[Argument Evaluation and Evidence](#) Jun 06 2020 This monograph poses a series of key problems of evidential reasoning and argumentation. It then offers solutions achieved by applying recently developed computational models of argumentation made available in artificial intelligence. Each problem is posed in such a way that the solution is easily understood. The book progresses from confronting these problems and offering solutions to them, building a useful general method for evaluating arguments along the way. It provides a hands-on survey explaining to the reader how to use current argumentation methods and concepts that are increasingly being implemented in more precise ways for the application of software tools in computational argumentation systems. It shows how the use of these tools and methods requires a new approach to the concepts of knowledge and explanation suitable for diverse settings, such as issues of public safety and health, debate, legal argumentation, forensic evidence, science education, and the use of expert opinion evidence in personal and public deliberations.

Computational Models of Argument May 18 2021 The investigation of computational models of argument is a rich and fascinating interdisciplinary research field with two ultimate aims: the theoretical goal of understanding argumentation as a cognitive phenomenon by modeling it in computer programs, and the practical goal of supporting the development of computer-based systems able to engage in argumentation-related activities with human users or among themselves. The biennial International Conferences on Computational Models of Argument (COMMA) provide a dedicated forum for the presentation and discussion of the latest advancements in the field, and cover both basic research and innovative applications. This book presents the proceedings of COMMA 2020. Due to the Covid-19 pandemic, COMMA 2020 was held as an online event on the originally scheduled dates of 8-11 September 2020, organised by the University of Perugia, Italy. The book includes 28 full papers and 13 short papers selected from a total of 78 submissions, the abstracts of 3 invited talks and 13 demonstration abstracts. The interdisciplinary nature of the field is reflected, and contributions cover both theory and practice. Theoretical contributions include new formal models, the study of formal or computational properties of models, designs for implemented systems and experimental research. Practical papers include applications to medicine, law and criminal investigation, chatbots and online product reviews. The argument-mining trend from previous COMMA's is continued, while an emerging trend this year is the use of argumentation for explainable AI. The book provided an overview of the latest work on computational models of argument, and will be of interest to all those working in the field.

Computational Models of Argument Nov 23 2021 "Argumentation has evolved from its original study primarily by philosophers to emerge in the last ten years as an important sub-discipline of Artificial Intelligence. There have been significant contributions resulting from this, including approaches to modelling and analysis of defeasible reasoning, formal bases for negotiation and dialogue processes in multiagent systems, and the use of argumentation theory in AI applications whose nature is not best described through traditional logics, e.g. legal reasoning, evaluation of conflicting beliefs, etc. The process of interpreting and exploiting classical treatments of Argumentation Theory in effective computational terms has led to a rich interchange of ideas among researchers from disciplines such as Philosophy, Linguistics, AI and Economics. While work over recent years has done much to consolidate diverse contributions to the field, many new concerns have been identified and form the basis of current research. The papers in this volume, presented as part of the 1st International Conference on Computational Model of Arguments (COMMA) in September 2006, give a valuable overview of on-going research issues and concerns within this field."

One Writer's Beginnings Feb 24 2022 Featuring a new introduction, this updated edition of the New York Times bestselling classic by Pulitzer Prize and National Book Award-winning author and one of the most revered figures in American letters is "profound and priceless as guidance for anyone who aspires to write" (Los Angeles Times). Born in 1909 in Jackson, Mississippi, Eudora Welty shares details of her upbringing that show us how her family and her surroundings contributed to the shaping not only of her personality but of her writing as well. Everyday sights, sounds, and objects resonate with the emotions of recollection: the striking clocks, the Victrola, her orphaned father's coverless little book saved since boyhood, the tall mountains of the West Virginia back country that became a metaphor for her mother's sturdy independence, Eudora's earliest box camera that suspended a moment forever and taught her that every feeling awaits a gesture. In her vivid descriptions of growing up in the South—of the interplay between black and white, between town and countryside, between dedicated schoolteachers and the children they taught—she recreates the vanished world of her youth with the same subtlety and insight that mark her fiction, capturing "the mysterious transfiguring gift by which dream, memory, and experience become art" (Los Angeles Times Book Review). Part memoir, part exploration of the seeds of creativity, this unique distillation of a writer's beginnings offers a rare glimpse into the Mississippi childhood that made Eudora Welty the acclaimed and important writer she would become.

