Democracy in Turkey Oct 27 2022 This book examines the impact of European political conditionality on  
the process of democratization in Turkey over a twenty year period. Employing theoretical and conceptual  
approaches to the issue of EU conditionality, the author compares the case of Turkey to that of other  
European nations. Arguing that Turkey became vulnerable to the European conditionality when it applied  
for membership in 1987, he shows how the political reforms demanded of Turkey were not fully carried out  
as the EU had not in essence accepted Turkey as an official candidate during this period. The EU has  
started to exert real 'active leverage' since Turkey was declared an official candidate in 1999, and the  
author explores how these conditions have exerted a positive influence on democratic consolidation in  
Turkey. However, its effectiveness in this regard has diminished to a significant extent due to a number  
of problems that have continued to remain central in EU-Turkey relations. This comprehensive analysis of  
Turkey-EU political relations and democratization places the case of Turkey within an international  
context. As such, it will be of interest not only to those studying Turkish politics, government and  
democracy, but anyone working in the area of international relations and the EU.

Education for Values Dec 05 2020 Values in education - how they are taught, the ethics of teaching  
itself, plus their role in the education of educators - is an area of lively and passionate debate. This  
book provides an essential resource of ideas, issues and current practice for all those with an interest  
in this area of education. Presenting a range of critical writing, this book deals with issues relating  
to education in values; approaches to teaching values; teacher education and values; research for  
education in values; and international comparative studies. Highly regarded when it was first published  
in hardback in 2000, the book now appears in paperback for the first time with a new introduction, which  
updates the main ideas and themes of the book.

Accountable Governance Mar 20 2022 Public accountability is a hallmark of modern democratic governance  
and the foundation of the popular performance management movement. Democracy is just an empty exercise if  
those in power cannot be held accountable in public for their acts and omissions, for their decisions,  
their policies, and their expenditures. This book offers a finely detailed and richly informed  
consideration of accountability in both government and the contemporary world of governance. Twenty-five  
leading experts cover varying aspects of the accountability movement, including multiple and competing  
accountabilities, measuring accountability, accountability and democratic legitimacy, and accountability  
and information technology, and apply them to governments, quasi-governments, non-government  
organizations, governance organizations, and voluntary organizations. Together they provide the most  
comprehensive consideration of accountability currently available, with a blend of theoretical,  
empirical, and applied approaches.

State-local Relations Dec 17 2021 This is a revision and update of Zimmerman's classic study of  
relations between state and local government. The first edition, published in 1983, was based on three  
decades of research into intergovernmental affairs and examined the legal, financial, and structural

foundations of state-local relations. This new edition adds a fourth decade of research and brings the work up to date through the early 1990s, adding a chapter on state mandates and local governments, reviewing and analyzing the changes in fortune of state and local governments, and the impact of those changes on their relations between each other and between themselves and the federal government.

Standard Catalog of Imported Cars, 1946-1990 Jun 23 2022 This book provides a wealth of detailed information that collectors, investors, and restorers of imported cars will not find in any other book. This massive volume spans the marques of imported vehicles. The list includes such familiar names as Alfa Romeo, Aston Martin, Bentley, Citroen, Jaguar, Lamborghini, Porsche, Rolls-Royce, Saab, and Volkswagen. Also in these pages, you'll find details on such lesser-known yet no less intriguing marques as Abarth, DAF, Frazer Nash, Humber, Iso, Nardi, Panhard, Peerless, Sabra and Skoda. The book also highlights model changes and corporate histories and provides value information on the most popular models of imported cars.

