[Ovid, Amores \(Book 1\)](#) Aug 21 2021 From Catullus to Horace, the tradition of Latin erotic poetry produced works of literature which are still read throughout the world. Ovid's Amores, written in the first century BC, is arguably the best-known and most popular collection in this tradition. Born in 43 BC, Ovid was educated in Rome in preparation for a career in public services before finding his calling as a poet. He may have begun writing his Amores as early as 25 BC. Although influenced by poets such as Catullus, Ovid demonstrates a much greater awareness of the funny side of love than any of his predecessors. The Amores is a collection of romantic poems centered on the poet's own complicated love life: he is involved with a woman, Corinna, who is sometimes unobtainable, sometimes compliant, and often difficult and domineering. Whether as a literary trope, or perhaps merely as a human response to the problems of love in the real world, the principal focus of these poems is the poet himself, and his failures, foolishness, and delusions. By the time he was in his forties, Ovid was Rome's most important living poet; his Metamorphoses, a kaleidoscopic epic poem about love and hatred among the gods and mortals, is one of the most admired and influential books of all time. In AD 8, Ovid was exiled by Augustus to Romania, for reasons that remain obscure. He died there in AD 17. The Amores were originally published in five books, but reissued around 1 AD in their current three-book form. This edition of the first book of the collection contains the complete Latin text of Book 1, along with commentary, notes and full vocabulary. Both entertaining and thought-provoking, this book will provide an invaluable aid to students of Latin and general readers alike. This book contain embedded audio files of the original text read aloud by Aleksandra Szypowska.

The New Navy, 1883-1922 Jun 18 2021 The third volume of The U.S. Navy Warship Series covers the fifty-year period from 1883-1922. In 1883, Congress authorized the first ships of the "New Navy" and ordered removal of all obsolete ships. All US Navy ships since that time have stemmed from these first three cruisers. The numbering system in effect since 1920 was effectively begun in 1886. The ships built during the next few years fought in the Spanish-American War. The success and popularity of the naval victories of that war together with the acquisition of overseas territories were the impetus for a large naval shipbuilding program. The voyage around the world of the "Great White Fleet" was a prime example of the excitement felt by the American people about the Navy. This led naturally into the fleet of World War I and its vast expansion, terminating with its demobilization after the war and the succeeding naval disarmament treaty of 1922. This book will be arranged following the standard format with sections on Capital Ships, Cruisers, Destroyers, Submarines, Mines Vessels, Patrol Vessels, Tenders, Supply & Transport Ships, Naval Overseas Transportation Service (NOTS), and other government departments (Coast Guard, etc.). A further article about Paul Silverstone and the Navy Warships series can be found at:
