Extreme States of Matter May 26 2022 With its many beautiful colour pictures, this book gives fascinating insights into the unusual forms and behaviour of matter under extremely high pressures and temperatures. These extreme states are generated, among other things, by strong shock, detonation and electric explosion waves, dense laser beams, electron and ion beams, hypersonic entry of spacecraft into dense atmospheres of planets and in many other situations characterized by extremely high pressures and temperatures. Written by one of the world's foremost experts on the topic, this book will inform and fascinate all scientists dealing with materials properties and physics and also serve as an excellent introduction to plasma-, shock-wave and high-energy-density physics for students and newcomers seeking an overview. This second edition is thoroughly revised and expanded, in particular with new material on high energy-density physics, nuclear explosions and other nuclear transformation processes.

State of Emergency May 14 2021 It's countdown to Armageddon for an OSI agent in this thriller by the New York Times-bestselling author of Stone Cross and Tom Clancy Code of Honor... Two agents, Russian and American, are brutally murdered. College students, working as drug mules, die gruesome deaths from radiation poisoning. Powerful dirty bombs explode minutes apart in San Francisco and St. Petersburg, Russia—slaughtering citizens and spreading blind panic throughout the world. But this is only a warning. The next attack will be nuclear. Enter Air Force OSI agent Jericho Quinn and his crack team of specialists. Their mission: track down the black-market arms dealer who masterminded the plot—with a Soviet-era suitcase-sized bomb—and dismantle them both. When the trail leads to South America, Quinn has to join the famous Dakar Rally, a 6,000-mile motorcycle run that's about to become the most dangerous race in history. It's not the finish line they're racing for. It's the fate of the world.
