Multicultural Awareness and Technology in Higher Education: Global Perspectives Sep 29 2019
Diversity among university students plays a significant role in raising awareness of numerous issues surrounding cultural heritage, language differences, cross-cultural collaboration, and international education. The integration of technological tools can assist students in cooperating nationally and internationally both in their current educational and future professional settings. Multicultural Awareness and Technology in Higher Education: Global Perspectives encompasses the latest research on the impact and integration of technology into international education and culturally diverse learning environments. Providing the latest teaching and learning methods, technologies, and approaches at the university level, this publication is a useful reference for academics, educational administrators in public and private institutions, and information society researchers. [Issues and Challenges in Science Education Research](#) Apr 28 2022 In contemporary society, science constitutes a significant part of human life in that it impacts on how people experience and understand the world and themselves. The rapid advances in science and technology, newly established societal and cultural norms and values, and changes in the climate and environment, as well as, the depletion of natural resources all greatly impact the lives of children and youths, and hence their ways of learning, viewing the world, experiencing phenomena around them and interacting with others. These changes challenge science educators to rethink the epistemology and pedagogy in science classrooms today as the practice of science education needs to be proactive and relevant to students and prepare them for life in the present and in the future. Featuring

contributions from highly experienced and celebrated science educators, as well as research perspectives from Europe, the USA, Asia and Australia, this book addresses theoretical and practical examples in science education that, on the one hand, plays a key role in our understanding of the world, and yet, paradoxically, now acknowledges a growing number of uncertainties of knowledge about the world. The material is in four sections that cover the learning and teaching of science from science literacy to multiple representations; science teacher education; the use of innovations and new technologies in science teaching and learning; and science learning in informal settings including outdoor environmental learning activities. Acknowledging the issues and challenges in science education, this book hopes to generate collaborative discussions among scholars, researchers, and educators to develop critical and creative ways of science teaching to improve and enrich the lives of our children and youths.

Beyond Dissociation Sep 02 2022 Analysis and dissociation have proved to be useful tools to understand the basic functions of the brain and the mind, which therefore have been decomposed to a multitude of ever smaller subsystems and pieces by most scientific approaches. However, the understanding of complex functions such as consciousness will not succeed without a more global consideration of the ways the mind-brain works. This implies that synthesis rather than analysis should be applied to the brain. The present book offers a collection of contributions ranging from sensory and motor cognitive neuroscience to mood management and thought, which all focus on the dissociation between conscious (explicit) and nonconscious (implicit) processing in different cognitive situations. The contributions in this book clearly demonstrate that conscious and nonconscious processes typically interact in complex ways. The central message of this collection of papers is: In order to understand how the brain operates as one integrated whole that generates cognition and behaviour, we need to reassemble the brain and mind and put all the conscious and nonconscious pieces back together again. (Series B)

Learning from Animations in Science Education Nov 11 2020 This book examines educational semiotics and the representation of knowledge in school science. It discusses the strategic integration of animation in science education. It explores how learning through the creation of science animations takes place, as well as how animation can be used in assessing student's science learning. Science education animations are ubiquitous in a variety of different online sites, including perhaps the most popularly accessed YouTube site, and are also routinely included as digital augmentations to science textbooks. They are popular with students and teachers and are a prominent feature of contemporary science teaching. The proliferation of various kinds of science animations and the ready accessibility of sophisticated resources for creating them have emphasized the importance of research into various areas: the nature of the semiotic construction of knowledge in the animation design, the development of critical interpretation of available animations, the strategic selection and use of animations to optimize student learning, student creation of science animations, and using animation in assessing student science learning. This book brings together new developments in these research agendas to further multidisciplinary perspectives on research to enhance the design and pedagogic use of animation in school science education. Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Games and Learning Alliance Feb 01 2020 This book constitutes the refereed proceedings of the Second International Conference on Games and Learning Alliance, GALA 2013, held in Paris, France, in October 2013. The 25 revised papers presented together with 9 poster papers were carefully reviewed and selected from numerous submissions. The papers advance the state of the art in the technologies and knowledge available to support development and deployment of serious games. They are organized in 3 research tracks on design, technology and application. Also included is the outcome of a GALA workshop on a widely applied instructional design model: 4C-ID.

Games-Based Learning Advancements for Multi-Sensory Human Computer Interfaces: Techniques and Effective Practices Jan 26 2022 Explores the theory and practice of games-based learning, promoting the development and adoption of best practices. Provides a combination of theoretical

chapters as well as practical case studies.

