*The Business of Marketing, Entrepreneurship, and Architecture of Communal Societies in the 1960s and 1970s* Jan 24 2020 This book provides an in-depth history of three US-based communal societies that operated in the late 1960s and 1970s—Soul City, Stelle and Twin Oaks—with an emphasis on their financing, marketing, and entrepreneurship processes. These communities reflect the diversity of people who were dissatisfied with the direction in which American society was heading—often underpinned by concerns over racism, sexism, the environment, and capitalism—and decided to take the radical step of joining a communal society. A moral economy approach offers a lens on how these communities were prevented from fully realizing their visions due to the confines of capitalism, as embedded in banking practices, zoning laws, and systemic racism.

*Challenging Past And Present* Nov 02 2020 The complex and coherent development of Japanese art during the course of the nineteenth century was inadvertently disrupted by a political event: the Meiji Restoration of 1868. Scholars of both the preceding Edo (1615-1868) and the succeeding Meiji (1868-1912) eras have shunned the decades bordering this arbitrary divide, thus creating an art-historical void that the former view as a period of waning technical and creative inventiveness and the latter as one threatened by Meiji reforms and indiscriminate westernization and modernization. *Challenging Past and Present*, to the contrary, demonstrates that the period 1840-1890, as seen progressively rather than retrospectively, experienced a dramatic transformation in the visual arts, which in turn made possible the creative achievements of the twentieth century
