**International Directory of Company Histories** Jul 17 2021 Multi-volume major reference work bringing together histories of companies that are a leading influence in a particular industry or geographic location. For students, job candidates, business executives, historians and investors.

**Time for Science Education** Oct 27 2019 The book demonstrates the importance of history and philosophy of science for science education. It provides a case study of the pendulum, showing the pivotal role played by the pendulum in the Scientific Revolution. It describes how the pendulum enabled the creation of accurate clocks that, among other things, enabled the long-standing problem of longitude to be solved. The book charts how the solution of the longitude problem was of enormous social, economic and cultural significance for European and consequently world history. Further, the book shows how the discovery of the laws of pendulum motion by Galileo, Huygens and Newton hinged on the acceptance of a new methodology for science. The pendulum laws are a window through which to view the fascinating mixture of experiment, mathematics and philosophy that characterized the foundations of modern science- the Galilean-Newtonian paradigm - and distinguished it from Aristotelian, medieval and commonsense science. The book covers: learning about the nature of science; navigation and the longitude problem; ancient and medieval timekeeping; Galileo's analysis of pendulum motion; Huygens, Hooke, Newton and the pendulum; clocks and culture; science and philosophy; the mechanical world view; teaching about time and pendulum motion; and teacher education and culture. The book defends a liberal, or

contextual, approach to the teaching of science. It shows how understanding the scientific, philosophical and cultural contexts and ramifications of the pendulum laws can allow teachers to plan more engaging lessons, and conduct informative historical- investigative experiments. Students can re-live history. Contextual understanding of the pendulum allows connections to be made with other parts of the science curriculum, and with other subject areas such as geography, literature, religion, music and mathematics. Readers will come away with a deeper understanding of the nature of science and its

*October 2022 - Surplus Record Machinery & Equipment Directory* Jun 15 2021 SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 100,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. October 2022 issue. Vol. 99, No. 10

*Hall of Fame* Nov 28 2019 A representative publication presenting top companies whose name is a synonym for excellent design. The 20th century is acknowledged to be the century of design and this fact is highlighted in this new publication edited by ICSID, the International Council of Societies of Industrial Design. ICSID members world-wide have selected those companies and design studios from more than 20 countries which have especially contributed to the development of good design in the last century. As a non-governmental organisation supported by nearly 150 Member Societies in over 50 countries throughout the world, ICSID's mandate is to advance the discipline and the practices of industrial design at the highest international level.