The Illusion of Linearity Oct 11 2020 This book presents the reader with a comprehensive overview of the major findings of the recent research on the illusion of linearity. It discusses: how the illusion of linearity appears in diverse domains of mathematics and science; what are the crucial psychological, mathematical, and educational factors being responsible for the occurrence and persistence of the phenomenon; and how the illusion of linearity can be remedied.

Discourse Perspective of Geometric Thoughts Dec 13 2020 Sasha Wang revisits the van Hiele model of geometric thinking with Sfard's discursive framework to investigate geometric thinking from a discourse perspective. The author focuses on describing and analyzing pre-service teachers' geometric discourse across different van Hiele levels. The explanatory power of Sfard's framework provides a rich description of how pre-service teachers think in the context of quadrilaterals. It also contributes to our understanding of human thinking that is illustrated through the analysis of geometric discourse accompanied by vignettes.

Behavior Modification in the Human Services Oct 23 2021

Computer Supported Education Jul 08 2020 This book constitutes selected, revised and extended papers from the 12th International Conference on Computer Supported Education, CSEDU 2020, held as a virtual event in May 2020. The 25 revised full papers were carefully reviewed and selected from 190 submissions. The presented papers contribute to the understanding of relevant trends of current research on Computer Supported Education, including learning analytics, intelligent tutoring systems, virtual and augmented reality, MOOCs, and automated assessment systems.

Building Vocabulary: Level 9 Kit Jul 20 2021 Building Vocabulary from Word Roots provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary from Word Roots: Level 9 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Mathematical Reasoning of Children and Adults Sep 09 2020 This book adopts an interdisciplinary approach to investigate the development of mathematical reasoning in both children and adults and to show how understanding the learner's cognitive processes can help teachers develop better strategies to teach mathematics. This contributed volume departs from the interdisciplinary field of psychology of mathematics education and brings together contributions by researchers from different fields and disciplines, such as cognitive psychology, neuroscience and mathematics education. The chapters are presented in the light of the three instances that permeate the entire book: the learner, the teacher, and the teaching and learning process. Some of the chapters analyse the didactic challenges that teachers face in the classroom, such as how to interpret students' reasoning, the use of digital technologies, and their knowledge about mathematics. Other chapters examine students' opinions about mathematics, and others analyse the ways in which students solve situations that involve basic and complex mathematical concepts. The approaches adopted in the description and interpretation of the data obtained in the studies documented in this book point out the limits, the development, and the possibilities of students' thinking, and present didactic and cognitive perspectives to the learning scenarios in different school settings. *Mathematical Reasoning of Children and Adults: Teaching and Learning from an Interdisciplinary Perspective* will be a valuable resource for both mathematics teachers and researchers studying the development of mathematical reasoning in different fields, such as mathematics education, educational psychology, cognitive psychology, and developmental psychology.

Building Vocabulary: Grade 5: Kit eBook Sep 21 2021

Distributed Autonomous Robotic Systems Aug 09 2020 Distributed robotics is a rapidly growing and maturing interdisciplinary research area lying at the intersection of computer science, network

science, control theory, and electrical and mechanical engineering. The goal of the Symposium on Distributed Autonomous Robotic Systems (DARS) is to exchange and stimulate research ideas to realize advanced distributed robotic systems. This volume of proceedings includes 31 original contributions presented at the 2012 International Symposium on Distributed Autonomous Robotic Systems (DARS 2012) held in November 2012 at the Johns Hopkins University in Baltimore, MD USA. The selected papers in this volume are authored by leading researchers from Asia, Europa, and the Americas, thereby providing a broad coverage and perspective of the state-of-the-art technologies, algorithms, system architectures, and applications in distributed robotic systems. The book is organized into five parts, representative of critical long-term and emerging research thrusts in the multi-robot community: Coordination for Perception, Coverage, and Tracking; Task Allocation and Coordination Strategies; Modular Robots and Novel Mechanisms and Sensors; Formation Control and Planning for Robot Teams; and Learning, Adaptation, and Cognition for Robot Teams.

[Artificial Intelligence in Education](#) Apr 16 2021 This work reports on research into intelligent systems, models, and architectures for educational computing applications. It covers a wide range of advanced information and communication and computational methods applied to education and training.

Handbook of Research on Innovative Digital Practices to Engage Learners Jun 26 2019 Digital integration is the driving force of teaching and learning at all levels of education. As more non-traditional students seek credentialing, certification, and degrees, institutions continue to push the boundaries of innovative practices to meet the needs of diverse students. Programs and faculty have moved from merely using technology and learning management systems to unique and innovative ways to engage learners. The Handbook of Research on Innovative Digital Practices to Engage Learners is an essential scholarly publication that offers theoretical frameworks, delivery models, current guidelines, and digital design techniques for integrating technological advancements in education contexts to enforce student engagement and positive student outcomes. Featuring a wide range of topics such as gamification, wearable technologies, and distance education, this book is ideal for teachers, curriculum developers, instructional designers, principals, deans, administrators, researchers, academicians, education professionals, and students.