The Management of Enterprises in the People's Republic of China Feb 07 2021 With China's eminent entry into the World Trade Organization, past speculations of China becoming a world economic power in the 21st century is a reality with which few would disagree. We are witnessing the awakening of many sleepy giants, such as the successful reformed state-owned as well as township and village enterprises. We are also witnessing the birth and growth of a significant private sector, along with ever-increasing foreign investments. In this development process, there is a critical need to document and theorize about the management process by firms in this changing and dynamic context. The Management of Enterprises in the People's Republic of China aims to contribute to the knowledge base of management within the Chinese context. The book begins with a mapping of research on management in PRC, and offers theoretical insights for cross-context, institutional, and behavioral studies. It then reports the results of fourteen empirical studies of management issues in the PRC firms. The issues studied include SOE transformation, globalization, governance, employment relationships, managerial networks, corporate culture and leadership. Also included are studies on the knowledge management process and management team characteristics of high technology firms. The methods of study include large-scale surveys, case studies, and interviews. The contributors are international experts in Chinese management research. Finally, we offer executive perspectives on several successful firms operating in China through interviews with their CEOs.

The Evolution of Communitarian Ideas Jun 11 2021 This book deals with three key questions about communitarian ideas: how to distinguish what constitutes communitarian thinking; what lessons to take from the historical development of communitarian arguments; and why their practical implications are relevant in devising reforms at the local, national, and global levels. Each chapter covers a distinct period, with a critical exposition of the leading thinkers of that time who contributed to communitarian philosophy and politics. Beginning with an examination of the rise of proto-communitarian ideas in classical Western and Eastern thought, the book closes with a review of communitarian responses to the emergent social and technological changes in the 21st century. Readers will learn about the core features and significance of communitarian theories and practices in relation to morality, education, the economy, freedom and security, community development, and democratic governance; and how they compare and contrast with other ethical and intellectual outlooks.

Cultural Theory as Political Science Jan 26 2020 This is the first major European political science book to discuss the growing interdisciplinary field of 'cultural theory', proposing a coherent and viable alternative to mainstream political science. The authors argue that three elements - social relations, cultural bias and behavioural strategy - illuminate political questions at a level of analysis on any scale: from the household to the state; the international regime to the political party.

Education, Democracy and Development Aug 25 2022 This book contains a selected number of papers which were first presented at the VIIIth World Congress of Comparative Education in Prague, July 8--14, 1992. The Executive Committee of the World Council of Comparative and Education Societies had gladly accepted the bid made by the (at that time still united) Czech and Slovak Comparative Education Society to organise this congress in their beautiful and historic capital. The choice of Prague, underlined by President Vaclav Havel's patronage, as well as the Congress theme, were intended as a demonstration of the (re-)opened communication among educationists all over the world, as a result of the peaceful upheavals ('velvet revolutions') which were awakening the countries of Central, South East and East Europe in those days. It is true that a good part of the enthusiasm has faded since then and given way to manifestations of disenchantment. Education can be regarded as a striking example of the recent developments between "euphoria" and "normalcy".

Education, Democracy and Development Jun 30 2022 This book contains papers on the theme of Education, Democracy and Development. The close inter-relationships between these three concepts, and the tensions as well as synergies which exist between them, have certainly been explored many times in the past. However this does not make reconsideration any the less important, particularly in the current context.

Indeed, with the break-up of the Soviet bloc, both existing countries released from their yokes and new countries carved out of the collapse of the Soviet Union find themselves in positions in which fundamental questions about inter-relationships between Education, Democracy and Development are, once again, of the utmost importance. Their intense interest in the theme has been infectious in Western countries where scholars and politicians have been reminded of their importance in rapidly changing circumstances.

*The Ancient City* Oct 23 2019 Greece and Rome were quintessentially urban societies. Ancient culture, politics and society arose and developed in the context of the polis and the civitas. In modern scholarship, the ancient city has been the subject of intense debates due to the strong association in Western thought between urbanism, capitalism and modernity. In this book, Arjan Zuiderhoek provides a survey of the main issues at stake in these debates, as well as a sketch of the chief characteristics of Greek and Roman cities. He argues that the ancient Greco-Roman city was indeed a highly specific form of urbanism, but that this does not imply that the ancient city was somehow 'superior' or 'inferior' to forms of urbanism in other societies, just (interestingly) different. The book is aimed primarily at students of ancient history and general readers, but also at scholars working on urbanism in other periods and places.

*State and Civil Society in Northern Europe* Mar 28 2020 In neo-liberal political and economic climate, it is suggested that a state stands in opposition to an autonomous civil society. This book offers insights into the dynamics of state and civil society relations, against trends of undermining the importance of the welfare state, and presents autonomous civic participation as the only way forward.

*Social Capital and Poor Communities* Jan 06 2021 Neighborhood support groups have always played a key role in helping the poor survive, but combating poverty requires more than simply meeting the needs of day-to-day subsistence. *Social Capital and Poor Communities* shows the significant achievements that can be made through collective strategies, which empower the poor to become active partners in revitalizing their neighborhoods. Trust and cooperation among residents and local organizations such as churches, small businesses, and unions form the basis of social capital, which provides access to resources that would otherwise be out of reach to poor families. *Social Capital and Poor Communities* examines civic initiatives that have built affordable housing, fostered small businesses, promoted neighborhood safety, and increased political participation. At the core of each initiative lie local institutions—church congregations, parent-teacher groups, tenant associations, and community improvement alliances. The contributors explore how such groups build networks of leaders and followers and how the social power they cultivate can be successfully transferred from smaller goals to broader political advocacy. For example, community-based groups often become platforms for leaders hoping to run for local office. Church-based groups and interfaith organizations can lobby for affordable housing, job training programs, and school improvement. *Social Capital and Poor Communities* convincingly demonstrates why building social capital is so important in enabling the poor to seek greater access to financial resources and public services. As the contributors make clear, this task is neither automatic nor easy. The book's frank discussions of both successes and failures illustrate the pitfalls—conflicts of interest, resistance from power elites, and racial exclusion—that can threaten even the most promising initiatives. The impressive evidence in this volume offers valuable insights into how goal formation, leadership, and cooperation can be effectively cultivated, resulting in a remarkable force for change and a rich public life even for those communities mired in seemingly hopeless poverty. *Economics and the Law* Apr 21 2022 This is an expanded second edition of Nicholas Mercurio and Steven Medema's influential book *Economics and the Law*, whose publication in 1998 marked the most comprehensive overview of the various schools of thought in the burgeoning field of Law and Economics. Each of these competing yet complementary traditions has both redefined the study of law and exposed the key economic implications of the legal environment. The book remains true to the scope and aims of the first edition, but also takes account of the field's evolution. At the book's core is an expanded discussion of the Chicago school, Public Choice Theory, Institutional Law and Economics, and New Institutional Economics. A new chapter explores the Law and Economics literature on social norms, today an integral part of each of the schools of thought. The chapter on the New Haven and Modern Civic Republican approaches has likewise been expanded. These chapters are complemented by a discussion of the Austrian school of Law and Economics. Each chapter now includes an "At Work" section presenting applications of that particular school of thought. By providing readers with a concise, noncritical description of the broad contours of each school, this book illuminates the fundamental insights of a field with important implications not

only for economics and the law, but also for political science, philosophy, public administration, and sociology.

David Kimble's Cutaways Aug 01 2020 For enthusiasts reading magazines such as *Motor Trend*, *Road & Track*, and others, David Kimble is no stranger. His brilliant cutaway artwork has been gracing the pages of those publications for years. Whether he illustrated engines, transmissions, full-car chassis, sports cars, race cars, or classics, his cutaway artwork revealed, in excruciating detail, things that a camera lens could never capture. In *David Kimble's Cutaways: The Techniques and the Stories Behind the Art*, Kimble reveals the secrets, techniques, procedures, and the dedication to craft that is required to produce these amazing illustrations. He covers the step-by-step procedures while producing fresh artwork for this book featuring a McLaren Can-Am car as well as a vintage Harley-Davidson. Although the procedures covered here are unique to Kimble, and pretty much a pipe dream to mere mortals, this title provides an inside look into how he does it. Also included are the stories and tales of how it all started, traveling the world to illustrate cars, behind the scenes with manufacturers, the Corvette years, as well as a gallery of many illustrations. Never before has David Kimble provided a look into his cutaway "skunkworks," or shared the procedures for bringing these beautiful technical illustrations to life. This book is a must-have for any automotive or art fan.

