[Territorial Impact Assessment](#) Aug 21 2019 This book presents a comprehensive debate and analysis of existing Territorial Impact Assessment (TIA) methodologies, designed under the auspices of the ESPON programme since the mid-2000s. This is intended to serve as a TIA handbook for the reader, to better understand the main differences, advantages and shortcomings of each presented TIA methodology. It also serves as a manual for professors and students in the field of policy evaluation, and territorial analysis, as it presents concrete examples of the implementation of each TIA methodology, their formulas and intrinsic evaluation elements. The purpose of policy evaluation methodologies is to check the main effects of private and public investments, in order to report back to policymakers and citizens on their efficiency and effectiveness. Over the past decades, both in Europe and worldwide, there has been an increasingly awareness of the need to implement/reinforce policy evaluation practices, at all territorial levels. At the same time, it has become widely accepted that many policy interventions produce impacts in more than one dimensions of territorial development. In this context, the use of a holistic and territorial approach for policy impact assessment evaluation has rapidly been adopted by the European Commission as a mainstream policy evaluation procedure.

Practical Research and Evaluation Mar 08 2021 This book is a starter 'DIY' text for practitioners who are looking to conduct evaluation studies and research as part of their own professional practice. The growing emphasis on evidence-based practice means that there is an increasing need for practitioners to have at least a basic understanding of research, be aware of methodological pitfalls and to be updated on new methods. This book provides a practical, user-friendly guide to social science research methods for professionals who have benefited from little, if any, formal research methods training but find themselves in a role that requires them to read and understand complex research findings and carry out their own research as part of their professional practice. Practical Research and Evaluation is aimed at practitioners working in education, health, social care and community work. Many in this market are non-graduates or are those whose study did not contain a research element, but are required to know how research works. This book has three main aims which will benefit this audience - to enable readers to carry out small-scale research projects of their own, provide them with the basic understanding necessary to commission research, and enable them to better understand and evaluate critically research reports. This book is designed specifically for 'Do-it-Yourself' researchers working in the public or voluntary sectors. It is accessible and relevant to practitioners, uses non-technical language wherever possible and employs grounded examples, practical tips, checklists and readings lists throughout.

National planning policy framework 2012 Nov 16 2021 The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.

How to Prepare a Dissertation Proposal May 10 2021 This step-by-step guide begins by identifying and defining the basics of a dissertation proposal. With careful consideration, they explore proposal functions and parts, show how to build your study's chain of reasoning, and carefully review alternate study designs. Chapters are devoted to qualitative studies (sectioned into case studies, philosophical, and historical investigations); quantitative studies (sectioned into experimental, causal modeling, and meta-analysis studies), and mixed-method studies (sectioned into: sample survey, evaluation, development, and demonstration and action projects). Three extensively annotated proposals of former students provide examples of the guidance offered and illustrate common types of studies.

Planning Twentieth Century Capital Cities Apr 09 2021 The twentieth century witnessed an unprecedented increase in the number of capital cities worldwide – in 1900 there were only about forty, but by 2000 there were more than two hundred. And this, surely, is reason enough for a book devoted to the planning and development of capital cities in the twentieth century. However, the focus here is not only on recently created capitals. Indeed, the case studies which make up the core of the book show that, while very different, the development of London or Rome presents as great a challenge to planners and politicians as the design and building of Brasília or Chandigarh. Put simply, this book sets out to explore what makes capital cities different from other cities, why their planning is unique, and why there is such variety from one city to another. Sir Peter Hall's 'Seven Types of Capital City' and Lawrence Vale's 'The Urban Design of Twentieth Century Capital Cities' provide the setting for the fifteen case studies which follow – Paris, Moscow and St Petersburg, Helsinki, London, Tokyo, Washington, Canberra, Ottawa-Hull, Brasília, New Delhi, Berlin, Rome, Chandigarh, Brussels, New York. To bring the book to a close Peter Hall looks to the future of capital cities in the twenty-first century. For anyone with an interest in urban planning and design, architectural, planning and urban history, urban geography, or simply capital cities and why they are what they are, Planning Twentieth Century Capital Cities will be the key source book for a long time to come.

Politics and the English Language Mar 20 2022 George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

Shaping the Plan for Operation Iraqi Freedom Sep 26 2022 In this study, Gregory Hooker provides a detailed narrative of the war planning process, spanning the military's initial attempts to refocus on regime change and the government's ineffective preparation for the postwar environment. Throughout, he assesses the prewar intelligence estimates and the various problems that U.S. Central Command (CENTCOM) had to overcome, including rampant media leaks, unrealistic strategic proposals, and time constraints caused by competing assumptions between senior policymakers and military planners. In doing so, he provides invaluable insight into challenges that may confront future U.S. war planning and intelligence efforts.

How to Prepare a Research Proposal Sep 02 2020 The public assumes the researcher spends the day dreaming up and trying out creative ideas. In reality, proposal development is an invisible but critical barrier over which even a good researcher may tumble. This book is intended to lower that barrier. It should increase first-trial recognition of good ideas and ensure that rejections do not result because a proposal poorly represented either the ideas, the investigator, or both.
