The Ethics of Teaching May 15 2021 The Ethics of Teaching provides a frank discussion of the most frequently encountered ethical dilemmas that can arise in educational settings, as well as tips on how to avoid these predicaments and how to deal with them when they do occur. The goal is to stimulate discussion and raise faculties' consciousness about ethical issues. Ethical dilemmas are presented as short, engaging case scenarios, most of which are based on actual situations, so as to furnish more realistic and interesting stimuli for individual reflection and group discussion. These scenarios offer the opportunity to consider the subtle complexities inherent in the social and psychological contexts in which educator-student interactions occur and the effects of those complexities on ethical decision making. Each case is followed by a detailed analysis and advice. The book's 195 cases are grouped into 22 chapters representing topics, such as the controversial classroom presentations and assignments, debatable testing and grading practices, problematic student-faculty interactions, dual-role relationships with students, collegial conflicts, managing very difficult students, and confidentiality dilemmas. The Ethics of Teaching: A Casebook, Second Edition: *focuses on commonly encountered ethical "gray areas" that have no clear solution; *includes questions to stimulate discussion of related ethical issues; *concludes with a chapter on prevention, peer mentoring, and intervention; and *serves as excellent "assigned reading" to stimulate group discussion in teaching workshops and faculty development programs. The first edition of this book evolved by collecting a variety of teaching situations that commonly occur in college and university settings. The authors then created responses to the situations and circulated both the cases and the responses to reviewers from a number of departments across the country. As a result, the vast majority of the cases are "discipline free." The second edition features many new cases to reflect recent trends and events related to academic ethics. Questions were added to stimulate discussion and to further elaborate the issues. The Ethics of Teaching: A Casebook is ideal for college and university faculty, graduate assistants, and administrators involved in workshops, graduate teaching assistant courses, and faculty development and new faculty orientation programs. As a result of the book's cross-disciplinary development, it will be beneficial to faculty from a broad spectrum of disciplines.

Christian Formation Dec 10 2020 Editors and authors James Estep and Jonathan Kim have pulled together something often talked about but seldom seen, namely, a thoroughgoing attempt to integrate theology and science, in this case, social science. Their organization, interpretation, and evaluation of mountains of information from both sides has resulted in an expert, yet easily understandable guide to Christian spiritual formation and development. Both academics and practitioners will find help in this volume, one that is certain to be a standard work for years to come.

Kantian Thinking about Military Ethics May 27 2022 Kantian-inspired approaches to ethics are a hugely important part of the philosophical landscape in the 21st century, yet the lion's share of the work done in service of these approaches has been at the theoretical level. Moreover, when we survey writing in which Kantian-inspired thinkers address practical ethical problems, we do not often enough find sustained attention being paid to issues in military ethics. This collection presents a sampling of how an ethicist who takes Kantian commitments seriously addresses controversial questions in the profession of arms. It examines some of the less frequently studied topics within military ethics such as women in combat, military careerism, homosexuality, teaching bad ethics, immoral wars, collateral damage and just war theory. Presenting philosophical thinking in an easy to understand style, the volume has much to offer to a military audience.
