**Mission Accomplished** 28 2020 In an increasingly Manichean geopolitical world, Bendib happens to be both "Us" and "Them," American and Muslim, a walking oxymoron - a "Clash of Civilizations" made flesh. He is the only American political cartoonist with an in-your-face non-European perspective, a voice of the voiceless. Distributed to 1,700 small and mid-size newspapers across North America, Bendib's cartoons are the only circulated editorial cartoons free of the usual corporate narrative and they offer a radical, indigenous perspective in a visual medium accessible to all. Bendib's cartoons shine a light on such topics as the corrupting influence of money on democracy, African-American and immigrant issues, environmental degradation, labor and class struggles, U.S. imperialism and Zionism, the scapegoating of Arabs, Muslims and other people of color, as well as the complicity of our Orwellian mass media in maintaining the status quo. Bendib's cartoons are very popular with legions of alternative, educated, left-of-center readers (especially in the Bay Area, Los Angeles, New York and campus towns across the USA, as well as much of Canada, the UK and Australia) hungry for humorous voices of dissent and with many forgotten constituencies in this country, which are slowly becoming African-Americans, Muslims, Arabs, South Asians, Latinos, immigrants of all stripes, worldwide indigenous communities ravenous for edgy humor reflecting their specific concerns. -- Description from <http://www.amazon.com> (Nov. 3, 2011).

**The Atlantic Charter** 18 2022 In the summer of 1941, the Atlantic Charter marked the first of many meetings between President Franklin D. Roosevelt and Prime Minister Winston Churchill. The Charter laid out eight articles promoting ideals such as equality among nations and promising postwar freedom of the seas. It was ironic that in a conference concerning war aims, the United States was still a neutral country and the British were unsure they could win the war against Germany.

**The Rhetoric of Oil in the Twenty-First Century** 23 2019 This book examines the rhetorical and discursive ways that governments and corporations shape public opinion and public policy and activists attempt to reframe public debates in order to resist corporate framing regarding oil in the twenty-first century.

**Thomas Nast** 21 2022 "Thomas Nast (1840-1902), the founding father of American political cartooning, is perhaps best known for his caricatures portraying political parties as the Democratic donkey and the Republican elephant. Nast's legacy also includes a trove of other political cartoons, a successful attack on the machine politics of Tammany Hall in 1871, and his wildly popular illustrations of Santa Claus for Harper's Weekly magazine. In this thoroughgoing and lively biography, Fiona Deans Halloran interprets his work, explores his motivations and ideals, and illuminates the legacy of Nast's work on American political culture"--

**Beyond the Boundaries** 13 2021 In the past, African American aspirations for political office were assumed to be limited to areas with sizeable black population bases. By and large, black candidates have rarely been successful in statewide or national elections. This has been attributed to a number of factors: limited resources available to African American candidates, or identification with a black liberationist ideological thrust. Other factors have been a relatively small and spatially concentrated primary support base of black voters, and the persistent resistance of many white voters to black candidates. For these reasons, the possibility of black candidates winning elections to national office was presumably just a dream. Common wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend. Objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions. The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics. This volume is anchored by a symposium that focuses on new possibilities in African American politics. Both the elections of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in African American electoral politics. Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely. The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and direction of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates.

**Charting the Future of Translation History** Sep 19 2019 Over the last 30 years there has been a substantial increase in the study of the history of translation. Both well-known and lesser-known specialists in translation studies have worked tirelessly to give the history of translation its due. Clearly, progress has been made, and the history of translation has become a viable independent research area. This book aims at claiming its autonomy for the field with a renewed vigour. It seeks to explore issues related to methodology as well as a variety of discourses on history, laying the groundwork for new avenues, new models, new methods. It aspires to challenge existing theoretical and ideological frameworks. Looking toward the future of history. It is an attempt to address shortcomings that have prevented translation history from reaching its full disciplinary potential. From microhistory, archaeology, periodization, to issues of subjectivity and postmodernism, methodological lacunae are being filled. Contributions in this volume go far beyond the text to uncover the role translation has played in many different times and settings such as Europe, Africa, Latin America, Middle-east and Asia from the 6th century to the 20th. These contributions, which deal variously with the discourses on methodology and history, shed new light on the discipline of translation history in a new light and pave the way to the future of research and teaching in the field.

