In this, his twentieth book, George Manus has picked out thoughts from "Reflections" I - II and III, as well as "Thoughts". EV - Electric Vehicles Come Home Sep 29 2019 In my first book on Electric Cars, I covered those which were available in the US. In my new book, I decided to cover the world. I also venture into Electric Planes and EVTOLS - Electric Vertical Takeoff and Landing machines. Even though EVs are very interesting, you might get bored after the 100th or so. To relieve your boredom, I inserted stories about my visits from a couple of outer space aliens who are very interested in Electric Cars. Who says you can't mix research books with sci-fi and humor? I start with the most popular EVs. I cover many parts of the globe. And I cover lesser known Electric cars. Some places around the world don't have good roads or the roads are too crowded. There, electric motorcycles, rickshaws, and other vehicles are more popular than electric cars. And did you know that there's an electric skateboard? Electric Cars come in several models - Sedans, SUVs, Crossovers, Hatchbacks, etc. There are even little electric bubble cars. And there's a Amphibious E-Tricycle Camper. Now is a good time to get into an EV - there's availability. You'll get good range. And you'll save money on gas and maintenance. Besides, bans on ICE vehicles (internal combustion engine - petrol powered cars) are coming. Maybe not tomorrow, but soon. And supermost of all, owning an EV is cool and the wave of the future. And you want to get into the action now because you want to ride the crest of the wave. Some people are still worried about - what happens if the battery dies. I cover that. Good news - not a problem. I also cover converting your car to an EV (or rather hiring someone to do that for you) and EV Rentals. I conclude the book with what it would take to own an EV Dealership, My EV choices, and statements by World Leaders on EVs. I evaluate the more popular cars and provide a blank evaluation form so you can make your own evaluations. This book is packed with information, but I keep it light so you won't get bored. Actually, that's not true. I kept it light so that I wouldn't get bored.

Hyundai and Kia Motors: The Early Years and Product Development by Donald G Southerton provides deep insights into the rise of the Korean car industry. In addition, the brands at times partnered for technology with Ford, Mazda, and Mitsubishi, along with world class designers like Giorgetto Giugiaro. Expanding rapidly the Korean brands soon looked to new international markets, including the U.S. Despite the failure of Kia Motors to survive the IMF Crisis, the merger with Hyundai led to integrated technology research, development, and manufacturing-- not to mention the economies of scale needed for the Korean automaker to compete globally with industry heavyweights such as Toyota, Ford, GM, and VW.
