Unfinished Lines Nov 11 2020 Mark Yonge had, for many years, wanted to write a book about railway projects that were started but never completed. The physical evidence of these works throughout England although rapidly vanishing, can still be seen in places to this day. The reader can view several examples which include viaducts, earthworks, bridges, partially completed tunnels, an abandoned tunnel boring machine and the beginnings of a major London airport. Behind all these tales are stories of intrigue, manipulation, interference by the armed forces and sometimes great sadness brought about by personal ambition and ruin. These remaining assets are in the main, not protected by legislation and are thus at risk of demolition at any time. It is to be hoped that this record of their existence in the 2020s may go a little way towards recording some of our more interesting and neglected features of railway history for the benefit of future generations.

Contact Lines for Electric Railways Aug 28 2019 Electric traction is the most favourable type of power supply for electric railways from both an ecological and an economic perspective. In the case of urban mass transit and high-speed trains it is the only possible type of traction. Its reliability largely depends on contact lines, which must operate in all climatic conditions with as high availability and as little maintenance as possible. Extreme demands arise when overhead contact lines are required to provide reliable and safe power transmission to traction vehicles travelling at speeds in excess of 250 km/h. The authors have used their worldwide experience to provide comprehensive descriptions of configuration, mechanical and electrical design, installation, operation and maintenance of contact lines for local and long-distance transportation systems, including high-speed lines. In this book, railway company professionals and manufacturers of contact line systems, students and those embarking on a career in this field will find practical guidance in the planning and implementation of systems, product descriptions, specifications and technical data, including standards and other regulations. Special emphasis is laid on the interaction of the individual components of power supply, especially between contact lines and pantographs. Since large sections of the book are dedicated to system aspects, consultant engineers can also use it as a basis for designing systems as well as interfaces to other subsystems of electric railway engineering. The contents of the book are rounded off by examples of running systems.

But Will's innovative vision did inspire a big idea that would set him apart: he turned numbers into pictures by creating line graphs, bar graphs and pie charts! Numbers as pictures? There's an idea that's off the charts!

Phantasmagorias Oct 11 2020 Every human being has creative capacities that sadly often remain hidden. One is never short of distractions and rarely has time to daydream. Inspired by alpha-numeric characters, symbols and geometric elements Willi Kunz has, over many years and in regular short sessions, documented his creative thoughts in his sketchbooks. The symmetrical dimensions of a square are always the defining frame from which he produces three esthetically connected line drawings. Detached from everyday life and led by his intuition, his ideas have developed into fascinating images. These show just how our inner qualities can find expression through a concentrated, almost meditative creative process. With its black and white illustrations this book is a source of inspiration ? not only ? for anyone suffering from creative block. Professional Crocodile Jun 18 2021 In this book without words, Mr. Crocodile gets up every morning and carefully gets ready for work—but just what is his job? Lines Jun 30 2022 What do walking, weaving, observing, storytelling, singing, drawing and writing have in common? The answer is that they all proceed along lines. In this extraordinary book Tim Ingold imagines a world in which everyone and everything consists of interwoven or interconnected lines and lays the foundations for a completely new discipline: the anthropological archaeology of the line. Ingold's argument leads us through the music of Ancient Greece and contemporary Japan, Siberian labyrinths and Roman roads, Chinese calligraphy and the printed alphabet, weaving a path between antiquity and the present. Drawing on a multitude of disciplines including archaeology, classical studies, art history, linguistics, psychology, musicology, philosophy and many others, and including more than seventy illustrations, this book takes us on an exhilarating intellectual journey that will change the way we look at the world and how we go about in it. This Routledge Classics edition includes a new preface by the author. This Book Is for You Jul 20 2021 Beloved artist Worry Lines shares a sweetly funny and deeply relatable illustrated story about hope, worry, and chocolate chip cookies. Worry Lines has captured hearts around the world by posting daily drawings on Instagram. In this book, Worry Lines interweaves these fan-favorites into an entirely new story about the making of the book itself. Charting the creative process from its anxiety-riddled beginning to its (hopefully) hopeful end, This Book Is for You is a charming and honest portrait of worry. This book is for you if you are: 1. A Brave Worrier (BW) 2. An Absolute Legend (AL) 3. Anywhere from Mildly Concerned About Something (MCAS) to Deeply Anxious About Everything (DAAE) Color outside the Lines Jul 08 2020 This modern, groundbreaking YA anthology explores the complexity and beauty of interracial and LGBTQ+ relationships where differences are front and center. When people ask me what this anthology is about, I'm often tempted to give them the complicated answer: it's about race, and about how being different from the person you love can matter but how it can also not matter, and it's about Chinese pirate ghosts, black girl vigilantes, colonial India, a flower festival, a garden of poisons, and so, so much else. Honestly, though? I think the answer's much simpler than that. Color outside the Lines is a collection of stories about young, fierce, brilliantly hopeful people in love.—Sangu Mandanna, editor of Color outside the Lines With stories by: Samira Ahmed | Elsie Chapman | Lauren Gibaldi | Lydia Kang | Michelle Ruiz Keil | Lori M. Whether made by the tip of a pencil or the blade of a skate, the magic starts there. And magic once again flows from the pencil and imagination of internationally acclaimed artist Suzy Lee. With the lightest of touches, this masterwork blurs the lines between real and imagined, reminding us why Lee's books have been lauded around the world, recognized on New York Times Best Illustrated Books lists and nominated for the Hans Christian Andersen Award, the highest international honor given to children's book creators. This seemingly simple story about a young skater on a frozen pond will charm the youngest of readers while simultaneously astounding book enthusiasts of any age. Plus, this is the fixed format version, which looks almost identical to the print edition. Crossing the Lines Apr 16 2021 A series of people find their fates intertwined, from a teenager's seduction by the outside world, to his romance with a girl whose life is precariously balanced, to the struggles of his middle-aged parents. The Life of Lines Aug 01 2022 To live, every being must put out a line, and in life these lines tangle with one another. This book is a study of the life of lines. Following on from Tim Ingold's groundbreaking work Lines: A Brief History, it offers a wholly original series of meditations on life, ground, weather, walking, imagination and what it means to be human. In the first part, Ingold argues that a world of life is woven from knots, and not built from blocks as commonly thought. He shows how the principle of knotting underwrites both the way things join with one another, in walls, buildings and bodies, and the composition of the ground and the knowledge we find there. In the second part, Ingold argues that to study living lines, we must also study the weather. To complement a lineage that asks what is common to walking, weaving, observing, singing, storytelling and writing, he develops a meteorology that seeks the common denominator of breath, time, mood, sound, memory, colour and the sky. This denominator is the atmosphere. In the third part, Ingold carries the line into the domain of human life. He shows that for life to continue, the things we do must be framed within the lives we undergo. In continually answering to one another, these lives enact a principle of correspondence that is fundamentally social. This compelling volume brings our thinking about the material world refreshingly back to life. While anchored in anthropology, the book ranges widely over an interdisciplinary terrain that includes philosophy, geography, sociology, art and architecture.
