The KM Cookbook Jun 07 2020 The KM Cookbook serves up a menu of success stories and strategies for organizations wanting to know more about Knowledge Management Standard ISO30401 – whether they intend to pursue certification, or simply seek to use it as a framework to review their existing programme and strategy. The arrival of an internationally agreed standard and vocabulary, imbues fresh professional credibility to the field of Knowledge Management. Moving it on from a street food market of disparate approaches, it provides knowledge managers with a brand-new kitchen, and a moment during which they can pause and consider the service that they provide to their organisations. The KM Cookbook uses the metaphor of the restaurant, its cuisine, owner, chef, staff, ingredients, menu-planners, customers – and a restaurant critic, to serve up ISO 30401 on a plate for the readers. The second half of the book illustrates aspects of the standard by exploring sixteen different examples of KM in practice around the world, through the reflections of their own 'KM chefs'. Case studies include: General Electric, World Bank, USAID, Schlumberger, PROCERGS, Médecins Sans Frontières, Transport for London, International Olympic Committee, TechnipFMC, Linklaters, Syngenta, Defence Science & Technology Laboratory, Financial Conduct Authority, Petroleum Development Oman, Saudi Aramco and MAPNA. This book will be invaluable for CKOs, CIOs, CEOs and knowledge and information managers seeking to gain professional recognition for their function and to review their approach within a new framework.

The 108 peer reviewed papers and keynote speech included here, range from theoretical and conceptual to strongly pragmatic works, which are organized into 17 sections including: Concurrent Engineering and knowledge exchange; engineering for sustainability; multidisciplinary project management; collaborative design and engineering; optimization of engineering operations and data analytics; and multidisciplinary design optimization, among others. [When Organization Fails](#) Aug 22 2021 When Organization Fails: Why Authority Matters develops the study of authority as an area of investigation in organizational communication and management. As a research topic, authority has rarely been addressed in depth in the management and organizational communication literature. It is critical, however, to maintaining unity of purpose and action of the organization, and it is frequently cited by organizational members themselves. Utilizing two case studies, examined in depth and based on the accounts of the individuals involved, authors James R. Taylor and Elizabeth J. van Every explore the pathology of authority when it fails. They develop a theoretical foundation that aims to illuminate authority by positioning it in communication theory. This volume sets the stage for a new generation of scholars who can make their reputations as experts on authority, and is intended for scholars and graduate students in organizational communication, leadership, and discourse analysis. It also offers practical insights to consultants and management experts worldwide.

Chinese Maritime Cases Aug 02 2022 This book selects leading, innovative and influential Chinese maritime judgments and presents full translation of them, with brief summary, to the readers so that they can have insights of how the Chinese maritime judges interpret, apply and develop Chinese maritime law in practice. China trades with other states in trillions of USD every year, and about 95% of the cargoes are carried by ocean-going ships calling at hundreds of Chinese ports each single day. Due to the enormous and steadily growing trade volume and shipping activities, foreign ships, companies and persons are often caught by the Chinese maritime law and court. The parties involved and their lawyers are more than ever enthusiastic to study Chinese maritime cases in order to deal with their own cases properly or, if possible, predicate the potential problems and avoid the disputes outright. The book is appealing to and benefits worldwide law students, academics, practitioners and industrial people in the shipping, trade, insurance and financial fields. Rwanda, Where Souls Turn to Dust Sep 30 2019 The author, Um'Khone Patrick Habamenshi, was appointed Minister of Agriculture in Rwanda in October 2003, two days after his thirty-fifth birthday. It started as a dream but rapidly became a nightmare marked by constant threats, insults, and unfounded accusations. He resigned in May 2005 and sought refuge in the Canadian Embassy in Kigali. The following year was a slow downward spiral to the same hell that decimated Rwanda in 1994, a hell of injustice and senseless persecution. The experience left him broken beyond words. He was left with the demons and ghosts of his broken country and with tortured experiences that would surely destroy him if he succumbed to them. Rwanda, Where Souls Turn to Dust is the remarkable story of his healing path to rebuilding his mind, body and spirit. He had to move away from the negative things that had been dominating his life, the loss of his loved ones, and the loss of his previous dreams. He rebuilt his life from the ashes of his old life in Rwanda, a life free of hatred, free of prejudice, and free of fears.

Design Thinking Research Nov 05 2022 This book summarizes the results of Design Thinking Research carried out at Stanford University in Palo Alto, California, USA, and Hasso Plattner Institute in Potsdam, Germany. The authors offer readers a closer look at Design Thinking with its processes of innovations and methods. The contents of the articles range from how to design ideas, methods, and technologies via creativity experiments and wicked problem solutions, to creative collaboration in the real world and the connectivity of designers and engineers. But the topics go beyond this in their detailed exploration of design thinking and its use in IT systems engineering fields and even from a management perspective. The authors show how these methods and strategies work in companies, introduce new technologies and their functions and demonstrate how Design Thinking can influence as diverse a topic area as marriage. Furthermore, we see how special design thinking use functions in solving wicked problems in complex fields. Thinking and creating innovations are basically and inherently human – so is Design Thinking. Due to this, Design Thinking is not only a factual matter or a result of special courses nor of being gifted or trained: it's a way of dealing with our environment and improving techniques, technologies and life.
