2020 With this HANDY 6x9" edition, your teenager will be thrilled to discover how Jesus might have spent his youth in preparation to become the Messiah. This faux biography of Jesus reconstructs the historic settings in which Jesus lived as one of us. The "missing years" are an interpolation of the birth story and his mission. The characters are presented with mundane motives and concerns, offering familiarity to the Believer and relevance to those in doubt. This set of four Gospel novels depicts the Trinity at work as God prepares

His son to deal with his own flesh in this material world. As you preview the carefully worded sexual passages, your eyes will open to the modern dilemma that young people face today. You will recognize the Holy Spirit's voice, as God molds and forges Jesus in the same way that Jesus can mold and forge you. Both the humanity of Jesus and his divinity are portrayed in this romantic story of the adventure that Jesus began - an adventure that continues to this day.

Changing Times for Black Professionals Apr 28 2020 This book is a study of the challenges, issues, and obstacles facing black professional workers in the United States. Though they have always been a part of the U.S. labor force, black professionals have often been overlooked in media, research, and public opinion. Ironically, however, their experiences

offer a particularly effective way to understand how race shapes social life, opportunities, and upward mobility. As the 21st century continues to usher in increasing demographic, social, and economic change to the United States, it is critical to consider the impact this will have on an important sector of the labor force. In this book, I examine the reasons why sociological study of black professional workers is important and valuable, review the literature that examines their experiences in the workplace, and consider the issues and challenges they are likely to face in a rapidly shifting social world. The goal

1964 was when the swinging sixties really began. Youth culture dominated the media and the spirit of optimism was ubiquitous. Yet there were also darker forces at work which proved to be equally significant for the future. **Changing Times** presents a clear and detailed picture of the many personalities, events and trends that made this year so remarkable. The escalation of the Vietnam War, elections in the USA and the UK, the struggle for civil rights and the imprisonment of Nelson Mandela are just some of the topics covered. Author Steve Millward makes the connections between music and

politics and links them to the wider world of art, film, fashion, sport, science and technology. He also goes beyond the UK and America, covering developments in Africa and the Caribbean. Throughout the book, the focus remains upon the music – pop, rock, folk, soul, jazz, classical – which so consistently reached new heights of quality and innovation, the repercussions of which are still being felt today. Steve covers music recorded and released in 1964, as well as earlier recordings which had an impact that year. The most notable instance is The Beatles' 'I Want To Hold Your Hand', recorded in October '63, which

spearheaded the band's breakthrough in the USA in 1964. Millward also celebrates the work of lesser-known but hugely influential figures such as Bert Berns, Eric Dolphy and Phil Ochs. The originality and insight contained in this book will appeal to intelligent readers of all ages and interests, in particular those with an interest in music history and politics. Steve draws inspiration from a number of authors, including Greil Marcus, Peter Guralnick, Susan Douglas, Alex Ross and Jonathon Green.

business and political history. While the media frequently warns of the newfound power of business in the world of politics, the authors in this book demonstrate that business has mobilized to shape public policy and government institutions, as well as electoral outcomes, for decades. Rather than assuming that business influence is inevitable, the chapters explore the complex evolution of this relationship in a wide range of different arenas--from attempts to create a corporate-friendly tax policy and regulations that would work in the interests of particular industries, to local boosterism as a weapon against New Deal liberalism, to the

nexus between evangelical Christianity and the oil industry, to the frustrations that business people felt in struggles with public interest groups. The history that emerges show business actors organizing themselves to affect government in myriad ways, sometimes successfully but other times with outcomes far different than they hoped for. The result in an image of American politics that is more complex and contested than it is often thought to be. The essays represent a new trend in scholarship on political economy, one that seeks to break down the barriers that once separated old subfields to offer a vision of the economy as

The Foreign Office and British Diplomacy in the

Twentieth Century Dec 05 2020 This book examines the evolution of the Foreign Office in the 20th century and the way in which it has responded to Britain's changing role in international affairs. The last century was one of unprecedented change in the way foreign policy and diplomacy were conducted. The work of 'The Office' expanded enormously in the 20th century, and oversaw the transition from Empire to Commonwealth, with the merger of the Foreign and Colonial Offices taking place in the 1960s. The book focuses on the challenges posed by waging world war and the process of peacemaking, as well as the

Vatican I and Vatican II Jan 06 2021 Vatican I and Vatican II represent two of the three ecumenical councils in modern times, yet relatively few studies have sought to understand their relation to one another. In fact, the councils are often positioned as mutually exclusive so that one must choose either Vatican I's or Vatican II's presentations of church and ecclesial authority. Failing to understand the

relationship between these councils inhibits the church's self-understanding and risks misinterpreting key aspects of its own tradition; further, it limits the church's ability to teach effectively on topics of concern to modern women and men, such as authority, freedom, and ecclesiology. Vatican I and Vatican II: Councils in the Living Tradition uses the questions of what, why, and how the councils taught to frame and demonstrate significant points of continuity, complementarity, and difference between them. It argues that only by seeing both Vatican I and Vatican II as communicating vital dimensions of the Christian

Paul's Pisidian Antioch Speech (Acts 13) Oct 23 2019

After a review of scholarly work on the speeches in Acts, particularly Paul's Pisidian Antioch speech, Morgan-Wynne sets Paul's speech in the context of the first missionary

journey and of the rest of Luke-Acts. In this book he analyzes the structure of the speech, asks whether Luke used sources for the speech, and examines the main theological themes, including the characterization of God and Jesus, the use of the OT, the place of Israel, and the portrait of Paul that emerges. Finally, the author looks at whether the speech sheds any light on the community for which Luke wrote and the problems which it may have been facing.

Changing Times Feb 25 2020

This is a study of how, and why, the British economy has changed since 1951. It covers the Golden Age of 1945-1973 when unemployment was below one million; when governments built millions of council houses and flats; when electricity, telephones, and gas were supplied by nationalised monopolies; when income and wealth inequality were narrowing; and when the UK was not a member of the European Economic Community. Moving through the inflation, rising

unemployment, and rapid contraction of the manufacturing industry from the mid- 1970s, Changing Times examines the transfer of assets which was effected in the privatisation of public housing and nationalised industries from the early 1980s. The role of the State changed as public investment fell. The financing of old-age care, of state pensions, and of the National Health Service became of increasing concern and were less politically amenable to the approach of using private finance (the Private Finance Initiative and tuition fees) to fund former public obligations. Changes were made to the system of

taxation, but public expenditure changed little as a share of national income, although the government now built little. Difficulties emerged in ensuring adequate housing for a growing population, and uncertainty grew as to where future investment in necessities like electricity supply would come from. Having narrowed in the Golden Age, inequality of income and wealth widened. Environmental concerns also grew, from the local smogs of the 1950s, through the concern with acid rain from the 1960s, to the current global concern with climate change. The financial crash of 2008 and the decision to 'Brexit' in the referendum of 2016 reduced
