Faith-Rooted Organizing Apr 12 2021 Since the 1930s, organizing movements for social justice in the U.S. have largely been built on secular assumptions. But what if Christians were to shape their organizing around the implications of the truth that God is real and Jesus is risen? Reverend Alexia Salvatierra and theologian Peter Heltzel propose a model of organizing that arises from their Christian convictions, with implications for all faiths.

Handbook of Children, Culture, and Violence Aug 29 2022 The Handbook of Children, Culture, and Violence provides a comprehensive, interdisciplinary examination of childhood violence that considers children as both consumers and perpetrators of violence, as well as victims of it. This Handbook is the first single volume to consider situations when children are responsible for violence, rather than focusing exclusively on occasions when they are victimized.

LNER Passenger Trains and Formations 1923-67 Dec 21 2021 This book provides a record of the composition of the major passenger trains operated by the LNER and its BR successors from Grouping in 1923 through to the end of main line steam in the late 1960s.

Rock Mechanics in Salt Mining Sep 05 2020 A study on rock mechanics in salt mining, this work includes coverage of the exploration and opening of salt mining, deformation and failure of the salt, strata mechanics and control for different mining systems, and stability analyses of the mine structures.

The Problem of Hydrogen in Steel Jan 10 2021 This memorandum introduces the problem of delayed, brittle

failures associated with hydrogen in steel, particularly high-strength steel. It is intended to help the steel user determine if he has such a problem. The effects of hydrogen on the mechanical properties of steel are dealt with, and the behavior of material susceptible to delayed, brittle failure is described. Also, the effects of such factors as strength level, magnitude of applied stress, hydrogen content, steel composition, test temperature, and strain rate on hydrogen embrittlement and the susceptibility to hydrogen-induced, delayed, brittle failure are discussed. Possible sources of hydrogen in steel and the types of tests useful in determining the susceptibility to delayed failure are outlined. (Author).

Complex Algebraic Varieties Nov 27 2019 The Bayreuth meeting on "Complex Algebraic Varieties" focussed on the classification of algebraic varieties and topics such as vector bundles, Hodge theory and hermitian differential geometry. Most of the articles in this volume are closely related to talks given at the conference: all are original, fully refereed research articles. CONTENTS: A. Beauville: Annulation du $H(1)$ pour les fibres en droites plats.- M. Beltrametti, A.J. Sommese, J.A. Wisniewski: Results on varieties with many lines and their applications to adjunction theory.- G. Bohnhorst, H. Spindler: The stability of certain vector bundles on $P(n)$.- F. Catanese, F. Tovena: Vector bundles, linear systems and extensions of (1).- O. Debarre: Vers une stratification de l'espace des modules des variétés abéliennes principalement polarisées.- J.P. Demailly: Singular hermitian metrics on positive line bundles.- T. Fujita: On adjoint bundles of ample vector bundles.- Y. Kawamata: Moderate degenerations of algebraic surfaces.- U. Persson: Genus two fibrations revisited.- Th. Peternell, M. Szurek, J.A. Wisniewski: Numerically effective vector bundles with small Chern classes.- C.A.M. Peters: On the rank of non-rigid period maps in the weight one and two case.- A.N. Tyurin: The geometry of the special components of moduli space of vector bundles over algebraic surfaces of general type.

Hydrogen Movement in Steel Aug 17 2021 This report discusses the ways in which H_2 enters steels, how it moves through steel, and methods whereby it may be removed from steel. The solubility of H_2 is important in understanding other aspects of the behavior of H_2 in steel and such aspects of solubility as preferred lattice sites, lattice expansion, measurements of solubility, and estimates of equilibrium H_2 pressure in steel are discussed. The

permeation of H₂ through steel consisting of interactions at both the entry and exit surfaces of the metal as well as diffusion through the bulk metal is discussed. The various possibilities of H₂ entry by corrosion processes, electrochemical processes, and other means are considered as well as factors which influence the rate of H₂ removal from iron and steel. Engineering Economy Sep 17 2021 This student-friendly text on the current economic issues particular to engineering covers the topics needed to analyze engineering alternatives. Students use both hand-worked and spreadsheet solutions of examples, problems and case studies. In this edition the options have been increased with an expanded spreadsheet analysis component, twice the number of case studies, and virtually all new end-of-chapter problems. The chapters on factor derivation and usage, cost estimation, replacement studies, and after-tax evaluation have been heavily revised. New material is included on public sector projects and cost estimation. A reordering of chapters puts the fundamental topics up front in the text. Many chapters include a special set of problems that prepare the students for the Fundamentals of Engineering (FE) exam. This text provides students and practicing professionals with a solid preparation in the financial understanding of engineering problems and projects, as well as the techniques needed for evaluating and making sound economic decisions. Distinguishing characteristics include learning objectives for each chapter, an easy-to-read writing style, many solved examples, integrated spreadsheets, and case studies throughout the text. Graphical cross-referencing between topics and quick-solve spreadsheet solutions are indicated in the margin throughout the text. While the chapters are progressive, over three-quarters can stand alone, allowing instructors flexibility for meeting course needs. A complete online learning center (OLC) offers supplemental practice problems, spreadsheet exercises, and review questions for the the Fundamentals of Engineering (FE) exam.

