Handbook of Leadership Theory and Practice Dec 10 2020 Scores of books and articles have been written in the popular press and mainstream marketplace about leadership: who leaders are, what they do, and why they matter. Yet in academia, there is a dearth of rigorous research, journal articles, or doctoral programs focused on leadership as a discipline. Why do top business schools espouse mission statements that promise to "educate the leaders of the future"- yet fail to give leadership its intellectual due? The Handbook of Leadership Theory and Practice seeks to bridge this disconnect. Based on the Harvard Business School Centennial

Colloquium "Leadership: Advancing an Intellectual Discipline" and edited by HBS professors Nitin Nohria and Rakesh Khurana, this volume brings together the most important scholars from fields as diverse as psychology, sociology, economics, and history to take stock of what we know about leadership and to set an agenda for future research. More than a means of getting ahead and gaining power, leadership must be understood as a serious professional and personal responsibility. Featuring the thinking of today's most renowned scholars, the Handbook of Leadership Theory and Practice will be a catalyst for elevating leadership to a higher intellectual plane - and help shape the research agenda for the next generation of leadership scholars.

Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders Sep 06 2020 For hundreds of years, different leadership theories have been explored to try to explain exactly how and why certain people become great leaders. Research spans a discussion of personality traits, the characteristics of the situation at hand, and qualifications of the leader to try to determine what causes people to become more likely than others to take charge. This can be in various settings: CEOs, presidents and prime ministers, managing directors, governors, senators, head coaches, and more. Through the examination of first-time leadership, new theories and ideas on leadership are explored. The Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders is a comprehensive reference source that focuses on what qualities distinguish first-time leadership from traditional leaders, while furthering leadership theories that look at other variables such as situational factors, knowledge base, skill levels, etc. It reviews the various approaches used by first-time leadership and how each of them uniquely approaches effective leadership, key outcomes, and the strengths and weaknesses of each approach. Furthermore, it distinguishes between the traditional route for leadership, the gradual moving up of an individual over time to higher positions, and a first-time leadership in which an individual begins right away in a position without climbing the professional ladder. This book will attempt to draw lessons from existing first-time leadership experience and provide evidence for the appropriateness of such a route to leadership. Topics highlighted include transformational leadership, political leaders, ethical and unethical leadership, and leadership development. International Handbook of Educational Leadership and Administration Jun 15 2021 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters. A synopsis of the contents of those chapters is also provided. SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail. After all, there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years. Such a view is captured, for example, in Bennis' observation that: Of all the hazy and confounding areas in social psychology, leadership theory undoubtedly contends for top nomination. Probably more has been written and less is known about leadership than any other topic in the behavioural sciences. (1959, page 259) We do not find this state of affairs discouraging (nor entirely accurate) and, of course, it did not prevent Bennis from proceeding either. One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general theory, a theory which applies to all or most domains of organized human activity. This aspiration inevitably produces decontextualized and, therefore, abstract categories of practice. Howard Gardner's (1995) depiction of leadership as story telling is a case in point.
