the reading of Caesars Commentaries on the Gallic War. It is a very common experience on the part of teachers to find, after several months or a year have been spent in the study of the elements of Latin, that, on beginning to read some Latin author, certain difficulties present themselves at the very outset and increase with every onward step. Some of the sources of these difficulties are: - 1. In nine cases out of ten, the pupil begins the study of Latin with no definite knowledge of his own language, even in the simplest points of sentence structure. As has been said, "he does not appreciate the relations of things." 2. The beginner has been taught to translate isolated sentences, which are never combined into connected narrative. Fragments of sentences, phrases, oblique cases of nouns and pronouns, all absolutely meaningless in themselves, have constituted a large portion of his fundamental work. 3. His elementary book has lacked logical method. Many peculiarities of the Latin language, which, in their proper place, would be shorn of all difficulty, and would appear as reasonable constructions, are presented to the beginner too early in his Latin study. These not only demand a needless amount of time and labor, but also tend to discourage the young student.