Communicating Social Justice in Teacher Education Oct 26 2019 "Evolving out of a rich, two-year ethnographic study, this text examines how ideas of social justice are articulated and communicated to pre-service teachers in the US. By positing the concept of "help" as central tenet of social justice within teacher education, this volume offers a unique performative analysis of how the concept is communicatively constituted in teacher education and training. Using a social justice framework, the book examines the ways in which new teachers contend with their identities as educators, and demonstrates how these communicative performances influence pre-service teachers' perceptions of their role, as well as their responsibility to engage with social justice and critical approaches in the classroom. This text will benefit researchers, academics, and educators in higher education with an interest in teacher education, critical communication studies, and the sociology of education more broadly. Those specifically interested in teacher training, mentoring, and social justice in the classroom will also benefit from this book. Aubrey Huber is Assistant Professor and Director of Public Speaking in the Department of Communication, University of South Florida, USA"--

Physical Sciences for NGSS Dec 09 2020 Physical Sciences for NGSS has been specifically written to meet the requirements of the Next Generation Science Standards (NGSS) for High School Physical Sciences (HS-PS). It encompasses all three dimensions of the standards (science and engineering practices, crosscutting concepts, and disciplinary core ideas), addressing the program content through a wide range of engaging student-focused activities and investigations. Through completion of these activities, students build a sound understanding of science and engineering practices, recognize and understand the concepts that link all domains of science, and build the knowledge base required to integrate the three dimensions of the standards to meet the program's performance expectations.

Spirulina in Human Nutrition and Health Feb 20 2022 Astonishingly rich in nutrients, Spirulina is one of the most popular and well researched functional foods in the multi-billion dollar global food supplement market. This ancient species provides readily bioavailable protein along with carotenoids, essential fatty acids, vitamins, and minerals and has therapeutic applications in non-communicable disease such as diabetes mellitus, hyperlipidemia, oxidative stress-induced diseases, inflammations, allergies, and even cancer. Growing scientific and market interests demand a high-quality, comprehensive, peer-reviewed volume on all aspects of this tiny aquatic plant. Drawing from the editors' expertise in nutrition and immunology as well as a prestigious panel of premier international researchers, Spirulina in Human Nutrition and Health provides the first complete compilation of the wealth of experimental data in a single accessible resource. Beginning with an introduction to the history and features of the plant itself, the book goes into great detail regarding its cultivation, handling, storage, and packaging, as well as applicable regulatory acts and organizations. It supplies explanations and reviews of studies involving Spirulina's use as a therapeutic food product and discusses its anti-oxidant profile and antioxidative and hepatoprotective properties. The book considers peer-reviewed studies on spirulina's effects on immunity, NK activation, and antibody production and highlights its role as an antibacterial and antiviral agent. The final chapters look at neurobiology and spirulina's effect on aging as well as potential interactions with pharmaceuticals or other bioavailable compounds. Extensively detailed and heavily referenced, Spirulina in Human Nutrition and Health is the definitive work on this highly nutritious food source.

Adolescents and Adults with Learning Disabilities and ADHD May 02 2020 Most of the literature on learning disabilities and attention-deficit/hyperactivity disorder (ADHD) focuses on the needs of elementary school-age children, but older students with these conditions also require significant support. Comprehensive and authoritative, this book helps educators and clinicians navigate the maze of laws, policies, and scientific research relating to diagnostic and intervention decision making for adolescents and adults. Leading expert Noël Gregg provides clear

guidance on how to conduct and document evidence-based assessments and select appropriate instructional and testing accommodations. Featuring helpful case vignettes, decision-making flowcharts, and coverage of the latest assistive technologies, the book gives special attention to supporting students during the crucial transition from high school to higher education or vocational settings.

Superfoods Mar 24 2022 A raw foods guru profiles the best plant products on the market, describing their nutritional benefits and how they can improve your health and overall well-being Superfoods are vibrant, nutritionally dense foods that offer tremendous dietary and healing potential. In this lively and illustrated overview, well-known raw-foods guru David Wolfe profiles delicious and incredibly nutritious plant products such as goji berries, hempseed, cacao beans (raw chocolate), maca root, spirulina, and bee products. As powerful sources of clean protein, vitamins, minerals, enzymes, antioxidants, and countless other nutrients, they represent a uniquely promising piece of the nutritional puzzle. Wolfe describes the top ten superfoods in great detail and provides delicious recipes for each. Through persuasive arguments, he shows you the far-reaching benefits of superfoods and how they play a pivotal role in our health—from promoting nutritional excellence to beauty enhancement. Discover how you can introduce these foods into your daily routine, so you too can enjoy their positive effects on your diet, lifestyle, and well-being.