Virtual Destinations and Student Learning in Middle School May 30 2022 Educators increasingly leverage the Internet to enhance traditional programs and approaches. "Virtual Destinations and Student Learning in Middle School" provides the most detailed case study of such an approach ever undertaken. Donaldson examines the impact of an online museum called Museum Explorer! on middle school students knowledge and learning engagement when combined with traditional pedagogy. (Education/Teaching)

Rapid Interpretation of Heart and Lung Sounds Oct 30 2019 Learn to properly identify, interpret, and differentiate a wide variety of canine and feline heart and lung sounds with Rapid Interpretation of Heart and Lung Sounds: A Guide to Cardiac and Respiratory Auscultation in Dogs and Cats, 3rd Edition. A brand new companion website features both simulated and actual clinical examples to help you master and evaluate common sounds like murmurs and arrhythmias. And with the helpful instructions in the text integrated with the heart and lung sounds, you will be well prepared to perform accurate heart and lung auscultation in dogs and cats. Heart sound simulator allows you to focus on the heart sounds without the distraction of respiratory sounds or artifacts of hair rubbing against the stethoscope. Wide variety of heart and lung sounds provides you with real-life cases that are as close to clinical practice as possible. Pretests may be taken prior to reviewing the book and website to measure how much you already know. Posttests help determine when the material has been mastered and direct the user to remediation in areas where additional study is needed. Inclusion of clinically-relevant conditions makes it easy for you to apply this information to day-to-day practice. Key points called out within the text alert you to potential problems, variations on techniques, and other treatment considerations. NEW! User-friendly companion website integrated with the text fully prepares you to identify, interpret, and differentiate heart and lung sounds in dogs and cats. EXPANDED! Respiratory content offers actual examples of video and lung

sounds on respiratory patterns in animals that are dyspneic from various causes.

Information Quality in e-Health Aug 01 2022 This book constitutes the refereed proceedings of the 7th Conference of the Workgroup Human-Computer Interaction and Usability Engineering of the Austrian Computer Society, USAB 2011, in Graz, Austria, in November 2011. The 18 revised full papers together with 29 revised short papers and 2 posters presented were carefully reviewed and selected from 103 submissions. The papers are organized in topical sections on cognitive approaches to clinical data management for decision support, human-computer interaction and knowledge discovery in databases (hci-kdd), information usability and clinical workflows, education and patient empowerment, patient empowerment and health services, information visualization, knowledge & analytics, information usability and accessibility, governmental health services & clinical routine, information retrieval and knowledge discovery, decision making support & technology acceptance, information retrieval, privacy & clinical routine, usability and accessibility methodologies, information usability and knowledge discovery, human-centred computing, and biomedical informatics in health professional education.

Language Arts Activities Using Colorful Cut-Outs™, Grade 2 Nov 23 2021 Motivate and engage students in grade 2 with Language Arts Activities Using Colorful Cut-Outs™. This 112-page book is filled with skills-based, interactive language arts activities that are fun to use and easy to prepare. It includes more than 40 activities that focus on punctuation, prefixes and suffixes, synonyms and antonyms, and alphabetical order. The book also includes leveled activities, a skills matrix, an assessment matrix, and reproducible cutouts and aligns with state, national, and Canadian provincial standards.

Interaction, Communication and Development Dec 25 2021 For decades there has been considerable interest in the ways that interactions between children can provide a beneficial context for the study of cognitive and social development. In this book Psaltis and Zapiti use both theoretical and empirical research to build on the perspectives of Piaget, Vygotsky, Moscovici, and others including the legacy of Gerard Duveen, to offer a state of the art account of research on the themes of social interaction and cognitive development. *Interaction Communication and Development* discusses the significance of social identities for social interaction and cognitive development. The empirical set of studies presented and discussed focus on patterns of communication between children as they work together to solve problems. Communications are examined in detail with a focus on: Socio-cognitive conflict, conversational moves and conversation types The way the different forms of the interactions relate to different sources of asymmetry in the classroom The way social representations and social identities of gender are negotiated in the interaction This book provides an important account of how children develop through different kinds of social interactions. It will have considerable appeal for researchers in the fields of developmental psychology, socio-cultural psychology, social representations theory and education who wish to gain a deeper understanding of development and its relation to socio-cultural processes.

