The Bombardier Story Dec 24 2019 "Bombardier was under attack again. This time, the flack was coming from the president of Berlin-based Adtranz, the rail equipment subsidiary of DaimlerChrysler AG. In 1999, he traveled to Toronto and made a speech in which he warned that Adtranz was coming to challenge Montreal-based Bombardier on its home turf of North America. His motive was retaliation: he did not like Bombardier's invasion of Adtranz's European markets. So he was going to put the upstart from the hinterlands in its place. 'The major player in the United States

of the future will be, I believe, Adtranz,' he predicted." "In the spring of 2001, Bombardier acquired Adtranz. The purchase more than doubled annual revenues at Bombardier's rail equipment division and catapulted Bombardier into the number one spot in the railway equipment industry, ahead of the rail divisions of Franco-British conglomerate Alstom and German industrial giant Siemens." "What made Bombardier's progression in rail equipment all the more remarkable is that it occurred while yet another progression was under way at Bombardier's aerospace group. In 1986, the company decided to enter the aerospace sector by acquiring business-jet maker Canadair Ltd. of Montreal. This was followed by acquisitions of several other ailing aerospace companies, including world-renowned Learjet. Turning around these floundering assets, Bombardier came out of nowhere to become, in a little more than a dozen years, the third-largest member of the civil aerospace manufacturing industry. Only US giant Boeing and European colossus, the Airbus consortium, are larger." – from *The Bombardier Story*

Disasters at Sea Mar 27 2020 Dag Pike draws on his experience as merchant navy captain, fast boat navigator and boat safety tester for RNLi lifeboats to focus on a wide range of disasters at sea. He compiles a wide range of accounts of yachts, motorboats and commercial vessels running into difficulty as a result of poor navigation, fog, miscalculation, human error, weather conditions etc and analyses in a readable and entertaining fashion what caused the disaster, what went wrong, how it was dealt with and the lessons learned from it. Examples range from the Fastnet disaster, powerboat races, boats run down in the Channel, to trawlers

pulled under by submarines, ferry accidents and tanker and cargo ship disasters. The incidents include grounding, collision, fire, sinking, ice and storms, and each chapter has an example from the Marine Accident Investigation Bureau who monitor incidents at sea. This book is a fascinating read for all who go afloat either for business or pleasure, and for anyone interested in just why disasters happen at sea.

'Who the Devil taught thee so much Italian?' Feb 24 2020 This book offers a comprehensive account of the methods and practice of learning modern languages, particularly Italian, in late sixteenth and early seventeenth century England. It is the first study to suggest a fundamental connection between language-learning habits and the techniques for both reading and imitating Italian materials employed by a range of poets and dramatists, such as Daniel, Drummond, Marston and Shakespeare, in the period. The widespread use of bilingual parallel-text instruction manuals from the 1570s onwards, most notably those of the Italian teacher John Florio, highlights the importance of translation in the language-learning process. This study emphasises the impact of language-learning translation on contemporary habits of literary imitation, in its detailed analyses of Daniel's sonnet sequence 'Delia' and his pastoral tragicomedies, and Shakespeare's use of Italian materials in 'Measure for Measure' and 'Othello'.

Ranger Confidential Oct 02 2020 For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. Ranger Confidential is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.
