Handbook of Handguns May 06 2020 In light of the 2nd Amendment debates, shooting may become the national passtime. To act responsibly within the 2nd Amendment, means knowing how to properly "bear arms". Knowing involves understanding firearm types, firearm operation, ammunition, internal ballistics, and shooting. These require training, especially shooting. Whether you own or plan to own a handgun for recreation, competition, or self-defense, training is of the utmost importance. When you fire a projectile (bullet) from a firearm, you are responsible for where it goes. You need to understand how fast it travels, how far it can travel, and how accurate your firearm is in delivering the projectile to your intended target. Yes, bearing arms is a right, but not one to be taken lightly. Firing a handgun is a grave responsibility and must be done correctly and with a full understanding of all the components that make up "shooting".
