*High Desert Barbecue* Oct 02 2022 Conspiracy, arson and ineptitude threaten the desert West, and only a misanthropic hermit, a subversive schoolteacher and an unemployed business writer stand in the way. Living as a squatter on public land, Rollo has long waged a personal war against the Forest Service, so it's little surprise when rangers burn him out of his latest shack. But when Rollo is subsequently blamed for a disastrous wildfire, he seeks help from his close friend, Scott, an anarchically minded outdoors enthusiast, and Scott's girlfriend Lani, who dislikes Rollo but shares his distaste for authority. While investigating a suspicious new forest fire, the trio interrupts a bizarre but vicious gang of environmental terrorists. Chased through the canyon country of northern Arizona, Rollo, Scott and Lani must rely on their wits and skills to survive. Just steps behind, their pursuers compensate for incompetence and sexual eccentricity with fanaticism and official connections. Hanging in the balance is the fate of human habitation throughout the West -- or maybe just peace and quiet in downtown Flagstaff.

[The Pygmy Hippo Story](#) May 05 2020

Though the pygmy hippopotamus has been designated as a flagship species of West

African forests (meaning that by raising conservation efforts for a single species, an entire ecological region could benefit), very little research has been published on the animal. They are solitary, nocturnal, and highly evasive, and until recent developments in "camera trap" technology, they were considered the least-photographed large mammal species in the world. The information currently available on this endangered species is scattered, limited, redundant, and often inaccurate, and no major volume exists as a resource for those interested in the conservation effort for the species, until now. Phillip Robinson and his coauthors provide a treatment of the natural history, biology, and ecology of the pygmy hippo, along with a discussion of the rare animal's taxonomic niche and a summary of the research initiatives involving it up to this point. The authors show the ways in which the pygmy hippo has come into contact with people in West African countries, both in terms of ecological and cultural impact. This creature has been the subject of local folktales, and is treated as almost mythic in some regions. Information on issues related to captivity, breeding, and zoos is provided. The book is heavily illustrated with original photographs and anatomic drawings. The project should be of use to conservation biologists, zoologists and natural history readers, and will be the definitive single-volume account of an animal that the scientific community has designated to be ecologically significant to West Africa.

**A Dog Called Hope** Dec 12 2020 A decade ago, Special Forces warrior Jason Morgan parachuted into the Central American jungle on an anti-narcotics raid. Months later, he regained consciousness in a US military hospital, with no memory of how he'd gotten there-- and a prognosis that he would never walk again. After multiple surgeries and numerous setbacks, Morgan was a single father confined to a wheelchair and tortured by his pain. Light came in the form of Napal, the black Labrador who would change his life forever. This is the story of how one very special dog gave a man's life true meaning.

**Millen County Standoff** Jun 05 2020 Homegrown terrorists and a religious cult are at war with the U.S. government in peaceful, rural America. A Catholic priest and a murdered boy's mother, swept up in the conflict, are haunted by a decision made thirty years before. Millen County Standoff could happen anywhere, when patriotism and religion cross the line into hate.

**Recovery** Oct 29 2019 After the fall of the Soviet Union, Russia left stockpiles of chemical weapons scattered across its former empire in Eastern Europe. Now, awash in petro dollars, and with the United States attention diverted to other trouble spots, the Kremlin is ready to regain its past glory and recover those weapons. A forgotten base, isolated in Moldova, seems to be the perfect place to use as a transfer point. The 289th Engineers, needing to rest, rebuild and recover their strength, get assigned to the same area, as a NATO mission, to build a road for the Moldovans. The Russians want the road too, but for their own purposes. It should have been the perfect arrangement for everyone, but an old enemy of the 289th from Darfur wants to rebuild

his reputation, and exact some revenge at the same time. And now hes working for the Russians. Chechen rebels have also learned the Russian secret. They want the chemical stockpile to use against the Russians. It seems Sergeant Major Grant has found himself another little war.