**Translating Dissent** Jul 18 2019 \*Written by the winners of the Intranews Linguists of the Year award for 2016!\* Discursive and non-discursive interventions in the political arena are heavily mediated by various acts of translation that enable protest movements to connect across the globe. Focusing on the Egyptian experience since 2011, this volume brings together a unique group of activists who are able to reflect on the complex challenges and limitations of one or more forms of translation and its impact on their ability to interact with a variety of domestic and global audiences. Drawing on a wide range of genres and modalities, from documentary film and subtitling to oral narratives, webcomics and street art, the contributors reveal the dynamics and complexities of translation in protest movements across the world. Each unique contribution demonstrates some aspect of the interdependence of these movements and their inevitable reliance on translation to create networks of solidarity. The volume is framed by a compelling introduction by Mona Baker and includes an interview with Egyptian activist and film-maker, Philip Rizk. With contributions by scholars and activists, professionals and activists directly involved in the Egyptian revolution and other movements, Translating Dissent will be of interest to students of translation, intercultural studies and sociology, as well as the reader interested in the study of social and political movements. **Caricature and National Character** Mar 16 2022 According to the popular maxim, a nation at war reveals its true character. In this incisive work Gilbert examines the long history of US war politics through the lens of political cartoons to provide new, unique insights into American cultural identity. Tracing the comic representation of American values from the First World War to the War on Terror, Gilbert explores the power of caricature to expose both the folly in jingoistic virtues and the sometimes-strange fortune in nationalistic vices. He examines the artwork of exemplary American cartoonists—James Montgomery Flagg, Dr. Seuss, Ollie Harrington, and Ann Telnaes—to craft a trenchant image of America. These examinations animate the rhetorical, and indeed comic, force of icons like Uncle Sam, national symbols like the American Eagle, political figures like President Donald J. Trump, and more, as well as the power of political cartoons to comment on issues of race, class, and gender on the home front. Throughout, Gilbert portrays a US culture rooted in and riven by ideas of manifest destiny, patriotism, and democracy for all, yet plagued by the excesses of nationalism, misogyny, racism, and violence. Rich with examples of hilarious and masterfully drawn caricatures from a diverse range of creators, an unflinching look at the evolution of our conflicted national character illustrates how American cartoonists use farce, mockery, and wit to put their character in the comic looking glass.

The Oxford Handbook of Communist Visual Culture Oct 01 2020 Stereotypes often cast communism as a defunct, bankrupt ideology and a relic of a distant past. However, recent political movements like Europe's anti-austerity protests, the Arab Spring, and Occupy Wall Street suggest that communism is still very much relevant and may even hold the key to a new, idealized future. In *The Oxford Handbook of Communist Visual Culture*, contributors trace the legacies of communist ideology in visual culture, from buildings and monuments, murals and sculpture, to recycling campaigns and wall newspapers, all of which work to make communism's ideas and values material. Contributors work to resist the widespread demonization of communism, demystifying its ideals and suggesting that it has visually shaped the modern world in undeniable and complex ways. Together, they answer crucial questions like: What can be salvaged and reused from past communist experiments? How has communism impacted the culture of capitalism? And how have histories of communism left behind visual traces of potential utopias? An interdisciplinary look at the cultural current of communism today, *The Oxford Handbook of Communist Visual Cultures* demonstrates the value of revisiting the practices of the past to for vision of the future.

Representing Congress Aug 23 2022 INTRODUCTION Representing Congress presents a selection of political cartoons by Clifford K. Berryman to engage students in a discussion of what Congress is, how it works, and what it does. It features the masterful work of one of America's preeminent cartoonists and showcases his ability to use portraits, representative symbols and figures, and iconic personifications to convey thought-provoking commentary into the institutions and issues of civic life. The House of Representatives and Senate take center stage as national elected officials work to realize the ideals of the Founders. This eBook is designed to teach students to analyze history as conveyed in visual media. The cartoons offer comments on various moments in history, and they challenge the reader to evaluate their perspective and objectivity. Viewed outside their original journalistic context, the cartoons engage and amuse as comic art, but they can also puzzle a reader with references to little-remembered events and people. This provides contextual information on each cartoon to help dispel the historical mysteries. Berryman's cartoons were originally published as illustrations on the front page of the *Washington Post* and the *Washington Evening Star* at various dates spanning the years from 1896 to 1949. Thirty-nine cartoons selected from the more than 2,400 original Berryman drawings preserved at the Center for Legislative Archives convey thumbnail sketches of congressional inaction to reveal some of the enduring features of our national representative government. For more than 50 years, Berryman's cartoons engaged the readers of *Washington's* newspapers, illustrating everyday political events as they related to larger issues of civic life. These cartoons promise to engage students in similar ways today. The cartoons intrigue and inform, puzzle and inspire. Like Congress itself, Berryman's cartoons seem familiar at a glance. Closer study reveals nuances and design features that invite in-depth analysis and discussion. Using these cartoons, students engage with substantive challenges to unlock each cartoon's meaning and better understand Congress. As they do so, students will develop the critical thinking skills so important to academic success and the future health and longevity of our democratic republic.

**Interpreting Communicative Language Teaching** Oct 9 2021 The emergence of English as a global language, along with technological innovations and the growing need for learner autonomy, is changing language teaching rapidly and profoundly. With these changes come new demands and challenges for teaching education programs. This authoritative collection of writings highlights some of the best work being done today in the United States and abroad to make communicative competence an attainable goal. The contributors examine what has come to be known as communicative language teaching, or CLT, from the perspectives of teachers and teacher educators. The book documents current reform initiatives in Japan, the United States, Hong Kong, Taiwan, and continental Europe to provide a global perspective on language teaching for communicative competence. Four themes recur throughout the volume: the multifaceted nature of language teaching; the highly contextualized nature of CLT; the futility of designating a "native speaker" in the postcolonial, postmodern world; and the overwhelming influence of high-stakes tests on language teaching. The book is a rich and valuable tool for language teachers, teacher educators, and policymakers.
