[The Battleship Builders Constructing and Arming British Capital Ships](#) Aug 29 2019 The launch in 1606 of HMS Dreadnought, the world's first all-big-gun battleship, rendered all existing battle fleets obsolete, but at the same time it wiped out the Royal Navy's numerical advantage, so expensively maintained for decades. Already locked in the same arms race with Germany, Britain urgently needed to build an entirely new battle fleet of these larger, more complex and more costly vessels. In this she succeeded spectacularly; in little over a decade fifty such ships were completed, almost exactly double that of what Germany achieved. It was only made possible by the company's vast industrial nexus of shipbuilders, engine manufacturers, armament fleets and specialist armour producers, whose contribution to the Grand Fleet is too often ignored. This heroic achievement, and how it was done, is the subject of this book. It charts the rise of the large industrial conglomerates that were key to this success, looks at the reaction to fast-moving technical changes, and analyses the politics of funding this vast national effort, both before and beyond the Great War. It also attempts to assess the true cost- and value- of the Grand Fleet in terms of the resources consumed. And finally, by way of contrast, it describes the effects of the post-war recession, industrial contraction, and the very different responses to rearmament in the run up to the Second World War.

[Solution to Mass Unemployment in Nigeria](#) Jan 15 2021 Solution to Mass Unemployment is the first in the book series, Achieving Rapid Industrialisation and Democratisation in Nigeria. The book and series are products of research aimed at understanding the present global distribution of wealth and power and the human development process. This book has eleven main parts: Introduction; Why there is mass unemployment in Nigeria; Basis for industrialisation; The Wealth creating cycle; Fruits of industrialisation; Theory of learning, employment, automation, productivity and inflation; The nature of the skill acquisition process; Linking education and production; Mobilizing resources for industrialization; Lessons of history; and Concerted efforts needed.

[A Ball, a Dog, and a Monkey](#) Sep 30 2019 A Ball, a Dog, and a Monkey tells the remarkable story of America's first efforts to succeed in space, a time of exploding rockets, national space mania, Florida boomtowns, and interservice rivalries so fierce that President Dwight Eisenhower had to referee them. When the Soviet Union launched the first orbital satellite, Sputnik I, Americans panicked. The Soviets had nuclear weapons, the Cold War was underway, and now the USSR had taken the lead in the space race. Members of Congress and the press called for an all-out effort to launch a satellite into orbit. With dire warnings about national security in the news almost every day, the armed services saw space as the new military frontier. But President Eisenhower insisted that the space effort, which relied on military technology, be supervised by civilians so that the space race would be peaceful. The Navy's Vanguard program flopped, and the Army, led by ex-Nazi rocket scientist Wernher von Braun and a martinet general named J. Bruce Medaris (whom Eisenhower disliked), took over. Meanwhile, the Soviets put a dog inside the next Sputnik, and Americans grew more worried as the first animal in space whirled around the Earth. Throughout 1958 America went space crazy. UFO sightings spiked. Boys from Brooklyn to Burbank shot model rockets into the air. Space-themed beauty pageants became a national phenomenon. The news media flocked to the launchpads on the swampy Florida coast, and reporters reinvented themselves as space correspondents. And finally the Army's rocket program succeeded. Determined not to be outdone by the Russians, America's space scientists launched the first primate into space, a small monkey they nicknamed Old Reliable for his calm demeanor. And then at Christmastime, Eisenhower authorized the launch of a secret satellite with a surprise aboard. A Ball, a Dog, and a Monkey memorably recalls the infancy of the space race, a time when new technologies brought ominous danger but also gave us the ability to realize our dreams and reach for the stars.

