Bats in Question Jul 28 2019 Long the subject of myth and superstition, bats have been among the most misunderstood of mammals due to their nocturnal habits, capacity for flight, and strange appearance. Seeking to dispel the myths associated with these remarkable creatures and arguing for their key role in a balanced ecosystem, Bats in Question covers all aspects of bat biology in a practical question-and-answer format. Describing where bats live, how they use echolocation to navigate, and even why they hang upside down, the book also gives the conservation status of all 925 bat species. Don E. Wilson traces the evolution of bats and shows their remarkable diversity by describing each of the major groups in terms of their different body structures and habitats. He sheds light on bats' complex social systems, extraordinary variation in size, and food preferences that encompass plants, insects, and mammals. The book also explores cultural attitudes about bats/telling how, until recently, bats had been relegated to the world of vampires and how they have emerged to take their place in public awareness as important and fascinating members of our ecosystems.

The Answer to How Is Yes Feb 24 2022 Modern culture's worship of [how-to] pragmatism has turned us into instruments of efficiency and commerce but we're doing more and more about things that mean less and less. We constantly ask [how?] and still struggle to find purpose and act on what matters. Instead of acting on what we know to be of importance, we wait for bosses to change, we seek the latest fad, we invest in one more degree. Asking how keeps us safe/instead of being led by our hearts into uncharted territory, we keep our heads down and stick to the rules. But we are gaining the world and losing our souls. Peter Block puts the [how-to] craze in perspective and presents a guide to the difficult and life-granting journey of bringing what we know of personal value into an indifferent or even hostile corporate and cultural landscape. He raises our awareness of the trade-offs we've made in the name of practicality and expediency, and offers hope for a way of life in which we're motivated not by what [works] but by the things that truly matter in life: idealism, integrity, depth and engagement.

Questions Are the Answer May 30 2022 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem in your workplace, community, or home life just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions and breakthrough insights and how anyone can create them.

Questions Children Ask and How to Answer Them Apr 28 2022 Where did I come from? What happens when you die? What's divorce? From the moment children can formulate questions they begin to bombard their parents with "Why?" "What?" "Where" and "How?" Naturally curious they often catch us off guard leaving us unsure of how to answer their questions with an appropriate response. Fully revised and updated for the digital age, this new edition of Dr Miriam Stoppard's essential parenting manual provides age-appropriate answers to a huge range of challenging questions. Drawing from extensive research in child development and specifically on what children can handle at each age, Stoppard offers parents a foundation on which they can build their own answers as their child's understanding expands.

The Syntax of Yes and No May 06 2020 This book is a cross-linguistic study of the syntax of yes-no questions and their answers, drawing on data from a wide range of languages with particular focus on English, Finnish, Swedish, Thai, and Chinese. There are broadly two types of answer to yes-no questions: those that employ particles such as 'yes' and 'no' (as found in English) and those that echo a part of the question, usually the finite verb, with or without negation (as found in Finnish). The latter are uncontroversially derived by ellipsis, while the former have been claimed to be clause substitutes. Anders Holmberg argues instead that even answers that employ particles are complete sentences, derived by ellipsis from full sentential expressions, and that the two types share essential syntactic properties. The book also examines the related cross-linguistic and intralinguistic variation observed in answers to negative questions such as 'does he not drink coffee?', whereby 'yes' in one language appears to correspond to 'no' in another. The book illustrates how a seemingly trivial phenomenon can have the most wide-ranging consequences for theories of language, and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics.

The Total Question Workout Jan 26 2022 Here's the one-minute description of TQW: You have a Big Question of some kind. You know it's a Big Question because it's keeping you up at night, the outcome is important, and you don't have a ready answer. There are four stages you need to go through to answer a Big Question. I don't know where you are in the process; so let me describe the four stages. The first stage involves fully understanding your situation and your motives for wanting to resolve the question that comes from being in that situation. The second stage involves separating yourself from the situation you are in. You cannot resolve a situation if you see yourself as part of it. You have to gain perspective by separating yourself from your situation in as many ways as possible. The third stage involves letting go of something that keeps you attached to, and subject to, the situation you are in. Something is holding you back. Some fear, some projection of implications, some belief about what is possible and what is not possible. Something. As long as you hold onto these things they will hold you back. Fourth, you need to perceive new possibilities for resolving your Big Question. For various reasons, you are not able to see alternative resolutions today. You need to reframe your question in a way that will enable you to apply the substantial resources you have to address each and every part of the question. If you have a Big Question, you are stuck at one of those four stages. At which stage are you stuck? McClellan provides a complete roadmap for getting from the question you have to the question you need to answer. Dither no longer. Commit to the Total Question Workout. Address the Big Question you need to answer to take charge of running your business or your life. You can move forward. But first, you have to take the next step.
