Strange Country Feb 10 2021 "This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In *Strange Country*, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

Eidolon May 04 2020 The book follows the two children as they embark on an adventure, which begins with the discovery of a hidden witch's haven in a graveyard and Jordan's first encounter with the spirit world - but by know means the first for Sebastian. Then a haunted observatory on the outskirts of town yields a clue - a piece of an intriguing map leading to, what they believe to be, hidden treasure. After collecting the rest of the clues from around the town, Jordan and Sebastian search for the treasure, but instead of rubies, emeralds and gold doubloons, they find themselves lead to a doorway into another world, called the Phantom Realm.

The New Art of War Aug 31 2022 "The introduction explains why we should study war. As for how to do this, we turn to Alexander the Great's mentor, Aristotle, who in Posterior Analytics, asserts that understanding something's nature requires that we identify its cause or "why." In Physics and Metaphysics, he says that this "why" can be expressed as four "causes:" (1) "material" (substance); (2) "formal" (appearance); (3) "efficient" (source); and (4) "final" (purpose). For example, a statue's material cause is bronze; its formal cause is the shape; its efficient cause is the artisan and her technique; and its final cause is the satisfaction inspired by the work of art. The "why" of a statue, therefore, is be-"cause" the artisan (efficient) molded it from

bronze (material) into a shape (formal) that elicits admiration (final).² Applying this technique to war yields a material cause (the "stuff" of war), war's physical components; formal cause (war's form), force arrangement and interactions informed by tactics and doctrine; efficient cause (generally, humanity; specifically, warriors), the author of war within whom dwells the will to fight; and lastly, a final cause (the war's purpose), what war seeks to achieve"--

Komodo Dragons Apr 14 2021 More than twenty years have passed since Walter Auffenberg's monumental *The Behavioral Ecology of the Komodo Monitor*. In the intervening years the populations of Komodo dragons—native only to a handful of islands in southeast Indonesia—have dwindled, sparking intensive conservation efforts. During the last two decades new information about these formidable predators has emerged, and the most important findings are clearly presented here. A memoir from Walter Auffenberg and his son Kurt is followed by the latest information on Komodo dragon biology, ecology, population distribution, and behavior. The second part of the book is dedicated to step-by-step management and conservation techniques, both for wild and captive dragons. This successful model is a useful template for the conservation of other endangered species as well, for, as Kurt and Walter Auffenberg note, “The species may well indeed survive in the wild for generations to come while countless other organisms are lost.”

Pick the Best and Leave the Rest Jun 16 2021 You have the ability, experience and behavioural finesse. But even then, you are not able to succeed. Why is that so? Whereas some people are less educated but earn millions. They achieve big success even after doing less hard work. They are not good in behavioural terms but they join the ranks of influential people. Have you ever thought about it? If you have not, we can tell you the secret behind this. Because this difference is of the brain and brain is the power that recognizes the power hidden in thoughts. Then, you can win any big battle. Anil Ambani once said, "There is no alternative of brain power. Due to this power, you are able to control your chaotic life. Because when you start using it properly, your memory and vision increase." Tarun Engineer has written many Superhit books for the Diamond Books, Raja Pocket Books, Berrykerry Books & Ramesh Publishing House. 'Pick the Best and Leave the Rest' is his best creation in the category so far. Mr. Engineer has worked hard to collect ideas and thoughts from numerous resources. This is a result of his unflinching dedication to the realm of book writing. He would do many more prestigious projects like this one in the future too. Before reading this book, you must learn what the objective behind reading this book really is. Is it polishing career, or is it for developing your business? Is it for making your future secure, or is it for bringing prosperity in the family? Is it for setting up an industry, or is it for getting back lost love? When you take the decision about this, these thoughts would start doing miracles.

A Little Primitive Aug 19 2021 Life can be tough, but it's even tougher for a guy who's only two feet tall -- and utterly uncivilized. When the little primitive tumbles into the world of a reclusive young woman, he changes her life forever. It's not enough that she must protect herself from an insanely jealous ex-husband, she now has to nurse her tiny, unwanted guest back to health *and* maintain the secret of his existence! This contemporary thriller goes beyond the usual genre boundaries and delivers a story of intrigue, humor, history and suspense. Mato, the little primitive, has many talents. Not only is he a fearless warrior and intrepid hunter, but he's a gifted artist and seer. On a life-or-death mission for his clan, the two-foot tall hero faces a world dominated by giants whose magic has no limits. Fortunately, Mato runs into Tori Lanier, a young woman facing demons of her own. Together, they struggle to make sense of a world that grows more confusing every day. Once again, Josh Langston
