[Lost in the River of Grass](#) Feb 09 2021 "I don't realize I'm crying until he glances at me. For a moment, I see the look of anguish in his eyes, then he blinks it away and slips off into the water. I immediately think of the gator. It's still down there somewhere. . . ." A science-class field trip to the Everglades is supposed to be fun, but Sarah's new at Glades Academy, and her fellow freshmen aren't exactly making her feel welcome. When an opportunity for an unauthorized side trip on an air boat presents itself, it seems like a perfect escape—an afternoon without feeling like a sore thumb. But one simple oversight turns a joyride into a race for survival across the river of grass. Sarah will have to count on her instincts—and a guy she barely knows—if they have any hope of making it back alive.

Prealgebra 2e May 27 2022 The images in this book are in grayscale. For a full-color version, see ISBN 9781680923261. Prealgebra 2e is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Students who are taking basic mathematics and prealgebra classes in college present a unique set of challenges. Many students in these classes have been unsuccessful in their prior math classes. They may think they know some math, but their core knowledge is full of holes. Furthermore, these students need to learn much more than the course content. They need to learn study skills, time management, and how to deal with math anxiety. Some students lack basic reading and arithmetic skills. The organization of Prealgebra makes it easy to adapt the book to suit a variety of course syllabi.

Hoot Apr 01 2020 Hilarious, touching and thought-provoking, *Hoot* is a modern classic, now celebrating its fifteenth anniversary. Winner of the Newbery Honor award and a New York Times bestseller, Carl Hiaasen's first novel celebrates the natural world with his trademark wit and warmth. Roy Eberhardt never wanted to move to Florida. In his opinion, Disney World is an armpit. Roy's family moves around a lot so he's used to the new-kid drill - he's also used to bullies like Dana Matherson. And anyway, it's because of Dana that Roy gets to see the mysterious running boy who runs away from the school bus and who has no books, no backpack and, most bizarrely, no shoes. Sensing a mystery, Roy starts to trail the mystery runner - a chase that will introduce him to many weird Floridian creatures: potty-trained alligators, cute burrowing owls, a fake-fart champion, a shoeless eco-warrior, a sinister pancake PR man, new friends and some snakes with sparkly tails. As the plot thickens, Roy and his friends realise it's up to them to save the endangered owls from the evil Mother Paula's pancake company who are planning to build a new restaurant on their home . . .

Nature Girl Jun 23 2019 A laugh-out-loud trip from Hell through Florida's Everglades by Carl Hiaasen, author of 'Skinny Dip'. Honey Santana, self-proclaimed queen of lost causes, is taking Boyd Shreave on a kayaking trip for a lesson in civility.

Prealgebra Apr 25 2022 "Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.

Harness Horse Dec 22 2021

Microscopic Techniques in Biotechnology Jun 03 2020 Focusing on all current applications, this book presents the various methods as well as their suitability and limitations for a specific question. One particular highlight is the presentation of all basic information on the structure of the relevant objects, thus allowing readers to choose the most suitable applications for any specific problem. They will also find in-depth background information on structure-function relationships, plus descriptions of sample preparations with respect to a particular technique and the necessary equipment. The whole is rounded off with an overview of the future application potential for devices and applications of upcoming interest in biotechnology.

The Complete Learning Disabilities Directory, 2010 May 15 2021 This is the most comprehensive directory of Programs, Services, Curriculum Materials, Professional Meetings & Resources, Camps, Newsletters and Support Groups for teachers, students and families concerned with learning disabilities. This edition is distinguished by its recognition by the National Center for Learning Disabilities, as well as a Glossary of Terms. This information-packed directory includes information about Associations & Organizations, Schools, Colleges & Testing Materials, Government Agencies, Legal Resources and much more. For quick, easy access to information, this directory contains three indexes: Entry Name Index, Subject Index and Geographic Index. With every passing year, the field of learning disabilities attracts more attention and the network of caring, committed and knowledgeable professionals grows every day. This directory is an invaluable research tool for these parents, students and professionals.

Amazing Animals: Alligators: Multiplication 6-Pack Sep 30 2022 What is the difference between an alligator and a crocodile? How many teeth does an adult alligator have? How long do they live, and how big can they get? Students will sink their teeth into reading all about one of their favorite reptiles. This 6-Pack of math readers integrates math and literacy skills, combining informational text, problem-solving, and real-world connections to help students explore mathematics in a meaningful way. Fourth grade students will practice multiplication while learning new concepts and vocabulary terms like habitat, predator, carnivore, antibodies, and endangered species. The captivating images, practice problems, and mathematical charts and diagrams help develop students' math and reading skills. The DOK-leveled Math Talk section facilitates mathematical discourse and higher-order thinking skills with questions that students can respond to at school or home. This full-color book includes text features such as a glossary, index, captions, answer key, and a table of contents to increase understanding and build academic vocabulary. The Problem Solving section and Let's Explore Math sidebars provide numerous opportunities for students to practice what they have learned. This 6-Pack includes six copies of this title and a lesson plan.