Discovery Science May 06 2020 This book constitutes the refereed proceedings of the 10th International Conference on Discovery Science, DS 2007, held in Sendai, Japan, in October 2007, co-located with the 18th International Conference on Algorithmic Learning Theory, ALT 2007. The papers cover all issues in the area of development and analysis of methods for intelligent data analysis, knowledge discovery and machine learning, as well as their application to scientific knowledge discovery.

Teaching European Citizens. A Quasi-experimental Study in Six Countries Feb 24 2022 In the framework of the EU-funded project TEESAEC, an instructional research project was conducted in six European countries (Austria, Estonia, Germany, The Netherlands, Switzerland, United Kingdom). In the quasi-experimental study, an innovative series of lessons on the European Union was introduced into politics lessons in the form of a WebQuest. The intervention study aimed to determine whether the problem-based learning environment WebQuest leads to greater cognitive outcomes as compared with traditional lessons in politics. Knowledge increase was assessed in 14 to 16 year-old students by means of a knowledge test applied before and after the intervention. The

test items employed in TEESAEC cover basic (literacy) competences which are of use in situations in which concrete political knowledge is to be applied. The reports from the six countries involved present the gains associated with lessons in politics, revealing not only strengths but also weaknesses of politics lessons. The current volume presents the main results of the study.

Financial Systems in Troubled Waters Jun 30 2022 This collection considers the financial crisis from a managerial perspective, focussing on the business implications for the financial industry. Topics examined include governance, information needs and strategy of financial intermediaries and investors. The contributions build on the existing literature and present some unique insights on governance, credit quality evaluation and performance measurement. In a fast growing or steady market, it is possible for even an inefficient financial system to satisfy investors' and firms' needs. However, the current financial crisis has brought into sharp relief the limits of the inefficient practices adopted by the market, and made clear the importance of developing more effective governance mechanisms, more detailed and complete information databases and new strategies. The crisis has also brought to the fore issues about the governance of financial intermediaries that had not been previously addressed. These include board diversity, internal monitoring procedures and the existence of interlocking directorates. More broadly, the financial crisis has radically altered the international framework, with an increasingly consolidated financial sector, and the rise of new markets (such as China) that now play a predominant role in the worldwide market. Studies on the competition and on the performance in this new scenario are essential in order to understand the implications of recent events.

Second Language Pronunciation Jan 02 2020 In the field of second language (L2) acquisition, the number of studies focusing on L2 pronunciation instruction and perceptual/production training has increased as new classroom methodologies have been proposed and new goals for L2 pronunciation have been set. This book brings together different approaches to L2 pronunciation research in the classroom or in the language laboratory. 13 chapters, written by well-known researchers focusing on a variety of first and target languages, are divided into four parts: Pronunciation development and intelligibility: implications for teaching and training studies; L2 pronunciation teaching; L2 pronunciation training: implications for the classroom; and Pronunciation in the laboratory: High Variability Phonetic Training. Intended for researchers in the fields of second language acquisition, phonetics, phonology, psycholinguistics, speech therapies, speech technology, as well as second language teaching, this book not only summarizes the current research questions on L2 pronunciation teaching and training, but also predicts future scenarios for both researchers and practitioners in the field.

Building Vocabulary: Grade 4: Kit eBook Aug 21 2021 Building Vocabulary from Word Roots provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary from Word Roots: Level 4 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Certified Respiratory Therapist Exam Review Guide Oct 03 2022 Certified Respiratory Therapist Review Guide is a comprehensive study guide for respiratory therapy students and graduates of accredited respiratory therapy education programs who are seeking to take the entry-level Certified Respiratory Therapist(CRT) credentialing exam from the National Board for Respiratory Care (NBRC). This unique review guide devotes extensive coverage to two problematic areas for credentialing exam candidates, which are not covered in any of the other texts: 1). test-taking skills, and 2). key points to remember in taking the NBRC computerized exams. Special emphasis is also given to material and subject areas which have proven to be especially challenging for exam candidates (such as basic pulmonary function testing, arterial blood gas [ABGs] interpretation, monitoring critically ill [ICU] patients, neonatal and pediatric care, recommending

modifications to therapy, and more). Certified Respiratory Therapist Review Guide is authored by experts who take the credentialing exam annually, so you can be sure the content and format of this guide is current!