[How to Repair Briggs and Stratton Engines, 4th Ed.](#) Mar 29 2022 Learn the Latest Money-Saving Techniques for Troubleshooting and Repairing Any Briggs & Stratton Engine, New or Old! /p> Turn to the Fourth Edition of How to Repair Briggs & Stratton Engines for expert guidance on completing any Briggs & Stratton maintenance and repair job quickly and easily. This money-saving resource now includes the latest information on overhead valves (OHV), carburetion advances, new muffler designs, and cutting-edge alternators. Filled with proven techniques for fixing both brand-new and older model Briggs & Stratton engines, the Fourth Edition of this hands-on reference covers everything from ignition, fuel, and charging systems...to starters and engine mechanics. You will find step-by-step instructions for troubleshooting and repairing magnetos...carburetors... governors...alternators...main bearings...flywheels...coils...fuel pumps ...air filters...rewind and electric starters...and connecting rods. Using more than 190 detailed illustrations, the Fourth Edition of How to Repair Briggs & Stratton Engines features: All the expertise needed to perform maintenance and repair jobs on any Briggs & Stratton engine Comprehensive guidance on state-of-the-art small-engine technology New to this edition: updated material on overhead valve design (OHV); new coverage of Flo-Jet suction lift carburetion; and new information on alternators, torque limits, and bolt tightening sequences Inside this Updated Briggs & Stratton Repair Kit • Introduction • The Product Range • Troubleshooting • Ignition Systems • The Fuel System • Starters • Charging Systems • Engine Mechanics • The Overhead Valve Revolution

Drawing from both the author's experience and the knowledge of various TR specialists and professional restorers, this guide covers complete restoration of the cars, including how to overcome common problems.

[To a Distant Day](#) Sep 03 2022 "Insightful, instructive, and definitely worth the read."--Greg Andres, Journal of the Royal Astronomical Society of Canada "As someone who has been teaching a course on space exploration for many years and has visited most of NASA's space centers, I have found plenty of new and valuable material in To a Distant Day. . . . I recommend the book to all who wish to know more about the conditions, people, and discoveries between 1890 and 1960 that led to the space age."--Pangratios Papacosta, Physics Today Although the dream of flying is as old as the human imagination, the notion of rocketing into space may have originated with Chinese gunpowder experiments during the Middle Ages. Rockets as both weapons and entertainment are examined in this engaging history of how human beings acquired the ability to catapult themselves into space. Chris Gainor's irresistible narrative introduces us to pioneers such as Konstantin Tsiolkovsky, Robert Goddard, and Hermann Oberth, who pointed the way to the cosmos by generating the earliest wave of international enthusiasm for space exploration. It shows us German engineer Wernher von Braun creating the V-2, the first large rocket, which, though opening the door to space, failed utterly as the "wonder weapon" it was meant to be. From there Gainor follows the space race to the Soviet Union and the United States, giving us a close look at the competitive hysteria that led to Sputnik, satellites, space probes, and--finally--human flight into space in 1961. As much a story of cultural ambition and personal destiny as of scientific progress and technological history, To a Distant Day offers a complete and thoroughly compelling account of humanity's determined efforts--sometimes poignant, sometimes amazing, sometimes mad--to leave the earth behind.

[American Marine Engines 1885-1950](#) Jan 03 2020 From the first internal combustion engine installation and the craft that took troops ashore on D-Day to the mid-1920s boom in recreational motorboating and beyond, this narrative presents a flawless history of the marine engine field. With an alphabetical listing of approximately 1,000 engine companies in the U.S. and Canada, this in-depth portrait also includes detailed information about founders and products, advice on the most desirable engines, tips on identifying unknown engines, and suggestions for independent research.

[The FJ Holden](#) Feb 02 2020 Leading early Holden historian Don Loffler has unearthed an amazing collection of stories and facts about FJ variants, from the popular Special to the rarest of them all - an experimental station wagon - as well as non-factory versions in many guises. The FJ Holden is lavishly illustrated with more than 500 photographs, most of which have never been published before. The information section includes comprehensive identification details for FJs that you will not find assembled in any other place. The FJ Holden is Don Loffler's third book devoted to Australia's national car. His other Holden bestsellers, She's a beauty!, Still Holden Together and Me and My Holden, have been widely praised.

[Nelson to Vanguard](#) Nov 05 2022 Nelson to Vanguard is the third volume in D K Browns bestselling series on warship design and development looks at the Royal Navys response to the restrictions placed on it by the Washington Naval Treaties in the inter-war years, and analyses the fleet that was constructed to fight the Second World War. He focusses on the principal pre-war developments such as the first purpose-built aircraft carriers and the growing perception of the threat of air attack to warships. All the wartime construction programmes are covered, such as the massive expansion in escort ships to counter the U-boat menace, and the development of the amphibious warfare fleet for the D-Day landings in 1944. Full analysis is also provided of the experience of wartime damage, as well as the once top secret pre- and post-war damage trials. Illustrated throughout with a superb collection of contemporary photographs and numerous line drawings, this now classic work is required reading for naval historians and enthusiasts.
