Leisure Cultures and the Making of Modern Ski Resorts Nov 25 2019 This edited volume offers an historical perspective on the creation of a global mass industry around skiing. By focusing on the ski resort as loci par excellence for global exchange, the contributors consider the development of skiing around the world during the crucial post-war years. With its global lens, *Leisure Cultures and the Making of Modern Ski Resorts* highlights both commonalities and differences between countries. Experts across various fields of research cover developments across the ski-able world, from Europe, Asia and America to Australia. Attention to media and material cultures reveals an insight into global fashions, consumption and ski cultures, and the impact of mainstream media in the 1960s and 1970s. This global and interdisciplinary approach will appeal to history, sociology, cultural and media research scholars interested in a cultural history of skiing, as well as those with more broad interests in globalization, consumption research, and knowledge transfer.

The Mountain Knows No Expert Jan 20 2022 Short-listed for the 2010 Banff Mountain Book Festival Competition *The Mountain Knows No Expert* epitomizes George Evanoff's philosophy towards the outdoors, while presenting an intriguing contrast with the man himself. Widely regarded as an "expert," he was a knowledgeable, experienced, and practical outdoorsman, teacher, and mentor, yet ironically lost his life in the mountains in an encounter with a grizzly. Son of a Macedonian immigrant family, George was raised in Alberta, and went on to become a mountaineer, guide, avalanche specialist, and pioneer in ecotourism in British Columbia's North Rockies. The many themes embedded in Evanoff's life experiences encompass self-propelled backcountry travel, outdoor safety, avalanche safety and rescue, ski patrol leader, exploration and discovery, outdoor ethics, and public involvement with respect to land and resource use. George Evanoff was honoured in several tangible ways after his death, culminating in the naming of Evanoff Provincial Park in the Hart Ranges of the Rockies.

The American West at Risk Aug 15 2021 *The American West at Risk* summarizes the dominant human-generated environmental challenges in the 11 contiguous arid western United States - America's legendary, even mythical, frontier. When discovered by European explorers and later settlers, the west boasted rich soils, bountiful fisheries, immense, dense forests, sparkling streams, untapped ore deposits, and oil bonanzas. It now faces depletion of many of these resources, and potentially serious threats to its few "renewable" resources. The importance of this story is that preserving lands has a central role for protecting air and water quality, and water supplies—all support a healthy living environment. The idea that all life on earth is connected in a great chain of being, and that all life is connected to the physical earth in many obvious and subtle ways, is not some new-age fad, it is scientifically demonstrable. An understanding of earth processes, and the significance of their biological connections, is critical in shaping societal values so that national land use policies will conserve the earth and avoid the worst impacts of natural processes. These connections inevitably lead science into the murkier realms of political controversy and bureaucratic stasis. Most of the chapters in *The American West at Risk* focus on a human land use or activity that depletes resources and degrades environmental integrity of this resource-rich, but tender and slow-to-heal, western U.S. The activities include forest clearing for many purposes; farming and grazing; mining for aggregate, metals, and other materials; energy extraction and use; military training and weapons manufacturing and testing; road and utility transmission corridors; recreation; urbanization; and disposing of the wastes generated by everything that we do. We focus on how our land-degrading activities are connected to natural earth processes, which act to accelerate and spread the damages we inflict on the land. Lydia Bradey: *Going Up Is Easy* Jan 28 2020 Provocative, stirring, and beautifully co-written by novelist Laurence Fearnley, Lydia Bradey: *Going Up Is Easy* is the story of how one woman took on the mountaineering world and won. In 1988, Lydia Bradey became the first woman to climb Mount Everest without supplementary oxygen. She made the ascent alone and to date she is the only New Zealander to have made an oxygen-free ascent. Her climb was a truly remarkable achievement but also an internationally controversial one. *Going Up Is Easy* details for the first time the events surrounding Bradey's historic feat, as well as her many hair-raising expeditions through Alaska, Bhutan, Nepal, Pakistan, India, China, Europe, and New Zealand. In the spirit of John Krakauer's *Into Thin Air* or Joe Simpson's *Touching the Void*, *Going Up Is Easy* celebrates a life lived on the edge. Through her stories, we encounter a woman propelled by curiosity and passion to become one of the greatest female high-altitude adventurers of recent times. Co-written with acclaimed novelist Laurence Fearnley, a long-time friend of Bradey, and stunningly illustrated throughout, *Going Up Is Easy* is a life story by turns dramatic, tender, funny, frank and inspiring. Lydia Bradey is one of Australasia's foremost high-altitude mountaineers. Beginning her alpine career in the 1970s, she made her first ascent of Aoraki/Mount Cook while still a teenager. Following her dream to become a climber, she travelled to Alaska, Nepal, Bhutan and Pakistan, where, in 1987, she became the first Australasian woman to climb an 8000-metre peak, Gasherbrum 2. In 1988, she made a historic ascent of Mount Everest, becoming the first woman to reach the summit without supplementary oxygen. Employed as a professional mountain guide, she has made two further ascents of Everest as well as climbed and guided extensively throughout Nepal, Pakistan, Antarctica, South America, Africa and Europe. She lives at Lake Hawea, Otago, with her partner — and fellow mountain guide — Dean Staples. Also available as an eBook

Alaska Adventure Guide Sep 04 2020 The author has worked to answer all your questions about travel and recreation in a state so remote. This guide attempts to target your interests and save you time, money, and effort so that nothing is wasted during your trip. Because Alaska is so big and your options so varied, the guide is organized so you can zero in on the activity or activities that appeal to you most. Thirteen chapters focus solely on adventure travel, each devoted to a single activity. The five regional chapters that follow focus primarily on the basics in a given area of the state: getting around, shopping, lodging, dining, and entertainment. Once you've chosen the adventure of your dreams, you can

go to the appropriate regional chapter to get the scoop on the best places in the vicinity to stay, eat, buy gear, rent a car, and learn about local culture and history. Outdoor travelers also are likely independent travelers. A multitude of companies offer exciting-sounding jaunts to scenic places all over the state, but many of these outfits work only with tour providers, such as cruise-ship operators, to obtain large numbers of clients per trip--thus excluding people who wish to travel on their own. In this guide, all our listings are available to independent travelers as well as those in tour groups. The objective is not to provide the most information about destinations or attractions, but, rather, the most useful information. The guide is opinionated, and for good reason. Any destination or outfitter listed here has made the cut by proving itself a wonderful place to visit or a reliable company with which to do business. If, for example, you want to learn more about sea kayaking in Alaska, you will not be supplied with every operation in the business--and believe us, there are many of them competing for your dollars. What you will get is a select assortment of those we consider best, and why. After all, isn't the point of a guidebook to help you make the most informed choices?
