Artificial Intelligence: Concepts, Methodologies, Tools, and Applications Jul 09 2020 Ongoing advancements in modern technology have led to significant developments in artificial intelligence. With the numerous applications available, it becomes imperative to conduct research and make further progress in this field. **Artificial Intelligence: Concepts, Methodologies, Tools, and Applications** provides a comprehensive overview of the latest breakthroughs and recent progress in artificial intelligence. Highlighting relevant technologies, uses, and techniques across various industries and settings, this publication is a pivotal reference source for researchers, professionals, academics, upper-level students, and practitioners interested in emerging perspectives in the field of artificial intelligence.

e-Learning, e-Education, and Online Training Oct 12 2020 This book constitutes the proceedings of the 5th International

Conference on e-Learning, e-Education, and Online Training, eLEOT 2019, held in Kunming, China, in August 2019. The 46 revised full papers presented were carefully reviewed and selected from 99 submissions. They focus on most recent and innovative trends in this broad area, ranging from distance education to collaborative learning, from interactive learning environments to the modelling of STEM (Science, Technology, Mathematics, Engineering) curricula.

Structural Competency for Architects Feb 13 2021 Structural Competency for Architects is a comprehensive volume covering topics from structural systems and typologies to statics, strength of materials, and component design. The book includes everything you need to know about structures for the design of components, as well as the logic for design of structural patterns, and selection of structural typologies. Organized into six key modules, each chapter includes examples, problems, and labs, along with an answer key available on our website, so that you learn the fundamentals. Structural Competency for Architects will also help you pass your registration examinations.

Mechanisms, Mechanical Transmissions and Robotics Jan 03 2020 Volume is indexed by Thomson Reuters CPCI-S (WoS). The present work presents up-to-date contributions to the field of mechanisms, mechanical transmissions, robotics and mechatronics. The topics covered are: kinematics, dynamics, analysis and synthesis, mechanical design, sensors and actuators, intelligent control systems and related applications in planar and spatial mechanisms and mechanical transmissions, biomechanics, serial and parallel robots, mobile robots, tele-operation, haptics, virtual reality and precision mechanics. The results reported here should be of interest to researchers, scientists, industrial experts, teachers and students in the fields of engineering as related to design, control and applications.

Rise & Shine — An Integrated Semester Course for Class 5 (Semester 2) Dec 26 2021 Rise and Shine – An Integrated Semester Course for Classes 1 to 5 has been designed and formulated in accordance with the guidelines of the latest National Curriculum Framework (NCF). It is a set of ten books, two for each class and one per semester. Each book includes subjects such as English, Mathematics, EVS/Science, Social Studies and General Knowledge. The key feature of the course is to make learning a joyful experience. Each book closely interweaves concepts to lay a strong foundation at the primary level. The course focuses on interactive approach to make the children active participants in the process of learning. Some of the key features of the series are : ? Based on the curriculum guidelines given by the latest National Curriculum Framework. ? Graded and matched to the number of class hours planned by the schools. ? Key concepts in each subject linked with interesting explanations; visual aids such as illustrations, photographs, diagrams, maps and tables; activities, games and real-life examples. ? Carefully graded and comprehensive exercises for true evaluation. ? CD for animated lessons and interactive exercises for better understanding of the concepts learnt in the textbook. ? Online support for Assignments, E-book, Test paper Generator. ? Teachers Resource Book to facilitate teaching. Goyal Brothers Prakashan

DESIGN OF MACHINE ELEMENTS (Subject Code MEC 604) Apr 17 2021 The 1st edition of book entitled "Design of Machine Elements" for IIIrd Year Diploma, Semester VI in Diploma in Mechanical Engineering Group as per the syllabus prescribed by SBTE. We have observed the students facing extreme difficulties in understanding the basic principles and fundamental concepts without adequate solved problems along with the text. To meet this basic requirement of students, sincere efforts have been made to present the subject matter with frequent use of figures and lots of numerical examples.

Mexico, a Study of the Educational System of Mexico and a Guide to the Academic Placement of Students in Educational Institutions of the United States Mar 05 2020 The educational system of Mexico is described, and guidelines concerning the academic placement of students who wish to study in U.S. institutions are provided. After considering the structure of the educational system, attention is directed to preschool, primary, and lower secondary education. Descriptions are provided of: lower secondary programs leading to further education, programs not leading to further education (vocational, commercial, and artistic training); special education; and nonformal education. Upper secondary education is also covered, including certificates and qualifications, nonformal education, grading, general academic study programs, vocational programs, and teacher training programs. Overviews of higher education and graduate education are provided, and types of public and private institutions are described. Guidelines for U.S. admissions officers cover: Mexican degrees and qualifications, determining educational levels, evaluation of the secondary curricula, transfer of credit from Mexican institutions, and Mexican scholarship programs.

Appendices include: a list of schools with Bachillerato programs incorporated into the Universidad Nacional Autonoma de Mexico; a list of higher education institutions and their institutional classification; and sample institutional documents. (SW)
