**The Making of a Manager** Jul 09 2020 No idea what you're doing? No problem. Good managers are made, not born. Top tech executive Julie Zhuo remembers the moment when she was asked to lead a team. She felt like she'd won the golden ticket, until reality came crashing in. She was just 25 and had barely any experience being managed, let alone managing others. Her co-workers became her employees overnight, and she faced a series of anxiety-inducing firsts, including agonising over whether to hire an interviewee; seeking the respect of reports who were cleverer than her; and having to fire someone she liked. Like most first-time managers, she wasn't given any formal training, and had no resources to turn to for help. It took her years to find her way, but now she's offering you the short-cut to success. This is the book she wishes she had on day one. Here, she offers practical, accessible advice like: · Don't hide thorny problems from your own manager; you're better off seeking help quickly and honestly · Before you fire someone for failure to collaborate, figure out if the problem is temperamental or just a lack of

training or coaching · Don't offer critical feedback in a 'compliment sandwich' – there's a better way! Whether you're new to the job, a veteran leader, or looking to be promoted, this is the handbook you need to be the kind of manager you've always wanted.

**Ten Lessons for a Post-Pandemic World** Feb 13 2021 From the international bestselling author of *The Post-American World* 'An intelligent, learned and judicious guide for a world already in the making' *The New York Times* Since the end of the Cold War, the world has been shaken to its core three times. 11 September 2001, the financial collapse of 2008 and - most of all - Covid-19. Each was an asymmetric threat, set in motion by something seemingly small, and different from anything the world had experienced before. Lenin is supposed to have said, 'There are decades when nothing happens and weeks when decades happen.' This is one of those times when history has sped up. In this urgent and timely book, Fareed Zakaria, one of the 'top ten global thinkers of the last decade' (*Foreign Policy*), foresees the nature of a post-pandemic world: the political, social, technological and economic consequences that may take years to unfold. In ten surprising, hopeful 'lessons', he writes about the acceleration of natural and biological risks, the obsolescence of the old political categories of right and left, the rise of 'digital life', the future of globalization and an emerging world order split between the United States and China. He invites us to think about how we are truly social animals with community embedded in our nature, and, above all, the degree to which nothing is written - the future is truly in our own hands. *Ten Lessons for a Post-Pandemic World* speaks to past, present and future, and will become an enduring reflection on life in the early twenty-first century.

Economics in One Lesson Aug 22 2021 With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the “Austrian School,” which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt’s focus on non-governmental solutions, strong — and strongly reasoned — anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication.

*Arabs* Jun 19 2021 A riveting, comprehensive history of the Arab peoples and tribes that explores the role of language as a cultural touchstone This kaleidoscopic book covers almost 3,000 years of Arab history and shines a light on the footloose Arab peoples and tribes who conquered lands and disseminated their language and culture over vast distances. Tracing this process to the origins of the Arabic language, rather than the advent of Islam, Tim Mackintosh-Smith begins his narrative more than a thousand years before Muhammad and focuses on how Arabic, both spoken and written, has functioned as a vital source of shared cultural identity over the millennia. Mackintosh-Smith reveals how linguistic developments--from pre-Islamic poetry to the growth of script, Muhammad's use of writing, and the later problems of printing Arabic--have helped and hindered the progress of Arab history, and investigates how, even in today's politically fractured post-Arab Spring environment, Arabic itself is still a source of unity and disunity.
