Compensation for Environmental Damages Under International Law Jul 16 2021 At present there is no clear model under international law with which to determine compensation for environmental damage. After showing that no existing standard of compensation defined by the theory and practice of international law is adequate to cover all cases involving environmental damages - and that such a broad standard or set of standards may in fact be ultimately unachievable - the author of this important book develops a 'fair compensation' regime from an analysis of existing international dispute adjudication mechanisms, and presents this model as the best possible current approach to the conciliation of international responsibility and environmental interests.