Convention Center Follies Nov 16 2021 American cities have experienced a remarkable surge in convention center development over the last two decades, with exhibit hall space growing from 40 million square feet in 1990 to 70 million in 2011—an increase of almost 75 percent. Proponents of these projects promised new jobs, new private development, and new tax revenues. Yet even as cities from Boston and Orlando to Phoenix and Seattle have invested in more convention center space, the return on that investment has proven limited and elusive. Why, then, do cities keep building them? Written by one of the nation's foremost urban development experts, *Convention Center Follies* exposes the forces behind convention center development and the revolution in local government finance that has privileged convention centers over alternative public investments. Through wide-ranging examples from cities across the country as well as in-depth case studies of Chicago, Atlanta, and St. Louis, Heywood T. Sanders examines the genesis of center projects, the dealmaking, and the circular logic of convention center development. Using a robust set of archival resources—including internal minutes of business consultants and the personal papers of big city mayors—Sanders offers a systematic analysis of the consultant forecasts and promises that have sustained center development and the ways those forecasts have been manipulated and proven false. This record reveals that business leaders sought not community-wide economic benefit or growth but, rather, to reshape land values and development opportunities in the downtown core. A probing look at a so-called economic panacea, *Convention Center Follies* dissects the inner workings of America's convention center boom and provides valuable lessons in urban government, local business growth, and civic redevelopment.

Building the Fourth Estate Jul 24 2022 *Building the Fourth Estate* reveals the crucial part played by the Mexican media in the country's remarkable recent political transformation. Based on an in-depth examination of Mexico's print and broadcast media over the last twenty-five years, Chappell Lawson traces the role of the media in that country's move toward democracy, demonstrating the reciprocal relationship between changes in the press and changes in the political system. In addition to illuminating the nature of political change in Mexico, Lawson's findings have broad implications for understanding the role of the mass media in democratization around the world. -- from back cover.

Media, Development, and Institutional Change Jan 18 2022 *Media, Development, and Institutional Change* investigates mass media's profound ability to affect institutional change and economic development. The authors use the tools of economics to illuminate the media's role in enabling and inhibiting political economic reforms that promote development. The book explores how media can constrain government, how governments manipulate media to entrench their power, and how private and public media ownership affects a country's ability to prosper. The authors identify specific media-related policies governments of underdeveloped countries should adopt if they want to grow. They illustrate why media freedom is a critical ingredient in the recipe of economic development and why even the best-intentioned state involvement in media is more likely to slow prosperity than to enhance it. Scholars and students of economics, political science and sociology; policy-makers, analysts and others in the development community; and academics in media studies will find this book insightful and provocative.

The Liquefaction of Publicness Sep 02 2020 The successful Brexit referendum campaign; Donald Trump's election; and the rise of right-wing nationalist-populist political parties and movements - all of these

events have incited renewed interest in public communication and the internetised media, deliberative democracy and public spheres, challenged by an informational abundance that generates a communicative liquefaction of publicness and politics. This book celebrates the 25th anniversary of the journal *Javnost - The Public*, bringing together internationally renowned scholars from 20 countries to discuss topical issues in contemporary media and communication research. It focuses on challenging issues of the changing nature of publicness and the public sphere in the internet age, issues of democracy and the crisis of public communication and the tasks of media and communication research as a social practice. It critically reflects on the democratisation crisis and the demise of popular and scholarly optimism, which the emerging internet inspired in early 1990s, when *Javnost - The Public* was founded.