Studies on the educational quality of schools Nov 04 2022 The priority program 'The educational quality of schools' has been established seven years ago by the German Research Foundation (DFG). The projects in this program investigated conditions inside and outside of school and their impact on the development of mathematical, scientific, and cross-curricular competencies. In this book major findings of the program are presented. The projects not only give an overview of their research questioning methods and findings, but also of approaches and materials that have been developed to support learning and teaching in mathematics and science class rooms. The studies reported here identify factors for weaknesses in the educational outcomes that became apparent in the international comparisons like TIMSS and PISA. The projects, however, provide empirically substantiated units on approaches that can help to improve the educational quality of schools. [Publisher, ed].

Cognitive Units, Concept Images, and Cognitive Collages: An Examination of the Processes of Knowledge Construction Jun 06 2020

Safe Communities Mar 28 2022

Informatics in Schools. Fundamentals of Computer Science and Software Engineering Jul 28 2019 This book constitutes the proceedings of the 11th International Conference on Informatics in Schools: Situation, Evolution and Perspectives, ISSEP 2018, held in St. Petersburg, Russia, in October 2018. The 29 full papers presented in this volume were carefully reviewed and selected from 74 submissions. They were organized in topical sections named: role of programming and algorithmics in informatics for pupils of all ages; national concepts of teaching informatics; teacher education in informatics; contests and competitions in informatics; socio-psychological aspects of teaching informatics; and computer tools in teaching and studying informatics.

Open Learning and Teaching in Educational Communities Mar 04 2020 This book constitutes the refereed proceedings of the 9th European Conference on Technology Enhanced Learning, EC-TEL 2014, held in Graz, Austria, in September 2014. The 27 full papers and 18 short papers presented were carefully reviewed and selected from 165 submissions. They address topics such as informal learning, self-regulated and self-directed learning, reflective learning, inquiry based learning, communities of learners and communities of practice, learning design, learning analytics, personalization and adaptation, social media, computer supported collaborative learning, massive open online courses, schools and universities of the future.

Language Teaching Research and Language Pedagogy Dec 01 2019 This book examines current research centered on the second language classroom and the implications of this research for both the teaching and learning of foreign languages. It offers illuminating insights into the important relationship between research and teaching, and the inherent complexities of the teaching and learning of foreign languages in classroom settings. Offers an accessible overview of a range of research on instruction and learning in the L2 classroom Bridges the relationship between research, teachers, and learners Helps evolve the practice of dedicated current language teachers with research findings that suggest best practices for language teaching

Proceedings of the 2015 Federated Conference on Software Development and Object Technologies Jan 14 2021 This book presents the proceedings of the International Conference SDOT which was organized at the University in Žilina, Faculty of Management Sciences and Informatics, Slovak Republic in November 19, 2015. The conference was truly international both in terms of the amount of foreign contributions and in terms of composition of steering and scientific committees. The book and the conference serves as a platform of professional exchange of knowledge and experience for the latest trends in software development and object-oriented technologies (theory and practice). This proceedings present information on the latest developments and mediate the exchange of experience between practitioners and academia.

Building Vocabulary: Grade 7: Kit eBook Jun 18 2021 "This program helps students unlock the

meaning of over 60% of the words they encounter in the classroom and beyond with a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Students are introduced to one new root per lesson with daily activities to ensure that they learn the root and the many English words it generates. The teacher's guide includes lesson plans with detailed notes about words from each root, overhead transparencies for introductory activities, standards-based connections, and differentiation strategies."--Publisher website.

Building Vocabulary: Level 2 Kit May 18 2021 Building Vocabulary provides a systematic approach to teaching vocabulary using Greek and Latin prefixes, bases, and suffixes. Over 90% of English words of two or more syllables are of Greek or Latin origin. Instead of learning words and definitions in isolation, students learn key roots and strategies for deciphering words and their meanings across all content areas. Building Vocabulary: Foundations for grades 1-2, empowers beginning readers to learn words by identifying word parts or word families that share common sounds. Students will build vocabulary through the use of poetry, word endings, and simple roots. Building Vocabulary: Foundations: Level 2 kit includes: Teacher's Guide; Student Guided Practice Book (Each kit includes a single copy; additional copies may be ordered in quantities of 10 or more); Assessments to support data-driven instruction; and Digital resources including modeled lessons, 50 bonus activities, and more.

Empirical Studies of Programmers Feb 12 2021 This volume contains the papers presented at the second workshop on Empirical Studies of Programmers. They represent a variety of approaches and topics covering the research in this area. All the chapters present research that bears on programmers. Together with the first volume edited by Elliot Soloway and Sitharama Iyengar, these chapters contribute to a growing knowledge base about how programmers go about their task and how they progress from novice to expert levels.
