(Cth). The first of two recurring themes in the book asks the question whether the needs and status of government should be different from private sector institutions, which also obtain copyright protection under the law. The second theme aims to identify the relationship between government copyright law and policy, national cultural policy and fundamental governance values. "As the first authoritative treatise on

government copyright to be published in Australia, this book will be of immediate interest and relevance to Australian lawyers and policy makers, particularly in the light of ongoing efforts to ensure that the intellectual property system stimulates innovation and fosters trade and investment. Given that government copyright is recognised to some extent in most countries worldwide, this book is a valuable contribution to the international

opportunities and challenges that exist in the current, fast-changing landscape of the global marketplace. Current global issues such as the rising middle class in emerging markets, disruptive technological breakthroughs, big data analytics, changing consumer habits and concerns over national trade policies have renewed ethical concerns around consumer privacy and the tools companies use to operate, market to, connect and build a relationship with their customers. Featuring the full proceedings from the 2019 Academy of Marketing Science (AMS) Annual Conference held in Vancouver,

Canada, this book explores and assesses the rate of change that drives companies to evaluate and adapt their marketing strategies to remain competitive. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses, and symposia that attract delegates from around the world. Presentations from these events are

collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including

the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of

Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

political worlds. Cutting across disciplines, the book opens up the conceptual and empirical study of housing and home by exploring the coproduction of the concrete and the abstract, the intimate and the institutional, the experiential and the collective. Exploring diverse examples in Australia and New Zealand, contributors address the interleaving of money and materials in the digital commodity of real estate, the neoliberal invention of housing as a liquid asset and source of welfare provision, and the bundling of car and home in housing markets. The more-

The transformative politics of housing and home are explored through the decolonizing of housing tenure, the shaping of housing policy by urban social movements, the lived importance of marginal spaces in Indigenous and

equally powerful desire to avoid economically damaging or unreasonable or unconstitutional limitations. Federal, state, and local governments often wish to restrict or condition uses of private property, while private property owners wish to avoid or seek compensation for such regulatory controls. This battle between property and regulation is one of the most emotionally charged and fiercely contested issues in contemporary law. An enormous amount of litigation, at both the federal and state level, has stemmed from questions surrounding the

extent to which government may restrict or even prevent certain private property uses. The relevant law is constantly changing and evolving, so count on the Law of Property Right Protection to bring you completely up to date. The book is organized according to the many ways that government powers over private property are limited, by the federal and state constitutions, the common law, and equitable principles and has been cited by the United States Supreme Court, federal courts, and state appellate courts. Law of Property Rights Protection: Limitations on

Governmental Powers, Third Edition: Analyzes relevant and current case law, and identifies (1) which challenges by private property owners were successful, (2) what facts seemed compelling to reviewing courts considering property-restrictive regulations, and (3) what arguments by property owners tend to fail in the eyes of reviewing courts. Offers advice on which property-protective provisions in constitutional law maximize the likelihood of a successful challenge to restrictive regulations, as well as advice on how to mount a legal challenge

Centric Intelligent Network Selection in 5G Heterogeneous Wireless Networks Jun 24 2022 This book presents reinforcement learning (RL) based solutions for user-centric online network selection optimization. The main content can be divided into three parts. The first part (chapter 2 and 3) focuses on how to learning the best network when QoE is revealed beyond QoS under the framework of multi-armed bandit (MAB). The second part (chapter 4 and 5) focuses on how to meet dynamic user demand in complex and uncertain heterogeneous

wireless networks under the framework of markov decision process (MDP). The third part (chapter 6 and 7) focuses on how to meet heterogeneous user demand for multiple users in large-scale networks under the framework of game theory. Efficient RL algorithms with practical constraints and considerations are proposed to optimize QoE for realizing intelligent online network selection for future mobile networks. This book is intended as a reference resource for researchers and designers in resource management of 5G networks and beyond. *Access Free oldredlist.iucnredlist.org on November 29, 2022 Free Download Pdf*