The Made-Up Self Nov 04 2022 The human presence that animates the personal essay is surely one of the most beguiling of literary phenomena, for it comes across in so familiar a voice that it's easy to believe we are listening to the author rather than a textual stand-in. But the "person" in a personal essay is always a written construct, a fabricated character, its confessions and reminiscences as rehearsed as those of any novelist. In this first book-length study of the personal essay, Carl Klaus unpacks this made-up self and the manifold ways in which a wide range of essayists and essays have brought it to life. By reconceiving the most fundamental aspect of the personal essay—the I of the essayist—Klaus demonstrates that this seemingly uncontrived form of writing is inherently problematic, not willfully devious but bordering upon the world of fiction. He develops this key idea by explaining how structure, style, and voice determine the nature of a persona and our perception of it in the works of such essayists as Michel de Montaigne, Charles Lamb, E. B. White, and Virginia Woolf. Realizing that this persona is shaped by the force of culture and the impress of personal experience, he explores the effects of both upon the point of view, content, and voice of such essayists as George Orwell, Nancy Mairs, Richard Rodriguez, and Alice Walker. Throughout, in full command of the history of the essay, he calls up numerous passages in which essayists themselves acknowledge the element of impersonation in their work, drawing upon the perspectives of Joan Didion, Edward Hoagland, Joyce Carol Oates, Leslie Marmion Silko, Scott Russell Sanders, Annie Dillard, Vivian Gornick, Loren Eiseley, James Baldwin, and a host of other literary guides. Finally, adding yet another layer to the made-up self, Klaus succumbs to his addiction to the personal essay by placing some of the different selves that various essayists have called forth in him within the essays that he has crafted so carefully for this book. Making his way from one essay to the next with a persona variously learned, whimsical, and poignant, he enacts the palimpsest of ways in which the made-up self comes to life in the work of a single essayist. Thus over the course of this highly original, beautifully structured study, the personal essay is revealed to be more complex than many readers have supposed. With its lively analyses and illuminating examples, *The Made-Up Self* will speak to anyone who wishes to understand—or to write—personal essays.

Argument Structure: Jun 26 2019 This monograph first presents a method of diagramming argument macrostructure, synthesizing the standard circle and arrow approach with the Toulmin model. A theoretical justification of this method through a dialectical understanding of argument, a critical examination of Toulmin on warrants, a thorough discussion of the linked-convergent distinction, and an account of the proper reconstruction of enthymemes follows.

Building Arguments Mar 04 2020 'Building Arguments' offers a fresh new approach to informal logic - successfully combining an accessible style with a rigorous, systematic treatment of argument: -It integrates reasoning and writing, teaching readers to argue effectively and communicate ideas in persuasive prose. -It combines fundamental topics of critical thinking into broader discussions of reasoning. So where other books may treat fallacy identification and avoidance, induction and deduction, and validity and soundness as ends in themselves, 'Building Arguments' presents these topics in a practical yet philosophically sound context. -It includes entertaining and relevant examples and exercises drawn from sports, popular advertising, current events, and many academic areas. -'Building Arguments' is unique in its emphasis on helping readers to develop their own persuasive arguments as well as to evaluate arguments from other sources. Using a writing level and organization guided by the principles of reading development, the author introduces material gradually - moving from a very accessible level to a more rigorous one. The result? A book unique in its ability to foster philosophically-based argument analysis while promoting reasoning and writing skills across the curriculum.

The Genre of Argument Feb 12 2021 The Genre of Argument is a rhetoric that defines the distinguishing characteristics of the argument paper, which students can understand easily once they are aware of its context and purpose. By looking at argument as a genre, students gain insight into how purpose influences many features of successful argumentative writing. Students are led to find the problem within a topic and develop a position or thesis in response to that situation. The overt consideration of genre will help students to apply generic conventions in a multiplicity of contexts.
